RUSSIA

Russia's economy recovering, but shadowed by global uncertainty

Russia's GDP growth

Consumer confidence in Russia

Source: RosStat, EIU and Nokian Tyres estimates Jan 2012

Major trends and expectations

- Russia's economy is clearly recovering from the severe crisis of 2008 - 2009
- In 2009, economy fell into recession with an annual decrease in GDP of 7.9%, but in 2010 it grew by 4.0%
- Recovery kept momentum in 2011, backed by high oil and commodity prices
 - estimated annual real GDP growth in 2011 was 4.3%
- Overall growth trend is likely to continue unless major external shocks (e.g. collapse of oil prices) take place: in the base scenario, average GDP growth for 2012-2016 is estimated at >4% a year
- However, some uncertainty has spread in the economy, fueled by the global financial turmoil and the internal political situation
- Election cycle will dominate economic policy until mid 2012; political protests may affect policy making
- Consumer confidence has stabilized and practically reached its normal level
- Ruble exchange rate was stable in H1/2011, fluctuated in H2/2011 and returned to the previous level of ~40 RUB/EUR

Car sales steadily on a growth track

Monthly car sales

MONTHLY CAR AND LCV SALES

Source: AEB; IHS Global Insight; Nokian Tyres estimates Jan 2012

Car market summary

- Sales of new cars and LCVs in Russia increased by 39% in 2011 vs. 2010
 - Towards the end of the year the growth rate has slowed down due to a higher comparison base in H2/2010
 - However, even in Q4 growth was very impressive and above expectations (e.g. Dec 2011 +23% vs. Dec 2010)
- Government scrappage scheme brought very positive results, albeit supporting mostly cheap brands and models
 - The program, which has positively affected the whole year's car sales, has been fulfilled in mid 2011
- Due to rapid recovery of demand the lack of cars continues, as manufacturers have limited quotas for Russia
 - Long lead times remain for many popular brands and models (3 – 6 months, mostly for budget cars)
 - This deferred demand will continue to positively affect sales, at least in early 2012
- The car market is forecasted to exceed 3 million cars and LCVs in 2012, showing a 10 - 15% growth
- Financing of car purchases continues supporting car sales, with the share of sales financed by banks and car manufacturers reaching its pre-crisis level (up to 50%)
