## Report by the Board of Directors 2016

Nokian Tyres' net sales increased by 2.3% to EUR 1,391.2 million (1,360.1 in 2015). Currency exchange rate changes affected net sales negatively by EUR 29.9 million compared with the rates in 2015.

Operating profit increased by 4.9% to EUR 310.5 million (296.0). Operating profit percentage was 22.3% (21.8%).

The profit for the period increased by 4.6% to EUR 251.8 million (240.7). The net effect of the Finnish Tax Authorities' tax decisions related to the 2007-2010 tax dispute was positive by EUR 4.9 million for the full financial year 2016. The tax dispute for 2007-2010 is thoroughly described in the section "Tax rate".

Earnings per share were EUR 1.87 (1.80).

Cash flow from operating activities was EUR 364.4 million (283.4), which was affected by the payment of EUR 51.0 million in additional taxes with punitive tax increases and interest concerning the tax years 2007–2010. The company paid the amount in January 2016.

The Board of Directors proposes a dividend of EUR 1.53 (1.50) per share.

#### Andrei Pantioukhov, Interim President and CEO:

"In 2016, Nokian Tyres demonstrated strong performance in all its main market areas despite quite challenging market environment. Our net sales and profitability improved, along with the market shares.

The fourth quarter exceeded our expectations. Sales in all our main markets increased compared to the same period in the previous year. Russia was the biggest contributor to the growth in sales in Q4 – for the first time in a few years. The first encouraging signals that we reported in connection with the Q3 results continued to come from Russia. Russia's economy and consumer markets continue to gradually stabilize, but we expect the growth in 2017 to be moderate.

The winter season started early and continued strongly, especially in CE, the Nordic countries and Russia. We have succeeded in improving our market share in our target areas despite all the challenges, especially in Russia and Central Europe. Our overall performance in the fourth quarter was excellent, and led to a strong full-year result.

Our production volumes were higher than last year, and productivity continued to develop positively. Raw material costs started to increase, as forecasted. We estimate that the raw material costs will increase by approximately 15–20% for the full year 2017 vs. 2016. This development will definitely lead to price increases in the whole industry. We have already started to implement the necessary price increases in order to maintain our profitability.

The cash flow from operating activities was EUR 81 million better than last year. Investments in 2016 amounted to EUR 105.6 million. Profitability was weakened by bad debt provisions of EUR 18.6 million, most of which related to customer bankruptcies originated in year 2015 in Russia (EUR 16.9 million). However, the collection rate of 2016 current receivables in Russia was 100%.

The fourth quarter net sales in Passenger car tyres went up from last year, and so did the operating profit. ASP decreased only slightly this quarter, mainly due to currency effects. In Heavy Tyres, we continued making the necessary investments for the future. Net sales and operating profit were practically flat year-over-year.

Vianor's net sales increased slightly, but profitability was below the targeted level driven by operational challenges and non-recurrent items (ICT development project write-offs). In order for Vianor to achieve a positive result, a comprehensive profit improvement program will be launched in 2017. The growth of our distribution network was positive, despite large-scale tyre shop closures in Russia caused by difficult economic situation in Russia. The number of Vianor, NAD, and N-Tyre outlets in our network grew by 286 in 2016. Currently, the network includes 3,102 stores in total.

We launched top quality products during 2016, and our products continued to perform very well in magazine tests. The new flagship products for our winter tyre range, the Nokian Hakkapeliitta 9 and Nokian Hakkapeliitta 9 SUV, along with new value-for-money products Nokian Nordman 7 and Nokian Nordman 7 SUV, will make our product portfolio even stronger.

Nokian Tyres is in great shape, and I am proud to be the interim President & CEO to lead the company forward. High customer satisfaction, an engaged organization, and the upcoming flow of new world's safest tyres create an excellent ground for future growth. In 2017, we expect net sales and operating profit to grow by at least 5% compared to 2016."

#### Market situation

The global recovery continues. As we enter 2017, all regions are showing positive development. In 2017 and 2018, the rate of growth is estimated to be slightly higher than in previous years. It is estimated that the global GDP will grow by 3.3% in 2017 (3.1% in 2016). The GDP growth estimates for the Nordic countries are from +1.0% to +2.3%, for Europe (including the Nordics) +1.3%, and for the US +2.1%. In Russia, the GDP is estimated to grow by approximately 1%.

# Net sales, operating profit and operating profit%

	2012	2013	2014	2015	2016
Net sales	1,612.4	1,521.0	1,389.1	1,360.1	1,391.2

Operating profit%	25.7	25.3	22.2	21.8	22.3

### Profit before tax

2012 2013 2014 2015 **2016** EUR million 387.7 312.8 261.2 274.2 **298.7**  In Europe, the sales of new cars increased in 2016 by 7% yearover-year. Car tyre sell-in to distributors was up 2% year-over-year, with winter tyre demand increasing by 3%. Overall, tyre demand is estimated to grow slightly year-over-year in Central Europe in 2017. Rapidly growing raw materials costs will force the global tyre industry to increase prices in 2017.

In the Nordic countries, new car sales increased in 2016 by 7% year-over-year. The market volume of car tyres was flat year-over-year. For the full year of 2017, car tyre demand is estimated to remain at the same level year-over-year.

In the US, the estimated new car sales were up by 0.6% in 2016 vs. 2015. The market volume of car tyres was up by 1.4% yearover-year. However, demand for winter tyres decreased. For the full year of 2017, car tyre demand is estimated to increase slightly year-over-year.

Russia's economic decline has slowed down but has not turned into growth yet. The economy continued to stabilize. The Russian consumers' confidence and purchasing power continued to gradually improve, but still remain at a low level. The sales of new cars in 2016 continued to decrease: the whole year showed a decline of 11% and December was down by 1% vs. the same period last year. In 2017, the new car market is expected to return to growth. For the whole year 2017, the new car sales is expected to grow in the range of 5–10% vs. 2016. The total replacement tyre market sell-in in Russia declined in 2016 by approximately 5%. In 2017, the tyre market is expected to grow by 5–10% vs. 2016.

The global demand for special heavy tyres continued to vary strongly between products and market areas in 2016. OE forestry tyre demand remained strong. The increased use of wood and the good profitability of pulp manufacturers will also support forestry machine and tyre demand during the following guarters.

In 2016, the sell-in of premium truck tyres was up by 3% in Europe, while in the Nordic countries demand was down by 3%. In Russia, the demand for premium truck tyres increased by 33% compared to 2015. Truck tyre demand in 2017 is estimated to show some increase or to remain at the same level as in the previous year in all of Nokian Tyres' western markets; in Russia, demand is showing some positive signals.

In 2016, the global GDP is estimated to have grown by 3.1%. The GDP growth estimates for Nordic countries were 0.8 - 3.2%, and for Europe (including Nordics) the estimate was 1.6%. The GDP in USA grew by 1.6%. In Russia, the GDP declined by 0.6% in 2016.

#### Raw materials

Nokian Tyres' raw material costs (EUR/kg) were down by 5.3% in 2016 year-over-year. The raw material costs are estimated to increase by approximately 15–20% in the full year of 2017, providing a headwind of approximately EUR 40–55 million versus 2016.

#### Review January–December 2016

Nokian Tyres Group recorded net sales of EUR 1,391.2 million (2015: 1,360.1; 2014: 1,389.1), with an increase of 2.3% compared with 2015. Currency exchange rates affected net sales negatively by EUR 29.9 million. In the Nordic countries, sales increased by 1.8% and represented 43.1% (43.5%) of the Group's total sales. In Russia and CIS, consolidated sales were down by 3.6% and formed 16.0% (17.1%) of the Group's total sales. In Other Europe, sales increased by 13.5% and represented 29.3% (26.5%) of the Group's total sales. In North America, sales decreased by 8.3% and were 10.8% (12.1%) of the Group's total sales.

Sales of Passenger Car Tyres were up by 3.1%, representing 66.7% (66.3%) of the Group's total sales. Heavy Tyres' sales remained at the same level year-over-year and were 10.6% (10.8%) of the Group's total sales. Vianor's sales increased by 2.2%, forming 22.8% (22.8%) of the Group's total sales.

The raw material costs (EUR/kg) in manufacturing decreased by 5.3% year-over-year. Fixed costs amounted to EUR 431.0 million (403.8), thereby accounting for 31.0% (29.7%) of net sales. Total salaries and wages were EUR 197.6 million (2015: 197.1; 2014: 195.4).

Nokian Tyres Group's operating profit amounted to EUR 310.5 million (2015: 296.0; 2014: 308.7), with an increase of 4.9% compared with 2015. The operating profit was negatively affected by the IFRS 2-compliant accrual for share option and performance share plans of EUR 15.0 million (9.1) and expensed credit losses and provisions of EUR 18.6 million (17.7), most of which related to customer bankruptcies in year 2015 in Russia (EUR 16.9 million). Operating profit percentage was 22.3% (2015: 21.8%; 2014: 22.2%).

Net financial expenses were EUR 11.8 million (21.8). Net interest expenses were EUR 8.0 million (10.7). In Q3/2015, financial expenses included a EUR 2.7 million premium related to Nokian Tyres' voluntary buy-back of a company bond maturing in 2017 amounting to EUR 62.3 million. In Q1/2015, the financial expenses were adjusted with a EUR 20.2 million reversal of interest on back tax as the reassessment decisions on the years 2007–2010 were annulled and returned to

Earnings per share

	2012	2013	2014	2015	2016
EUR	2.52	1.39	1.56	1.80	1.87

the Tax Administration for reprocessing. In Q4/2015, net interest expenses included EUR 19.2 million in penalty interest based on the renewed reassessment decisions from the Tax Administration received in December 2015 and January 2016. The net effect of the above described tax decisions was EUR 1.0 million positive for the full financial year 2015. Net financial expenses include EUR 3.8 million loss (11.1 loss) in exchange rate differences.

Profit before tax was EUR 298.7 million (274.2). The profit for the period amounted to EUR 251.8 million (240.7), and the EPS were EUR 1.87 (1.80). In Q1/2015, the tax expense was adjusted by EUR 80.1 million as the tax reassessment decisions for the years 2007-2010 were annulled and returned to the Tax Administration for reprocessing. In Q4/2015, the tax expense was again adjusted by EUR 74.9 million based on the renewed reassessment decisions received in December 2015 and January 2016. In total in Q1/2015, based on the annulment decision made by the Board of Adjustment of Finnish Tax Administration, the company returned total additional taxes and punitive interest of EUR 100.3 million to the financial result, and in Q4/2015, based on the renewed reassessment decisions, the company recorded total additional taxes and punitive interest of EUR 94.1 million to the financial result. The net effect of the above described tax decisions was EUR 6.2 million positive for the full financial year 2015. In Q4/2016, taxes were again decreased by EUR 4.9 million according to the decision of the Board of Adjustment in November 2016. Tax disputes are thoroughly described in the section "Tax rate". Excluding the tax decisions, the profit for the period increased by 5.3% compared to 2015.

Return on equity was 18.7% (2015: 19.6%; 2014: 16.0%). Cash flow from operating activities, EUR 364.4 million (283.4), was affected by the payment of EUR 51.0 million in additional taxes with punitive tax increases and interest concerning the tax years 2007–2010. The company paid the amount in January 2016. The company received the reassessment decisions of EUR 94.1 million in December 2015 and in January 2016. Previously, the Tax Administration had already set off EUR 43.1 million of the amount despite the stay of execution. In Q4/2016, the Tax Administration in turn returned EUR 4.9 million according to the decision of the Board of Adjustment in November 2016.

In 2016 the Group employed, on average, 4,433 (2015: 4,421; 2014: 4,272) people, and 4,392 (2015: 4,389; 2014: 4,204) at the end of the review period. In Finland, the Group employed 1,616 (2015: 1,732; 2014: 1,657) people at the end of the review period, and 1,368 (2015: 1,327; 2014: 1,326) people in Russia. The equity-

owned Vianor tyre retail chain employed 1,742 (2015: 1,681; 2014: 1,508) people at the end of the review period.

#### Research & Development

The goal of Nokian Tyres is for new products to account for at least 25% of annual net sales. The development of a brand-new passenger car tyre takes 2 to 4 years. Approximately one half of R&D investments are allocated to product testing. Nokian Tyres' R&D costs in 2016 totalled approximately EUR 20.3 million (2015: 18.7; 2014: 16.6), which is 1.5% (2015: 1.4%; 2014: 1.2%) of the Group's net sales.

#### Investments

Investments in the review period amounted to EUR 105.6 million (101.7). This comprises production investments in the Russian and Finnish factories, molds for new products, ICT and process development projects and the Vianor expansion projects.

#### Financial position on December 31, 2016

The gearing ratio was -19.7% (-16.9%). Interest-bearing net debt amounted to EUR -287.4 million (-209.7). Equity ratio was 73.8% (2015: 70.8%; 2014: 67.5%).

The Group's interest-bearing liabilities totaled EUR 225.8 million (219.6), of which the current interest-bearing liabilities amounted to EUR 88.8 million (19.9). The average interest rate for interest-bearing liabilities was 3.1% (3.2%). Cash and cash equivalents amounted to EUR 513.2 million (429.3).

At the end of the review period, the company had unused credit limits amounting to EUR 508.7 million (508.7), of which EUR 155.7 million (155.7) were committed. The current credit limits and the commercial paper program are used to finance inventories, trade receivables and subsidiaries in distribution chains, thereby controlling the typical seasonality in the Group's cash flow.

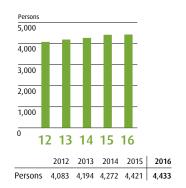

The Group's total comprehensive income was positively affected by translation differences for foreign operations by EUR 121.8 million (-55.2). The total comprehensive income for the period amounted to EUR 373.4 million (185.2).

Administration, according to which the Company was obliged to pay EUR 100.3 million in additional taxes with punitive tax increases and interest concerning the tax years 2007–2010, and returned the matter to the Tax Administration for reprocessing. According to the Board of Adjustment, the Tax Administration neglected the obligation to hear the taxpayer. Because of the procedural fault by the Tax Administration, the Board of Adjustment annulled the decision without considering the actual substance of the matter.

The Company returned the 2007–2010 total additional taxes of EUR 100.3 million in full to the financial statement and result for the first quarter of 2015. The Company had recorded the same amounts as expenses in full in the financial statement and result for 2013.

In December 2015 and January 2016, the Company received renewed reassessment decisions from the Tax Administration, according to which the Company was obliged to pay EUR 94.1 million in additional taxes with punitive tax increases and interest concerning the tax years 2007–2010. The company paid the amount in January 2016. The total sum demanded by the tax authorities was EUR 94.1 million, of which EUR 62.8 million were additional taxes and EUR 31.3 million were punitive tax increases and interest. The Company considers the decision unfounded and appealed against it by filing a claim with the Board of Adjustment.

Based on the renewed reassessment decisions, the Company has recorded the total additional taxes of EUR 94.1 million as expenses in full in the financial statement and result for 2015.

In November 2016, the Company announced that The Board of Adjustment of the Finnish Tax Administration held in force the reassessment decision from the Tax Administration related to additional taxes of EUR 62.8 million, but decreased the amount of punitive tax increases and interests from EUR 31.3 million to EUR 26.4 million concerning the tax years 2007–2010. The Company considers the decision unfounded and appealed against it by filing a claim with the Administrative Court.

The reassessment decision regarding the year 2011 has not been received yet, and the later years have not been tax audited by the Finnish Tax Administration.

#### Dispute concerning the US subsidiary 2008–2012

Nokian Tyres U.S. Finance Oy, a subsidiary of Nokian Tyres plc (ownership: 100% of the shares), received a reassessment decision from the Finnish Tax Administration, according to which the company is obliged to pay EUR 11.0 million in additional taxes with punitive tax increases and interest concerning the tax years 2008 to 2012. EUR 7.9 million of this are additional taxes and EUR 3.1 million are punitive tax increases and interest. The company recorded them in full in the financial statement and result for Q1/2014.

The Large Taxpayers' Office carried out a tax audit concerning the Finnish Business Tax Act, where the Tax Administration raised an issue about the restructuring of the sales company and acquisitions by Nokian Tyres Group in North America, completely ignoring the business rationale and corresponding precedent rulings presented by the company.

Nokian Tyres U.S. Finance Oy considered the reassessment decision of the Tax Administration unfounded and filed a claim for rectification with the Board of Adjustment. If necessary, the company will continue the appeal process in the Administrative Court.

#### Tax rate outcome and estimate

The Group's tax rate was 15.7% in the review period; and 17.4% excluding the decrease of the punitive tax increases and interests in 2016. In 2015, the tax rate was 12.2%, and 14.2% excluding the additional taxes in 2015. The tax rate is positively affected by tax incentives in Russia for current investments and further future investments. The latest agreed tax benefits and incentives for the factory came into force at the beginning of 2013 and, for the sales company, these were renewed in August 2016. The agreements will extend the benefits and incentives until approximately 2020. Due to the renewed agreement and changes in Russia's legislation, the estimate for the Group's tax rate is expected to be 19% for 2017–2019.

The tax rate in the coming years will depend on the timetable and final outcome of the ongoing back tax disputes with the Finnish Tax Administration. The Group's corporate annual tax rate may rise as a result of these cases.

#### **BUSINESS UNIT REVIEWS**

#### Passenger Car Tyres

Net sales of Nokian Passenger Car Tyres totaled EUR 981.1 million (951.5) in 2016, up by 3.1% year-over-year. Operating profit was EUR 305.8 million (285.5). Operating profit percentage was 31.2% (30.0%).

Net sales increased slightly during the review period, mainly due to the increased sales in Other Europe. In 2016, net sales in Russia and North America declined and in the Nordic countries

#### **NOKIAN PASSENGER CAR TYRES**

Net sales, Operating profit and Operating profit%

Net sales Operating profit Operating profit%

	2012	2013	2014	2015	2016
Net sales	1,220.1	1,137.0	1,003.2	951.5	981.1
Operating profit	410.8	378.5	292.2	285.5	305.8
Operating profit%	33.7	33.3	29.1	30.0	31.2

remained at the same level year-over-year. In Q4, sales increased especially in Russia. The winter season was good, especially in Other Europe, the Nordic countries and Russia. In most countries, the volumes were up. In Europe, the trend of sales shifting towards the consumer season has continued. Nokian Tyres' summer tyre sales continued to increase in all key markets.

In 2016, the Average Selling Price in euros decreased slightly mainly due to currency impacts. The share of winter tyres in the sales mix was 67% (71%), the share of summer tyres was 24% (21%) and the share of All-Season tyres was 9% (8%). Some price reductions have taken place in a few countries, which reflects the tight competitive situation and reductions in material costs partly passing through to tyre prices. Pricing environment during 2016 was tight, but shifted towards more neutral towards the end of the year due to increasing raw material prices.

Raw material costs ( $\epsilon/kg$ ) were down by 5.3% year-over-year, which, together with improved productivity, supported the margins.

Nokian Tyres succeeded in the winter tyre tests once again, with several car magazine test victories all over the world. The summer tyre range also won several car magazine tests. Read more: www. nokiantyres.com/test-success/. A flow of product launches with new innovations – improving safety, comfort and eco-friendly driving – continued in the review period. For example, the Nokian Hakka Blue 2 summer tyre for Nordic countries and Russia, Nokian Rockproof – a strong special tyre, Nokian zLine all season for North American markets as well as Nokian iLine and Nokian eLine 2 for CE were introduced during the review period.

In the review period, the capacity utilization increased yearover-year, and the production output (pcs) increased by 5%. Productivity (kg/mh) improved by 3% year-over-year. In 2016, 86% (81%) of Nokian passenger car tyres (pcs) were manufactured at the Russian factory.

#### Heavy Tyres

Net sales of Nokian Heavy Tyres totaled EUR 155.3 million (155.3) in 2016, remaining at the same level year-over-year. Operating profit was EUR 28.2 million (28.7). Operating profit percentage was 18.2% (18.5%).

In the Western markets, demand was moderate in most of Nokian Heavy Tyres' core product groups. Sales of forestry tyres were strong. Sales remained at a good level in the Nordic countries and increased in Russia. In Other Europe, sales declined due to decreased Agri sales. In North America sales decreased slightly. Especially new product sales developed well. The operating profit decreased slightly year-over-year due to the decreased average selling prices and higher level of marketing activities. The raw material cost savings in the beginning of the year supported full year profitability.

In 2016, the Average Selling Price decreased year-over-year due to a challenging pricing environment, a bigger share of OE sales, and the product mix. During the review period, sales volumes of the company's own production increased year-over-year. Productivity increased.

Production output (metric tons) increased vs. 2015, and continuous investments into production technology improved productivity.

#### Vianor

#### Equity-owned operations

Net sales totaled EUR 334.8 million (327.6) in 2016, up by 2.2% yearover-year. Operating profit was EUR -8.1 million (-1.9). Operating profit percentage was -2.4% (-0.6%). Excluding non-recurring items: Operating profit EUR -4.5 million, operating profit percentage -1.3%. Non-recurring items amounting to EUR 3.6 million include the writeoff of ICT development projects.

In 2016, Net sales increased in the Nordic countries year-overyear. Service sales increased by 4.1%. Retail sales accounted for 51% of Vianor's total sales. In Q4/2016, the retail business environment was very challenging. In order for Vianor to achieve a positive result, a comprehensive profit improvement program will be launched in 2017 focusing on service sales development, pricing management, retail structure optimization, and cost reduction.

Vianor outlets are being developed towards one-stop shops, where the customer can get tyres, tyre services and car services. At the end of the review period, Vianor had 212 (198) equity-owned stores in Finland, Sweden, Norway, USA, Switzerland, and Russia.

#### Retail network operations

Nokian Tyres' retail network includes Vianor's equity-owned chain, Vianor's partner chains, Nokian Tyres Authorized Dealers (NAD), and N-Tyre.

In Nokian Tyres' key markets, the total number of Vianor outlets increased by 26 stores during 2016 (equity +14, partner +12). At the end of the review period, the Vianor network comprised 1,501

More detailed information on flagging can be found at www. nokiantyres.com/company/investors/share/flagging-notifications/.

#### 7. Decisions made at the Annual General Meeting

On April 12, 2016, the Annual General Meeting of Nokian Tyres approved the financial statements for 2015 and discharged the Board of Directors and the President and CEO from liability.

#### 7.1 Dividend

The meeting decided that a dividend of EUR 1.50 per share be paid for the period ending on December 31, 2015. It was decided to pay the dividend to the shareholders included in the shareholder list maintained by Euroclear Finland Ltd on the record date of April 14, 2016. The dividend payment date was April 28, 2016.

#### 7.2. Members of the Board of Directors and Auditor

The meeting decided that the Board of Directors has seven members. The existing members Hille Korhonen, Tapio Kuula, Raimo Lind, Inka Mero and Petteri Walldén were elected to continue on the Board of Directors. Mr. Heikki Allonen and Ms. Veronica Lindholm were elected as new members of the Board.

Authorized public accountants KPMG Oy Ab continue as auditors.

7.3. Remuneration of the Members of the Board of Directors to remain unchanged

The meeting decided that the fee paid to the Chairman of the Board is EUR 80,000 per year, while the remuneration to the Board members is set at EUR 40,000 per year. The Members of the Board are also granted a fee of EUR 600 for every Board meeting and Committee meeting attended. Travel expenses will be compensated in accordance with the company's travel policy.

In accordance with current practice, 50% of the annual fee is paid in cash and 50% in company shares. It was decided that, in the period of April 13 to April 30, 2016, Nokian Tyres plc shares in the amount of EUR 40,000 be purchased on the stock exchange on behalf of the Chairman of the Board and shares in the amount of EUR 20,000 on behalf of each Board member. Therefore, the final remuneration paid to the Board members is tied to the company's share performance.

8. Chairman of the Board and Committees of the Board of Directors In the Board meeting on April 12, 2016, Petteri Walldén was elected chairman of the Board. The members of the Personnel and Remuneration Committee are Tapio Kuula (chairman), Hille Korhonen and Petteri Walldén. The members of the Audit Committee are Raimo Lind (chairman), Heikki Allonen and Inka Mero.

#### 9. Corporate social responsibility

Nokian Tyres published its Corporate Sustainability Report in April 2016. The Corporate Sustainability Report is available in Finnish and English on the company's website at www.nokiantyres.com/ company/sustainability/. The report is based on the international, widely adopted GRI G4 guidelines that divide sustainability into three main groups (financial, environmental, and social sustainability

and their different subgroups). Product safety and quality, as well as profitable growth, good HR management, and environmental issues are important for the development of sustainable business operations at Nokian Tyres. The report is the third GRI report from Nokian Tyres and, in the interests of quality assurance, it has now been externally assured for the first time.

Nokian Tyres plc is included in the OMX GES Sustainability Finland GI index. The index is designed to provide investors with a liquid, objective, and reliable benchmark for responsible investment. The benchmark index comprises the 40 leading Nasdaq Helsinki listed companies in terms of sustainability. The index criteria are based on international guidelines for environmental, social, and governance (ESG) issues. The index is calculated by Nasdaq in cooperation with GES Investment Services. Nokian Tyres is also included in the STOXX Global ESG Leaders indices, and is a constituent of the FTSE4Good Index.

The new biomass power plant in Nokia started its operations in April 2016. The plant reduces the use of fossil fuels and increases the use of local energy sources. Nokian Tyres is one of three partners. The total investment was EUR 42 million. According to initial calculations, the proportion of renewable energy sources could increase from the current 40% to approximately 70%, thereby significantly decreasing the Nokia factory's greenhouse gas emissions in the future.

#### Nokian Tyres received good grades for corporate responsibility

Nokian Tyres has received consistently good results in the global Dow Jones Sustainability Index. The evaluations review the corporate responsibility of the companies' operations from 18 different perspectives, including environmental affairs, human rights, accountability in the procurement chain, and safety in the workplace. In the 2016 evaluation, Nokian Tyres was graded above average for its sector in almost all of the 18 sub-areas. The evaluation is carried out by a Swiss company named RobecoSam.

#### 10. Nokian Tyres participating in UN Global Compact initiative

On January 11, 2016, Nokian Tyres announced that it has signed the United Nations' Global Compact initiative and is registered as a supporting member of the initiative as of December 23, 2015. Signing the initiative further strengthens the Group's commitment to profitable business and responsible methods.

## 11. Changes in operational structure and management team

On January 20, 2016, Nokian Tyres announced that it is going

to change its operational structure and responsibilities in the management team in order to strengthen the Company's further expansion and to improve distribution and the development and harmonization of processes.

Nokian Tyres' Management team as of April 1, 2016 Ari Lehtoranta, President and CEO Alexej von Bagh, Process Development Esa Eronen, Supply Operations Teppo Huovila, Quality, Sustainability and ICT Anna Hyvönen, Vianor and Partner Distribution Anne Leskelä, Finance & IR Ville Nurmi, Human Resources Andrei Pantioukhov, Executive Vice President, General Manager of Russian Operations Juha Pirhonen, Research and Development Manu Salmi, Heavy Tyres Pontus Stenberg, Sales Antti-Jussi Tähtinen, Marketing and Communications

# 12. Agreement on work time flexibility supports preserving the role of the Nokia factory

On January 29, 2016, Nokian Tyres announced that it has signed an agreement at the Nokia factory on work time flexibility in the coming years. The agreement improves flexibility in production and supports the competitiveness of the company. The agreement also supports maintaining a significant role for the Nokia factory in the future, in terms of both tyre production and the development of new products and production methods. During the agreement period, there will be no temporary or permanent layoffs due to financial or production-related reasons at the factory. The agreement is in effect until June 30, 2018.

# 13. Nokian Hakkapeliitta R2 winter tyre wins the Tire technology of the year 2016 award

On February 18, 2016, Nokian Tyres announced that it has won the esteemed Tire technology of the year 2016 award with the Nokian Hakkapeliitta R2 winter tyre.

#### 14. Nokian Tyres' incentive scheme to be updated

On February 24, 2016, Nokian Tyres announced that the Board of Directors of Nokian Tyres plc has decided to update the Group's incentive schemes. The update aims to clarify and improve the schemes, and to offer a competitive reward system for all personnel. Nokian Tyres has decided to launch a new share-based incentive scheme for a group of key personnel and a new profit-sharing bonus scheme for all other personnel. The incentive scheme has long focused on options, which are due to expire in 2019.

#### 15. Test tyre policies and processes at Nokian Tyres

On February 29, 2016, Nokian Tyres published a stock exchange release concerning the company's test tyre policies and processes. In the February 24 issue of the newspaper Kauppalehti, the company disclosed that its practices concerning tyre tests in the past have not always been in line with the sustainable approach of Nokian Tyres. Although the practices have substantially improved over the years, the company decided to launch an investigation into the matter in the autumn of 2015. Following the investigation, Nokian Tyres has ensured that any possible improper practices related to testing have been rectified. At the same time, the company has completed a review of its practices in order to increase openness and transparency in all activities. Learn more: www.nokiantyres.com/testtyre-faq/.

#### 16. Nokian Tyres introduced a new winter product for Central Europe

On March 21, 2016, Nokian Tyres announced that it is adding a new winter tyre to its product selection for varying Central European winter weather. The sporty new Nokian WR A4 winter tyre combines high-performance handling and reliable winter grip in an optimal way. The new Nokian WR A4 complements Nokian Tyres' Central European winter tyre selection, which is one the widest and most modern in the business.

**17. Nokian Tyres signed a EUR 100 million Revolving Credit Facility** On May 12, 2016, Nokian Tyres announced that it has signed a EUR 100 million Revolving Credit Facility for 5 years with an international bank syndicate. The Facility will be used for refinancing the existing EUR 100 million Multicurrency Revolving Credit Facility that was signed March 31, 2011 as well as for general corporate purposes.

#### 18. Nomination to Nokian Tyres' management team

On May 18, 2016, Nokian Tyres announced that Timo Tervolin has been appointed as Vice President, Strategy and Corporate Development and a member of Nokian Tyres' management team. His responsibilities include leading the company's strategy process and strategic programs, mergers and acquisitions, and monitoring the markets and competition. Timo Tervolin joined Nokian Tyres on June 6, 2016 and reports to the President and CEO.

#### 19. Nomination to Nokian Tyres' management team

On July 1, 2016, Nokian Tyres announced that Tarja Kaipio has been appointed as Vice President, Human Resources and member of the management team of Nokian Tyres plc as of August 8, 2016. She will be responsible for human resources functions and will report to the President and CEO.

More detailed information on management team can be found at www.nokiantyres.com/company/investors/corporategovernance/the-groups-management-team/.

#### 20. Nokian Tyres plc: Shares subscribed with option rights

On August 18, 2016, Nokian Tyres announced that after May 16, 2016, registered new shares, a total of 1,219,996 Nokian Tyres plc's shares have been subscribed with the 2010C option rights, a total of 40 shares with the 2013A option rights, and a total of 145 shares with the 2013B option rights. As a result of the share subscriptions, the number of Nokian Tyres plc shares increased to 135,911,395 shares.

#### 21. Nokian Tyres introduced new products

On September 9, 2016, Nokian Tyres introduced new products: the Nokian Hakka Blue 2 summer tyre, and Nokian Rockproof – a new, strong special tyre.

**22. Nokian Tyres constructs an all-new technology center in Spain** On September 20, 2016, Nokian Tyres announced that it will construct a new technology center in Spain, in Santa Cruz de la Zarza. This development center will be located south of Madrid, and it will span approximately 300 hectares. In the future, it will be especially used for testing summer tyres with high speed ratings as well as the characteristics of winter tyres. The final construction of the center will be finished in late 2019, but the first stage will be completed already during 2017. The value of the investment is approximately EUR 16 million. Construction is scheduled to begin in early 2017.

#### 23. Nokian Tyres' President and CEO to change

On September 27, 2016, Nokian Tyres announced that the President and CEO Ari Lehtoranta has resigned from his position in order to pursue new opportunities outside of Nokian Tyres. He continues in his present position until the end of 2016. The company's Board of Directors will start the recruitment process to select a new President and CEO for the company.

#### 24. Nokian Tyres plc: Managers' transactions

releases/2016/managementTransactions/.

# 25. Nokian Tyres' tax dispute proceeds. The Company is now finally in a position to appeal to the Administrative Court

On November 7, 2016, Nokian Tyres announced that The Board of Adjustment of the Finnish Tax Administration held in force the reassessment decision from the Tax Administration related to additional taxes of EUR 62.8 million, but decreased the amount of punitive tax increases and interests from EUR 31.3 million to EUR 26.4 million concerning the tax years 2007–2010. The decision of the Board of Adjustment was not unanimous. The Company has already recorded the total additional taxes of EUR 94.1 million from the tax years 2007–2010 in full in the financial statement and result of year 2015, based on the Tax Administrations decisions from December 2015 and January 2016. The Company considers the decision unfounded and will appeal against it by filing a claim with the Administrative Court. The ruling of The Board of Adjustment of the Finnish Tax Administration does not affect the Company's dividend policy.

# 26. Andrei Pantioukhov appointed interim President and CEO of Nokian Tyres plc

On December 21, 2016, Nokian Tyres announced that The Board of Directors of Nokian Tyres plc has appointed MBA Andrei Pantioukhov, 44, as the interim President and CEO starting January 1, 2017. Mr. Pantioukhov currently serves as Nokian Tyres' General Manager, Russian operations, and also continues in this role. He has been in the Company since 2004, a member of the management since 2009, and Executive Vice President since the beginning of 2016.

#### Corporate Governance Statement

A separate Corporate Governance Statement, including a Remuneration Statement, has been issued and published in connection with the publishing of the Report by the Board of Directors. The statements are available on pages 68–76 of this report as well as on the company's website at www.nokiantyres. com/company/investors/corporate-governance/.

#### **Risk management**

The group has adopted a risk management policy, approved by the Board of Directors, which supports the achievement of strategic goals and ensures continuity of business. The Group's risk management policy focuses on managing both the risks pertaining to business opportunities and the risks affecting the achievement of the Group's goals in the changing operating environment.

The risks are classified as strategic, operational, financial, and hazard risks. Strategic risks are related to customer relationships, competitors' actions, political risks, country risks, brand, R&D, and investments. Operational risks arise as a consequence of shortcomings or failures in the Company's internal processes, actions by its personnel or systems, or external events, such as legislative changes, unpredictable rulings by judicial systems or authorities, or changes in raw material prices. Financial risks (Note 29) are related to fluctuations in interest rate and currency markets, refinancing, and counterparty and receivables risks. Hazard risks may lead to injuries, property damage, production outages, environmental impacts, or liabilities to third parties.

The most significant risks related to Nokian Tyres' business are the country risks related to the Russian business environment, reputation risks, tax risks (especially in Finland), product and R&D risks, production outage risks, currency and receivable risks, risks related to Corporate Governance, and information security and data administration risks. Due to the company's product strategy, interruption risks that are related to marketing and logistics may especially have a significant impact on peak season sales. The risk analysis performed in 2016 paid special attention to risks within the area of corporate social responsibility, the most significant of which were the risks related to reputation and product quality.

The risk management process aims to identify and evaluate the risks, and to plan and implement the practical measures for each risk. Among other things, such measures may include avoiding the

risk, reducing it in different ways, or transferring the risk through insurance or agreements. Control functions and actions are control or back-up procedures applied to reduce risks and ensure the completion of risk management measures.

Risk management is not allocated to a separate organization; its tasks follow the general distribution of responsibilities adopted elsewhere in the organization and its business activities. The company's Board of Directors discusses the most significant risks annually in connection with the strategic process.

#### Risks, uncertainty, and disputes in the near future

The global recovery continues. As we enter 2017, all regions are showing positive development. In 2017 and 2018, the growth rate is estimated to be slightly higher than in previous years. It is estimated that the global GDP will grow by 3.3% in 2017 (3.1% in 2016). The GDP growth estimates for the Nordic countries are from +1.0% to +2.3%, for Europe (including the Nordics) +1.3%, and for the US +2.1%. In Russia, the GDP is estimated to grow by approximately 1%. Possible effects related to US presidential election will be seen in coming months. An escalation of the Ukraine crisis could cause serious disruption, additional trade barriers, and a slowdown of economic development in Russia and Finland. Brexit as such has practically no effect on Nokian Tyres' business.

In 2016, the company's receivables increased compared to the previous year due to pre-summer tyre sales in Russia. The tyre inventories are at the planned level. The company follows the development of NWC very closely. At the end of the review period, Russian trade receivables accounted for 37% (31%) of the Group's total trade receivables. Russian receivable risk compared to 2015 is clearly lower. The collection rate of 2016 current receivables in Russia was 100%.

Approximately 40% of the Group's net sales in 2017 are estimated to be generated from Euro-denominated sales. The most important sales currencies in addition to the euro are the Russian ruble, the Swedish and Norwegian krona, and the US and Canadian dollar.

Nokian Tyres' other risks and uncertainty factors relate to the challenging pricing environment for tyres. As raw material prices rise, maintaining profitability will depend on the company's ability to raise tyre prices in line with increasing raw material costs.

The company announced in February 2016 that its practices concerning tyre tests in the past have not always been in line with the sustainable approach of Nokian Tyres. The company emphasizes that its tyres have always been safe and that safety has never been compromised on. There are no court cases in process related to the matter.

More detailed information relating to the risks can be found at www.nokiantyres.com/annual-reports, Financial review 2016, on pages 43–49 and 72–73.

#### Tax disputes

Nokian Tyres Group has pending disputes with the Finnish Tax Administration. Those are described in the section "Tax rate" earlier in this report.

#### Personnel and safety

Nokian Tyres is an internationally growing company whose operations, profitability, and strategy implementation are built on the strong Hakkapeliitta values: entrepreneurship, innovation, and working together. These values and the strong Hakkapeliitta culture are maintained and promoted by means of good leadership and by supporting innovations and initiatives, for example.

Personnel development is supported by means of internal job rotation, on-the-job learning and training solutions. The Hakkapeliitta eAcademy training portal offers a group-wide, flexible online learning environment. Personal People Reviews play a key role in personnel development. The People Reviews focus on performance leadership, goals, and personal improvement.

Close cooperation with occupational healthcare and coordinated improvement activities allow for preventive management of worker absence. The management of working ability is a part of everyday supervisor work. In 2016, the positive development in the decline of work absences continued. Well-being at work is supported through diverse sports and club activities and personnel events.

The development of supervisor work and leadership are the most important. Nokian Tyres develops supervisor work by using the 360° supervisor evaluation model and the Hakkapeliitta Leader simulation game. The implementation of the new supervisor work principles also continued in 2016.

The personnel satisfaction survey actively provides the company with feedback regarding the development targets. Nearly 90% of the personnel responded to the survey in 2016. The identified development activities are particularly focused on developing supervisor work and occupational safety.

2016 continued the positive development regarding the number of occupational accidents, and the number of accidents fell by nearly 30% in the Group. The reporting of near misses and safety observations also improved further. Emphasis was laid on occupational safety training, communication, development of working practices, and the use of protective equipment. The actions aiming at ensuring a safe working environment are ongoing; the further improvement of the safety of production equipment and tools is an example of this. Zero accidents is the long-term goal for the company.

Committed, competent personnel, and a safe working environment will ensure continued business growth in the future.

#### Environment and Responsibility

At Nokian Tyres, the management of environmental and chemical safety and sustainability work are assigned to the Quality, Sustainability, and ICT department. The goals include accident prevention in all areas of operation, uninterrupted production, sustainable operations, and good corporate citizenship. When developing our operations, we apply best practices and advanced solutions while taking into account both economic factors and human values. Nokian Tyres promotes safety through risk management, continuous improvement of processes, and new investments.

Our factories in Nokia and Vsevolozhsk as well as our Swedish sales company Nokian Däck are certified to the ISO 14001 environmental management system standard and the ISO 9001 quality management system standard. The company's factories received the automotive industry's ISO/TS 16949 approval in 2013.

The long-term development of sustainability and environmental aspects make Nokian Tyres a pioneer of the tyre industry. Our products feature advanced solutions that improve the rolling resistance of tyres (thereby reducing fuel consumption and CO<sub>2</sub> emissions) or soil compaction in farming and forestry. The company was also the first tyre manufacturer in the world to discontinue the use of high aromatic (HA) oils in rubber compounds (already in 2005); its example accelerated the use of purified, low aromatic oils in tyre manufacturing in Europe. In 2010, the sales and import of all tyres containing HA oils were banned within the EU.

The outset for our environmental protection is the lifecycle approach: we take responsibility for the environmental effects of our products throughout their lifespan. Nokian Tyres strongly focuses on the eco-friendliness of its products and processes. The company is also a shareholder in Finnish Tyre Recycling Ltd, a company for the collection and utilization of used tyres in Finland. In Finland, the recycling rate for decommissioned tyres is already approximately 97%. The recycling rate varies by country, and approximately half of the tyres that Nokian Tyres sells internationally are recycled.

In total, the environmental impact of our production was reduced compared to the previous year. A new incineration plant that reduces VOC emissions was commissioned in Nokia in February 2015. VOC emissions were down by approximately 10% in 2016 when compared to the previous year, but are still behind the level required by the EC directive. In 2016, the Group especially focused on improving energy efficiency, developing the environmental management system, and large-scale sustainability work. The environmental risk assessments were also updated in 2016. Our production facilities continued to focus on the recycling of waste; their utilization rate was 100% at our Nokia factory and 85% at our Vsevolozhsk factory. The new biopower plant was started in Nokia in April 2016. The plant reduces the use of fossil fuels and increases the use of local energy sources.

For more information concerning the management of environmental matters and sustainability, please see the Corporate Sustainability Report published in the spring of 2016. The report is available at www.nokiantyres.com/company/sustainability/.

The Corporate Sustainability Report for 2016 will be published in March 2017.

#### Outlook for 2017

The global recovery continues. As we enter 2017, all regions are showing positive development. In 2017 and 2018, the rate of growth is estimated to be slightly higher than in previous years. It is estimated that the global GDP will grow by 3.3% in 2017 (3.1% in 2016). The GDP growth estimates for the Nordic countries are from +1.0% to +2.3%, for Europe (including the Nordics) +1.3%, and for the US +2.1%. In Russia, the GDP is estimated to grow by approximately 1%.

In 2017, market demand for replacement car tyres is expected to show growth in Central Europe, North America, and the Nordic countries. In Russia, the market is expected to return to growth, but the pace of the recovery is likely to be quite moderate.

The company's replacement tyre market position (sell-in)

is expected to improve in 2017 in all key markets. In Russia, the company expects to retain and further strengthen its market leader position in the A+B segments in 2017.

The raw material cost is estimated to increase by approximately 15–20% in 2017 versus 2016. Rapidly growing raw materials costs will force the global tyre industry to increase prices in 2017.

Nokian Tyres retains competitive advantage by manufacturing in Russia. Approximately 70% of the Russian production was exported in 2016, and the margin between production costs in rubles and export sales in euros has improved along with the devaluation of the ruble. Nokian Tyres will invest in 2017 in the expansion of the Vsevolozhsk factory capacity and further improvements in the automation of production. As a result of these investments, the total annual nominal capacity of the Vsevolozhsk factory will increase from the current 15.5 million tyres to 17 million tyres.

Demand in Nokian Heavy Tyres' core products is estimated to remain healthy. The raw material cost increases cause pressure on pricing. Nokian Heavy Tyres' production capacity and delivery capability have improved and, therefore, the sales and EBIT are expected to increase slightly year-over-year.

Vianor (equity-owned) is expected to increase sales, to develop the service business further and to improve operating result in the full year 2017. Vianor (partners) and other Nokian Tyres' partner channels, such as Nokian Tyres Authorized Dealers (NAD) and the N-Tyre network, will continue to expand.

Nokian Tyres' budget for total investments in 2017 is EUR 190 million (105.6), of which EUR 83 million will be invested in Russia. EUR 78 million is planned to invest in Nokia factory and global development projects and the balance goes to Heavy Tyres, sales companies, and Vianor chain.

The operative management has presented the initial plans regarding the third factory to the Board of Directors in December 2016. The matter is under further investigation. The decision is to be made during spring 2017.

#### Financial guidance

In 2017, with the current exchange rates, net sales and operating profit are expected to grow by at least 5% compared to 2016.

The proposal for the use of profits by the Board of Directors

The distributable funds in the Parent company total EUR 608.6 million. The Board of Directors proposes to the Annual General Meeting that the distributable funds be used as follows:

A dividend of	1.53 EUR/share
be paid out, totaling	EUR 207.9 million
retained in equity	EUR 400.7 million
Total	EUR 608.6 million

No material changes have taken place in the financial position of the company since the end of the financial year. The liquidity of the company is good, and the proposed distribution of profits does not compromise the financial standing of the company, as perceived by the Board of Directors.

<sup>1)</sup> Financial expenses in 2015 have been adjusted with EUR 20.2 million reversal of interests on back taxes as the tax reassessment decisions on years 2007–2010 were annulled and returned to the Tax Administration for reprocessing. Additionally financial expenses in 2015 contain EUR 19.2 million expensed punitive interest for reprocessed tax reassessment decisions on years 2007–2010. These decrease financial expenses in 2015 with EUR 1.0 million net.

<sup>2)</sup> Tax expense in 2016 has been adjusted with EUR 4.9 million according to the decision of the Board of Adjustment. Previously in 2015 tax expense has been adjusted with EUR 80.1 million as the tax reassessment decisions on years 2007–2010 were annulled and returned to the Tax Administration for reprocessing. Additionally tax expense in 2015 contains EUR 74.9 million expensed additional taxes with punitive tax increases for reprocessed tax reassessment decisions on years 2007–2010. These decrease tax expense in 2015 with EUR 5.2 million net.

<sup>3)</sup> Otherwise tax expense in the consolidated income statement is based on the taxable result for the period.

<sup>4)</sup> Since the beginning of year 2014 the Group has internal loans that are recognised as net investments in foreign operations in accordance with IAS 21 "The Effects of Changes in Foreign Exchange Rates". The impact in 2016 is EUR -1.3 million and 2015 EUR -13.7 million.

# Accounting policies for the consolidated financial statements

#### **Basic information**

Nokian Tyres Plc is a Finnish public corporation founded in accordance with the Finnish laws and domiciled in the city of Nokia. The shares of Nokian Tyres Plc have been quoted on the Nasdaq Helsinki Oy since 1995.

Nokian Tyres Group develops and manufactures summer and winter tyres for passenger cars and vans, and special tyres for heavy machinery. The Group also manufactures retreading materials and retreads tyres. The largest and most extensive tyre retail chain in the Nordic countries, Vianor, is also a part of the Group. The core business areas in the Group are Passenger Car Tyres, Heavy Tyres and Vianor.

#### **Basis of preparation**

The consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards and in compliance with the IAS and IFRS standards as well as the SIC and IFRIC interpretations in force on 31 December 2016. International Financial Reporting Standards refer to the standards and related interpretations to be applied within the Community as provided in the Finnish Accounting Act and the provisions issued on the basis of this Act, and in accordance with the procedure laid down in Regulation (EC) No 1606/2002 of the European Parliament and of the Council on the application of international accounting standards. Notes to the consolidated financial statements also comply with the Finnish accounting and corporate laws.

The information in the financial statements is presented in millions of euro and is prepared under the historical cost convention except as disclosed in the following accounting policies.

#### **Revised standards and interpretations**

The Group has adopted new and revised standards and interpretations enforced in the EU during the period, the changes from annual improvements and amendment to IAS 1 Presentation of Financial Statements: Disclosure Initiative being the most substantial ones. The changes had no material impact on the result or the financial position and only limited impact on the other information presented in the financial statements of the Group for the period.

IFRS are under constant development. Other new standards, interpretations or their amendments have also been published

but they are not yet in force and the Group will not apply them before they are enforced. The Group will adopt each standard and interpretation on the effective date or from the beginning of the following financial period.

The most significant future changes will have the following impact: IFRS 15 – *Revenue from Contracts with Customers* 

IFRS 15 Revenue from Contracts with Customers will be effective for financial years beginning on or after 1 January 2018. The new standard replaces current IAS 18 and IAS 11 -standards and related interpretations. In IFRS 15 a five-step model is applied to determine when to recognise revenue, and at what amount. Revenue is recognised when (or as) a company transfers control of goods or services to a customer either over time or at a point in time. The standard introduces also extensive new disclosure requirements. The impacts of IFRS 15 on Nokian Tyres' consolidated financial statements have been assessed as follows:

Key concepts of IFRS 15 have been analysed for different revenue streams and based on that a preliminary survey has been conducted on the standard and its differences to the current reporting practices, and possible needs for adjustments. The Group business activity primarily comprises of the trade in consumer discretionary with conventional customer contracts, payment and other terms, involving traditional delivery chains in diverse lengths. Rebates and other variable considerations are tracked while defining the transaction price. Sale of services and goods form separate performance obligations. For the time being services generate only a minor share of the net sales.

According to the performed surveys the expected impacts in the Group are limited with the current business operations. Any possible adjustment needs to contracts and thresholds for revenue recognition are assessed to be minimal. In the future as the share of the service business and complexity within is expected to increase the Group will emphasize system development and contract management in relation to revenue recognition. The renewed instruction on agent/principal is assessed not to change present handling of the commissions payable to distributors.

Timeline for implementing and the transition options to be used are as follows: the Group intends to implement the standard fully retrospectively with no special relieves applied.

At the same time amendments to IFRS 15 - Clarifications to IFRS 15 Revenue from Contracts with Customers (not yet endorsed for use by the European Union as of 31 December 2016) are expected to be effective. The amendments include clarifications and further examples on how to apply certain aspects of the five-step recognition model. The impact assessment of the clarifications has been included in the IFRS 15 impact assessment described above.

• IFRS 9 – *Financial Instruments and subsequent amendments* The Group is still assessing the impacts of the standard on the future financial statements of the Group.

#### IFRS 16 - Leases

The Group is assessing the impacts of the standard, and tentatively estimates that the new standard will have some impact on the future financial statements of the Group.

The Group estimates that the other published improvements or amendments will not have a material impact on the result, financial position or other disclosures of the future financial statements of the Group.

#### Use of estimates

The preparation of financial statements in compliance with IFRS requires the use of estimates and assumptions that affect the amount of assets and liabilities shown in the statement of financial position at the time of preparation, the presentation of contingent assets and liabilities in the financial statements, and the amount of revenues and expenses during the reporting period. Estimates have been used e.g. to determine the amount of items reported in the financial statements, to measure assets, to test goodwill and other assets for impairment, and for the future use of deferred tax assets. Since the estimates are based on the best current assessments of the management, the final figures may deviate from those used in the financial statements.

Key sources of estimation uncertainty relate to the country risk in the Russian business environment. The uncertainty of the Russian economy is due to the development of oil price, interest rate and investments, and sanctions that followed the Ukraine crisis. However, the growth in Russia is expected to turn positive in 2017. Possible effects related to US presidential election will be seen in coming months. An escalation of the Ukraine crisis could cause serious disruption, additional trade barriers, and a slowdown of economic development in Russia and Finland. Brexit as such has practically no effect on Nokian Tyres' business. Other sources of uncertainty relate to the challenging pricing environment of tyres in line with price development of raw materials.

#### Principles of consolidation

The consolidated financial statements include the financial statements of the parent company Nokian Tyres Plc as well as all subsidiaries in which the Parent company owns, directly or indirectly, more than 50% of the voting rights or in which the Parent company otherwise exercises control. Control exists when the Group through participation in an investee is exposed or entitled to its variable returns and is able to affect the returns through exercising power over the investee.

Associated companies in which the Group has 20 to 50% of the voting rights and in which it exercises significant influence but not control, have been consolidated using the equity method. If the Group's share of the associated company's losses exceeds its holding in the associated company, the carrying amount will be recorded in the balance sheet at nil value and losses in excess of that value will be ignored unless the Group has obligations towards the associated companies. Investments in associates include the carrying amount of the investment in an associated company according to the equity method, and possible other non-current investments in the associated company, which are, in substance, part of a net investment in the associated company.

A joint arrangement refers to a contractual undertaking, in which the Group has agreed to share control over material financial and business principles with one or more parties. A joint arrangement is either a joint operation or a joint venture. In a joint venture the Group holds rights to the net assets of the arrangement whereas in a joint operation the Group holds rights to the assets and carries obligations on the liabilities of the arrangement. Nokianvirran Energia Oy is a joint operation as the parties share control according to a specific Mankalaprinciple where the company is not intended to make profit while the parties have agreed to utilize the total output. Nokianvirran Energia Oy is accounted for as a Group company using the proportionate consolidation method on each row according to the 32.3% shareholding.

Acquired subsidiaries have been consolidated using the acquisition method, according to which the acquired company's assets and liabilities are measured at fair value on the date of acquisition. The cost of goodwill is the excess of the cost of the business combination over the acquirer's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities. Acquisition-related costs, except for the costs to issue debt or equity securities, are expensed. Possible contingent consideration is measured at fair value on the date of acquisition and is classified as a liability. Contingent consideration classified as a liability is measured at fair value on each reporting date and the following gain or loss is recognized in the income statement. Under IFRS goodwill is not amortised but is tested annually for impairment. Subsidiaries acquired during the financial year have been consolidated from the acquisition date and those divested until the divestment date.

All internal transactions, receivables, liabilities and unrealised margins, as well as distribution of profits within the Group, are eliminated while preparing the consolidated financial statements.

Profit for the period is attributed to the owners of the Parent company and to the non-controlling interests. Moreover, noncontrolling interests are disclosed as a separate item under the consolidated equity.

#### Foreign currency items

Transactions in foreign currencies have been recorded at the exchange rates effective on the transaction date. In the statement of financial position all items in foreign currencies unsettled on the reporting date are measured at the European Central Bank's closing exchange rate. The quotations of the relevant central bank are applied if the European Central Bank does not quote a specific currency. Foreign exchange gains and losses related to business operations and financing activities have been recorded under financial income and expenses.

#### Foreign Group companies

The statements of financial position of foreign subsidiaries have been translated into euro using the European Central Bank's closing rates, and the income statements using the average rate for the period. Translation differences arising from the subsidiaries' income statements and statements of financial position have been recorded under other comprehensive income and in the translation reserve within equity as a separate item. Translation differences arising from the elimination of foreign company acquisition cost and from the profits and losses incurred after the acquisition have been recorded under other comprehensive income as a separate item and in the translation reserve within equity. If settlement of a loan to a foreign operation is neither planned nor likely to occur in the foreseeable future, then the loan is considered as a net investment in a foreign operation and the foreign exchange gains and losses arising on the item are recognized in other comprehensive income, and accumulated in the translation reserve within equity.

When a subsidiary is divested fully or in part, the related

accumulated translation differences are brought from equity to the income statement and entered as a gain or loss on the sale.

#### Cash and cash equivalents

Cash and cash equivalents include cash in hand and other current investments, such as commercial papers and bank deposits.

#### **Financial assets**

Financial assets have been classified as follows: financial assets at fair value through profit and loss, available-for-sale financial assets, and loans and receivables.

Financial assets at fair value through profit and loss include liquid current investments, such as commercial papers, and derivative assets to which hedge accounting is not applied.

Loans and receivables include non-derivative assets with fixed or determinable payments that are not quoted in an active market. In the Group, this category includes trade receivables and other loan receivables resulting from commercial activities and cash funds and other current investments, such as bank deposits. Loans and other receivables have been measured at amortised cost less any writedowns, and in the statement of financial position they are included in current or non-current receivables, depending on their maturity.

Available-for-sale financial assets include quoted and unquoted shares. Quoted shares are measured at fair value, which is the share bid price on the reporting date. Changes in fair value are recognised in other comprehensive income until the financial asset is sold or divested, at which time the changes in fair value are transferred to profit and loss. Impairments are recorded in profit and loss. Unquoted shares are measured at cost if the fair value cannot be reliably determined.

#### **Financial liabilities**

Financial liabilities have been classified as follows: financial liabilities at fair value through profit and loss and financial liabilities measured at amortised cost.

Financial liabilities at fair value through profit and loss include derivative liabilities to which hedge accounting is not applied.

In the Group, loans are measured at fair value on the basis of the consideration received in connection with the original recognition, after which the loans are recorded at amortised cost using the effective interest rate method. Bank overdrafts are included in current liabilities in the statement of financial position.

#### Derivative instruments and hedge accounting

The Group holds derivative financial instruments to hedge its interest rate, foreign currency and electricity price risk exposures. Derivatives are recognised initially at fair value. Subsequent to initial recognition, derivatives are measured at fair value and fair values are presented in the statement of financial position under current receivables or liabilities. Publicly quoted market prices and rates, as well as generally used measurement models, are used to define the fair value of derivatives. The information and assumptions used in the measurement models are based on verifiable market prices and values.

Hedge accounting is not applied to the derivatives used to hedge cash flows from the Group's business operations in foreign currencies. Changes in fair value of derivatives to which hedge accounting is not applied are recognised immediately in profit and loss as financing items.

The Group applies IAS 39 compliant hedge accounting to hedges of the exposure to variability in cash flows that is attributable to an interest rate risk associated with recognised non-current liabilities and to hedges to manage electricity price risk. To meet all the hedge accounting criteria, at the inception of these hedges the Group designates and documents the hedging relationship between the hedged item and the hedging instrument including effectiveness measurement methods and the hedging strategy in accordance with the Group's risk management policy. The Group aims to choose hedging instruments that create no ineffective portion.

Hedge accounting is applied in cash flow hedging in connection with interest rate swaps, by which floating rate liabilities have been changed to fixed rate liabilities. The effective portion of the change in the fair value of the interest rate swaps is recognised in other comprehensive income and any remaining ineffective portion recognised in the income statement. The gains and losses recognised in other comprehensive income are transferred to financial items in the income statement when the hedged item affects the income statement.

The Group applies hedge accounting to certain currency derivatives and currency loans. Changes in fair value of the currency derivatives meeting the hedge accounting criteria are recognised in other comprehensive income except for the potential ineffective portion and the time value of currency options, which are recognised in the income statement. Correspondingly, the foreign exchange gains and losses on foreign currency loans taken out for hedging purposes are recorded under other comprehensive income and interest expenses under financial items in the income statement.

The Group's forecast electricity purchases in Finland are hedged with electricity derivatives to which hedge accounting is applied. The effective portion of the fair value change of the electricity derivatives is recognised in other comprehensive income and the ineffective portion in the income statement under other operating income or expenses. The gains and losses recognised in other comprehensive income are transferred to cost of sales in the income statement when the hedged item affects the income statement.

#### Income recognition

Income from the sale of products is recognised when the significant risks and rewards connected with ownership of the goods, as well as the right of possession and effective control, have been transferred to the buyer and payment is probable. This is also the case when a customer separately requests that the assignment of goods be deferred. Revenue from services is recognised once the services have been rendered. Generally, sales are recognised upon delivery in accordance with the contractual terms and conditions. To calculate the net sales, sales revenue is adjusted with indirect taxes and discounts.

#### Research and development costs

Research costs are recorded as other operating expenses for the financial period in which they incurred. Development costs are capitalised once certain criteria associated with commercial and technical feasibility have been met. Capitalised development costs primarily comprising materials, supplies and direct labour costs, as well as related overheads, are amortised systematically over their expected useful life. The amortisation period is 3–5 years.

#### Government grants

Grants received from governments or other parties are recognised adjustments to related expenses in the income statement for the period. Grants received for the acquisition of property, plant and equipment reduce the acquisition cost.

#### **Operating profit**

The Group has defined operating profit as follows: operating profit is the net sum of net sales plus other operating income less cost of sales, selling and marketing expenses, administration expenses and other operating expenses. Operating profit does not include exchange rate gains or losses.

#### **Borrowing costs**

The borrowing costs of items included in property, plant and equipment or other intangible assets, and requiring a substantial construction period, are capitalised for the period needed to produce the investment for the intended purpose. Other borrowing costs are recognised as expenses for the period in which they incurred.

#### Income taxes

The tax expense of the Group include taxes based on the profit or loss for the period or dividend distribution of the Group companies, as well as change in deferred tax, and adjustment of taxes from prior periods. The penalty interests on those are recorded as financial expenses. The tax impact of items recorded directly in equity or other comprehensive income is correspondingly recognised directly in equity or in other comprehensive income. The share of associated companies' profit or loss is shown in the income statement calculated from the net result, and thereby includes the impact of taxes. Deferred taxes are measured with tax rates enacted by the reporting date, to reflect the net tax effects of all temporary differences between the financial reporting and tax bases of assets and liabilities. The most significant temporary differences arise from the amortisation and depreciation differences of intangible assets and property, plant and equipment, measuring the net assets of business combinations at fair value, measuring available-for-sale financial assets and hedging instruments at fair value, internal profits in inventory and other provisions, appropriations and unused tax losses. Deferred tax liabilities will also be recognised from the subsidiaries' non-distributed retained earnings if profit distribution is likely and will result in tax consequences. Deferred tax assets relating to the temporary differences is recognised to the extent that it is probable that future taxable profits will be available against which the asset can be utilised before expiration. Deferred taxes are not recorded on goodwill that is not deductible for tax purposes.

#### Earnings per share

Basic earnings per share are calculated by dividing the profit or loss attributable to the equity holders of the parent for the period by the weighted average number of shares outstanding during the period. The average number of treasury shares has been deducted from the number of shares outstanding.

For the calculation of the diluted earnings per share the diluting impact of all potentially diluting share conversions have been taken into account. The Group has share options and previously also convertible bonds as diluting instruments. The dilution of share options has been computed using the treasury stock method. In dilution, the denominator includes the shares obtained through the assumed conversion of the options, and the repurchase of treasury shares at the average market price during the period with the funds generated by the conversion. The assumed conversion of options is not taken into account for the calculation of earnings per share if the effective share subscription price defined for the options exceeds the average market price for the period. The convertible bonds are assumed to have been traded for company shares after the issue.

#### Property, plant and equipment

The values of property, plant and equipment acquired by the Group companies are based on their costs. The assets of acquired subsidiaries are measured at fair value on the date of acquisition. Depreciation is calculated on a straight-line basis from the original acquisition cost, based on the expected useful life. Depreciation includes any impairment losses.

In the statement of financial position, property, plant and equipment are stated at cost less accumulated depreciation and impairment losses. The borrowing costs of items included in property, plant and equipment, and requiring a substantial construction period, are capitalised for the period needed to produce the investment for the intended purpose. Other borrowing costs are recognised as expenses in the period they incurred.

Depreciation is based on the following expected useful lives:				
Buildings	20–40 years			
Machinery and equipment	4–20 years			
Other tangible assets	10-40 years			
Land is not depreciated.				

The expected useful lives are reviewed at each reporting date, and if they differ materially from previous estimates, the depreciation schedules are changed accordingly.

Regular maintenance and repair costs are recognised as expenses for period. Expenses incurred from significant modernisation or improvement projects are recorded in the statement of financial position if the company gains future economic benefits in excess of the originally assessed standard of performance of the existing asset. Modernisation and improvement projects are depreciated on a straight-line basis over their useful lives. Gains and losses from the divestment and disposal of property, plant and equipment are determined as the difference of the net disposal proceeds and the carrying amounts. Sales gains and losses are included in operating profit in the income statement.

#### Goodwill and other intangible assets

Goodwill arising from business combinations is recognised as the amount by which the aggregate of the transferred consideration, any non-controlling interest in the acquiree and any previously held interest exceeds the fair value of the net assets acquired. Goodwill is not amortised but is tested for impairment annually and whenever an indication of possible impairment exists.

Other intangible assets include customer relationships, capitalised development costs, patents, copyrights, licences and software. Intangible rights acquired in business combinations are measured at fair value and amortised on a straight-line basis over their useful lives. Other intangible assets are measured at cost and amortised on a straight-line basis over their useful lives. An intangible asset is only recorded in the statement of financial position if it is probable that the expected future economic benefits that are attributable to the asset will flow to the company and cost can be measured reliably. Subsequent expenses related to the assets are only recorded in the statement of financial position if the company gains future economic benefits in excess of the originally assessed standard of performance of the existing asset; otherwise, costs are recognised as expenses at the time of occurrence.

In the statement of financial position, intangible assets are recorded at cost less accumulated amortisation and impairment losses. The borrowing costs of items included in other intangible assets, and requiring a substantial construction period, are capitalised for the period needed to produce the investment for the intended purpose. Other borrowing costs are recognised as expenses in the period they incurred. The amortisation schedule for intangible assets is 3-10 years.

#### Impairment

At reporting date the Group shall assess whether there is any indication that an asset may be impaired. If any such indication exists, the recoverable amount of the asset in question is estimated. Goodwill and intangible assets not yet available for use are tested for impairment at least annually. To assess impairment, the Group's assets are allocated to cash-generating units on the smallest group that is largely independent of other units and the cash flows of which can be separated. The recoverable amount is the higher of fair value of the asset less costs to sell and a value in use. As a rule, value in use is based on the discounted future cash flows that the corresponding asset or the cash-generating unit can derive. The impairment recognised in the income statement is the amount by which the carrying amount of the asset exceeds the corresponding recoverable amount, and in the statement of financial position it is allocated first to reduce the carrying amount of any goodwill of the unit and then pro rata against the other assets. An impairment loss recognised in prior periods will be reversed if the estimates used to determine the recoverable amount change. However, a reversal of impairment loss shall not exceed the carrying amount that would have been determined in the statement of financial position without the recognised impairment loss in prior periods. Impairment loss on goodwill is not reversed under any circumstances.

#### Leasing agreements

Leasing agreements are classified as either finance leases or operating leases. Leasing agreements by which the risks and benefits associated with the ownership of an asset are substantially transferred to the lessee company represent finance leases.

#### The Group as a lessee

Assets held under finance leases, less depreciation, are included in intangible assets and property, plant and equipment and the obligations resulting from the lease in financial liabilities. Lease payments resulting from finance leases are apportioned between finance charges and the reduction of the outstanding liability. Charges paid under operating leases are recognised as expenses in the income statement.

Finance leases have been recorded in the statement of financial position in the amount equalling the fair value of the leased property or, if lower, present value of minimum lease payments, each determined at the inception of the lease. The assets are depreciated consistent with assets that are owned and any impairment losses are recorded. Depreciation is carried out over the useful life or a shorter lease term.

#### The Group as a lessor

Assets held under finance leases have been recorded in the statement of financial position as receivables at amount equal to the net investment in the lease. Lease income resulting from finance leases are recorded in the income statement with constant periodic rate of return on the lessor's net investment in the finance lease. Assets held under leases other than finance leases are included in intangible assets and property, plant and equipment in the statement of financial position. These are depreciated over their useful lives, consistent with assets in the company's own use. Lease income is recorded in the income statement on a straight-line basis over the lease term.

#### Inventories

Inventories are measured at the lower of cost or the net realisable value. Cost is primarily determined in accordance with standard cost accounting, which corresponds to the cost calculated in accordance with the FIFO (first-in, first-out) method. The cost of finished goods and work in progress includes raw material purchase costs, direct manufacturing wages, other direct manufacturing costs, and a share of production overheads, borrowing costs excluded. Net realisable value is the estimated sales price in ordinary activities less the costs associated with the completion of the product and the estimated necessary costs incurred to make the sale of the product.

#### Trade receivables

Trade receivables in the statement of financial position are carried at the original invoice value (and those in foreign currencies are measured at the closing rate of the European Central Bank) less doubtful receivables and credits for returned goods. Doubtful receivables are based on the case-by-case assessment of outstanding trade receivables as well as on historical experience of the portion the Group will not receive under the original terms and conditions.

Actual and estimated credit losses are recorded as other operating expenses in the income statement.

#### Dividend

The dividend proposed by the Board of Directors at the Annual General Meeting has not been recognised in the financial statements. Dividends are only accounted for on the basis of the decision of the Annual General Meeting.

#### Equity

The acquisition cost of treasury shares repurchased by the Group is recognised as a deduction in equity. The consideration received for the treasury shares when sold, net of transaction costs and tax, is included in equity.

#### Provisions

A provision is entered into the statement of financial position if the Group has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions may be related to the reorganisation of activities, unprofitable agreements, environmental obligations, trials and tax risks. Warranty provisions include the cost of product replacement during the warranty period. Provisions constitute best estimates at the balance sheet date and are based on past experience of the level of warranty expenses.

#### Contingent liabilities and contingent assets

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by realization of an uncertain future event not totally controllable by the Group. A contingent liability is also defined as a present obligation that probably will not require the settlement of the obligation, or cannot be measured reliably. A contingent liability is disclosed in the notes to the consolidated financial statements.

Correspondingly, a contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by realization of an uncertain future event not totally controllable by the Group. In case an inflow of economic benefits is probable, a contingent asset is disclosed in the notes to the consolidated financial statements.

#### **Employee benefits**

#### Pension liabilities

The Group companies have several pension schemes in different countries based on local conditions and practices. These pension arrangements are classified as either defined contribution plans or defined benefit plans. Payments for defined contribution plans are recorded as expenses in the income statement for the period they relate to. All of the material pension arrangements in the Group are defined contribution plans.

#### Share-based payments

Share options are measured at fair value on the grant date and expensed on a straight-line basis over the vesting period. Corresponding amounts are recorded as an increase in equity. The expense determined on the grant date is based on the Group's estimate of the number of options that are assumed to vest at the end of the vesting period. The Black & Scholes' option pricing model is used to determine the fair value of options. The impact of non-market-based conditions (such as profitability and a certain profit growth target) is not included in the fair value of the option; instead, it is taken into account in the final number of options that are assumed to vest at the end of the vesting period. The Group updates the assumption of the final number on each reporting date. Changes in the estimates are recognised in the income statement.

When options are exercised, the payments received on the basis of share subscriptions (adjusted with any transaction costs) are recorded in paid-up unrestricted equity reserve (2010 and 2013 options).

Performance shares are measured at fair value on the grant date and are expensed on a straight-line basis over the vesting period. The equity-settled amounts are recorded as an increase in equity. The expense determined on the grant date is based on the Group's estimate of the number of shares that are assumed to vest at the end of the vesting period. The impact of non-market-based conditions (such as net sales and operating profit) is not included in the fair value of the share; instead, it is taken into account in the final number of shares that are assumed to vest at the end of the vesting period. The Group updates the assumption of the final number on each reporting date. The fair values of cash-settled amounts are similarly updated on each reporting date and recorded as a liability. Changes in the estimates of both the equity and cash-settled amounts are recognised in the income statement.

#### Other option and incentive schemes

No other option and incentive schemes were in use during 2016.

#### Non-current assets held for sale and discontinued operations

A non-current asset, or a group of disposable items, is classified as being held for sale if the amount corresponding to its carrying amount will primarily be generated from the sale of the asset instead of being generated from the continued use of the asset. Non-current assets held for sale, and assets related to discontinued operations, are measured at their carrying amounts, or the lower fair value less costs to sell, if the amount corresponding to its carrying amount will primarily be generated from the sale of the asset and if the sales transaction is most likely to take place.

A discontinued operation is a part of the entity that has been divested or classified as being held for sale and represents a separate core business area or a geographic operating area.

The Group's financial statements for 2016 and 2015 do not include any non-current assets held for sale or any discontinued operations.

### 1. Segment information

The Group's management team is the chief operating decision maker. The segment information is presented in respect of the business and geographical segments. Business segments are based on the internal organization and financial reporting structure.

The business segments comprise of entities with assets and operating activities providing products and services. The segments are managed as separate entities.

Pricing of inter-segment transactions is based on current market prices and the terms of evaluating profitability and resources allocated to segments are based on profit before interests and taxes.

Segment assets and liabilities include items directly attributable to a segment and items that can be allocated on a reasonable basis. The unallocated items contain tax and financial items together with joint Group resource items. Capital expenditure comprises of additions to intangible assets and property, plant and equipment used in more than one period.

#### **Business segments**

**Passenger Car Tyres** -business unit covers the development and production of summer and winter tyres for cars and vans.

Heavy Tyres -business unit comprises tyres for forestry machinery, special tyres for agricultural machinery, tractors and industrial machinery as well as retreading and truck tyre business.

**Vianor** -tyre chain sells car and van tyres as well as truck tyres. In addition to Nokian brand, Vianor sells other leading tyre brands and other automotive products and services.

**Other operations** contain business development and Group management unallocated to the segments.

Eliminations consist of eliminations between different business segments.

#### Notes concerning geographical segments

The business segments are operating in seven geographic regions: Finland, Sweden, Norway, Russia and the CIS, the rest of Europe, North America and the rest of the world.

In presenting information on the basis of geographical segments, segment revenue is based on the location of the customers and segment assets are based on the location of the assets.

# 2. Acquisitions

#### Acquisitions and other changes in 2016

Vianor-chain has expanded further through several minor business combinations in Finland, Sweden, Norway and USA.

EUR million	2016
Purchase consideration	
Consideration paid in cash	12.8
Contingent consideration liability	0.1
Total consideration	12.9

The Group is committed to pay contingent considerations of total EUR 0.1 million in case the net sales and operating profits of the acquired businesses within the next three years after the acquisition year exceed the targets set for each (total net sales EUR 0.3 million and total operating profits EUR 0.1 million).

Recognised amounts of identifiable assets acquired and liabilities assumed:

EUR million	Notes	2016
Property, plant and equipment	(12)	3.8
Inventories	. ,	2.8
Trade and other receivables		1.2
Cash and cash equivalents		1.0
Total Assets		8.7
Deferred tax liabilities	(18)	0.3
Financial Liabilities		2.1
Trade and other payables		0.3
Total Liabilities		2.7
Total identifiable net assets		6.0
Composition of goodwill in the acquisit	tion	
Consideration transferred		12.9
Total identifiable net assets		6.0
Goodwill	(14)	6.9
Consideration paid in cash Cash and cash equivalents in the		12.8
subsidiaries acquired		1.0
Net cash outflow		11.7

The expectations relating to the growth in sales through increased customer base, and the future expectations on improved market area coverage and sales increase resulted in the recognition of goodwill.

Since these pieces of information are not material individually, the presentation is aggregated. The profits of the acquired companies, totalling EUR 0.4 million, are included in the consolidated income statement. The actual acquisition dates and the nature of the operations taken into account the effect of the acquisitions on the consolidated net sales and profit is not material even if they all were combined as of the beginning of the financial year.

The acquisition related costs of EUR 0.0 million have been recorded as selling and marketing expenses. There were no other transactions recognised separately from these acquisitions. The consideration has been transferred in cash and no significant contingent consideration arrangements were included. No noncontrolling interest remained in the acquiree. The identifiable asset acquired and liabilities assumed are recorded in fair value. Goodwill is measured as the excess of the consideration transferred over the total identifiable net assets. None of the goodwill recognised is deductible for income tax purposes.

#### Acquisitions and other changes in 2015

Vianor-chain has expanded further through several minor business combinations in Finland (including Kumielo Oy from 1 January 2015), Sweden and Norway.

EUR million	2015
Purchase consideration	
Consideration paid in cash	7.1
Contingent consideration liability	0.7
Total consideration	7.8

The Group is committed to pay contingent considerations of total EUR 0.7 million in case the net sales and operating profits of the acquired businesses within the next three years after the acquisition year exceed the targets set for each (total net sales EUR 9.9 million and total operating profits EUR 0.8 million).

Recognised amounts of identifiable assets acquired and liabilities assumed:

EUR million	Notes	2015
Property, plant and equipment	(12)	0.6
Inventories	()	1.8
Trade and other receivables		1.0
Cash and cash equivalents		0.5

#### Impairment losses

In 2016 Vianor recorded impairment losses of total EUR 3.6 million on other intangible assets. The impairments were caused by unsuccessful executions and operational cancellations of few ICTprojects. These projects are fully recognized as losses, which are reported in administration expenses.

In 2015 no impairment losses were recorded.

#### Impairment tests for goodwill

Goodwill has been allocated to the Group's cash-generating units that have been defined according to the business organisation.

#### Allocation of goodwill

EUR million

Passenger Car Tyres	54.8
Vianor	31.8
Total goodwill	86.5

The recoverable amount of a cash-generating unit is based on calculations of the value in use. The cash flow forecasts used in these calculations are based on five-year financial plans approved by the management. The estimated sales and production volumes are based on the current condition and scope of the existing assets. The key assumptions used in the plans include product selection, country-specific sales distribution, margin on products, and their past actual outcomes. Assumptions are also based on commonly used growth, demand and price forecasts provided by market research institutes.

The discount rate used is the weighted average cost of capital (WACC) before taxes defined for the Group. The calculation components are risk-free rate of return, market risk premium, industry-specific beta co-efficient, borrowing cost and the capital structure at market value at the time of testing. The discount rate used for Passenger Car Tyres is 5.4% (7.2% in 2015) and for Vianor is 4.8-9.1% (6.3–11.9% in 2015) varying through country locations. Future cash flows after the forecast period approved by the management have been capitalised as a terminal value using

a steady 2% growth rate and discounted with the discount rate specified above.

The testing indicated no need to recognise impairment losses. In Vianor the calculations indicated that the recoverable amount exceeded the carrying value by EUR 57 million (EUR 70 million in 2015). Of the key assumptions, Vianor is the most sensitive to actual realisation of gross margin levels based on demand forecasts. A lag of mere 0.6%-units from the gross margin target levels in future years might lead to a need for impairment. The recoverable amount in Passenger Car Tyres significantly (well over 100%) exceeds the carrying amount of the cash-generating unit, and small sales margin or sales volume changes have no effect on the impairment testing results. A possible impairment would require e.g. an annual decrease above 20% in net sales or a weakening of the present gross margin level permanently over 50%.

# 15. Carrying amounts and fair values of financial assets and liabilities

Total financial liabilities		320.1	-	322.7	-	296.1	-	300.8	-

The carrying amount of financial assets corresponds to the maximum exposure to the credit risk on the reporting date.

Fair value measurements have been classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1: Quoted prices in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety shall be determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety.

All financial assets and liabilities at fair value have been classified to Level 2 in the fair value hierarchy. Level 2 includes Group's derivative financial instruments and money market investments. To establish the fair value of these instruments the Group uses generally accepted valuation models with inputs based on observable market data.

Financial assets and liabilities not measured at fair value but for which the fair value can be measured are categorised in Level 2 and Level 3 in the fair value hierarchy. Level 2 includes loans and receivables and financial liabilities measured at amortised cost. Their fair values are based on the future cash flows that are discounted with market interest rates on the reporting date. Level 3 includes unquoted shares for which the cost is assessed to represent the fair value.

There were no transfers between different levels during the financial year.

Deferred tax liabilities offset						
against deferred tax assets	-15.3	0.0				-15.3
Deferred tax liabilities	25.7	25.0	-	-0.1	-	50.6

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes relate to the same fiscal authority.

On 31 December 2016 the Group had carry forward losses for EUR 4.4 million (EUR 2.4 million in 2015), on which no deferred tax asset was recognised. It is not probable that future taxable profit will be available to offset these losses before they expire by 2023.

The Group has utilised previously unrecognised tax losses from prior periods with EUR 0.0 million in 2016 (EUR 0.0 million in 2015).

No deferred tax liability was recognised on the undistributed earnings, EUR 44.5 million in 2016 (EUR 57.6 million in 2015), of foreign subsidiaries as the earnings have been invested permanently to the countries in question.

### 19. Inventories

EUR million	2016	2015
Raw materials and supplies	103.1	89.8
Work in progress	6.9	6.2
Finished goods	194.3	175.3
Total	304.3	271.3

Annually an additional expense is recognised in the carrying amounts of all separate inventory items to avoid them exceeding their maximum probable net realisable values. In 2016 EUR 0.0 million expense was recognised to decrease the carrying amount of the inventories to reflect the net realisable value (EUR 1.0 million in 2015).

## 20. Trade and other receivables

EUR million	2016	2015
Trade receivables	374.3	356.9
Loan receivables	0.8	3.2

## 21. Cash and cash equivalents

EUR million	2016	2015
Cash in hand and at bank	497.3	423.3
Money market instruments	16.0	6.0
Total	513.2	429.3

The carrying amount of trade and other receivables corresponds to the maximum exposure to the credit risk on the reporting date.

The carrying amount of trade and other receivables is a reasonable approximation of their fair value.

The balance amount of recognised losses is EUR 58.6 million (EUR 35.9 million in 2015).

The Group recognised expenses for losses on trade receivables worth EUR 18.6 million in 2016 (EUR 17.7 million in 2015).

31 Dec 2016	135,679	25.4	181.4	168.9	-6.7	369.1

The nominal value of shares was abolished in 2008, hence no maximum share capital of the Group exists anymore. All outstanding shares have been paid for in full.

#### Below is a description of the reserves within equity:

#### Share premium

Before the nominal value of shares was abolished, the amount exceeding the nominal value of shares received by the company in connection with share issue and share subscription were recognised in share premius.

#### Translation reserve

Translation reserve includes the differences arising from the translation of the foreign subsidiaries' financial statements. The gains and losses from the net investments in foreign units and hedging those net investments are also included in translation reserve once the requirements of hedge accounting have been met.

#### Fair value and hedging reserves

The fair value and hedging reserves comprises of two sub-funds: the fair value reserves for available-for-sale financial assets, and the hedging fund for changes in the fair values of derivative instruments used for cash flow hedging.

#### Paid-up unrestricted equity reserve

After the nominal value of shares was abolished, the entire share subscription made by option rigts are entered in the paid-up unrestricted reserve.

#### Treasury shares

The Group or the Parent company themselves do not directly hold any treasury shares.

The Group has entered into an agreement with a third-party service provider concerning administration and hedging of the share-based incentive program for key personnel. As a part of this agreement, the service provider purchases and administers shares for hedging the underlying cash flow risk and implementing the program. The third party owns the shares until the shares are given to the participants within the program. Despite the legal form of the hedging arrangement, it has been accounted for as if the share purchases had been conducted directly by the Group. During 2014, a total number of 300,000 shares was acquired. At the end of finacial year 2016 the total number of shares was 232,792 (2015: 300,000), which corresponds 0.2% (2015: 0.2%) of all shares of the Company.

#### Dividends

After the balance sheet date, the Board of Directors proposed that a dividend of EUR 1.53 per share be paid (EUR 1.50 in 2015).

#### Specification of the distributable funds

The distributable funds on 31 December 2016 total EUR 608,6 million (EUR 575.6 million on 31 December 2015) and are based on the balance of the Parent company and the Finnish legislation.

# 23. Share-based payments

### Share option plans

#### Share option plan 2010 directed at personnel

The Annual General Meeting in 2010 decided to issue a share option plan, as a part of the Group's incentive scheme, to employees of the Group or persons recruited to the Group at a later stage. The Board issued the shares in spring 2010 (2010A warrants), 2011 (2010B warrants) and 2012 (2010C warrants).

The share options were granted to the personnel employed by or in the service of the Nokian Tyres Group and to Direnic Oy, a wholly owned subsidiary of Nokian Tyres. Should a share option holder cease to be employed by or in the service of the Nokian Tyres Group before the warrants became exercisable, for any other reason than the death of the employee, or the statutory retirement of the employee in compliance with the employment contract, or the retirement of the employee otherwise determined by the company, the holder should without delay and compensation have offered to Nokian Tyres or its order the share options for which the share subscription period under the terms and conditions had not begun at the last day of such holder's employment or service.

#### Share option plan 2013 directed at personnel

The Annual General Meeting in 2013 decided to issue a share option plan, as a part of the Group's incentive scheme, to employees of the Group or persons recruited to the Group at a later stage. The Board issued the shares in spring 2013 (2013A warrants), 2014 (2013B warrants) and 2015 (2013C warrants).

The share options were granted to the personnel employed by or in the service of the Nokian Tyres Group and to Direnic Oy, a wholly owned subsidiary of Nokian Tyres. Should a share option holder cease to be employed by or in the service of the Nokian Tyres Group before the warrants become exercisable, for any other reason than the death of the employee, or the statutory retirement of the employee in compliance with the employment contract, or the retirement of the employee otherwise determined by the company, the holder shall without delay and compensation offer to Nokian Tyres or its order the share options for which the share subscription period under the terms and conditions had not begun at the last day of such holder's employment or service.

The following tables present more specific information on the share option plans.

The weighted average price of the Nokian Tyres plc share during the period that the option in question was exercisable in 2016.

#### Measurement of fair value

The fair value of share options is determined with Black-Scholes option pricing model. The fair value of the options is determined at the grant date and recognised as expense in employee benefits until vesting. The decision date by the Board of Directors is the grant date.

Main assumptions for Black-Scholes model to options granted during the period	2013B	2013C
Share price at grant, EUR	30.86	31.36
Share price at reporting date, EUR	35.42	35.42

### Performance share plans

#### Performance share plan 2013 directed at key employees

In 2013 the Board approved a new share based incentive plan for the key employees of the Group. The plan was intended to combine the objectives of the shareholders and the key employees in order to increase the value of the Group, to commit the key employees to the Group, and to offer them a competitive incentive plan based on earning the Nokian Tyres's shares. The plan included three earning periods, calendar years 2013, 2014 and 2015. The Board decided on the performance criteria and their targets for the plan at the beginning of each earning period.

The performance shares were granted to the key employees of the Nokian Tyres Group. In general no performance shares were released, if the key employee's employment or service ended before the delivery point of the shares. The performance shares may not be transferred during an approximately two-year restriction period established for the shares.

#### Performance share plan 2016 directed at key employees

In 2016 the Board approved a new share based incentive plan for the key employees of the Group. The plan is intended to combine the objectives of the shareholders and the key employees in order to increase the value of the Group, to commit the key employees to the Group, and to offer them a competitive incentive plan based on earning the Nokian Tyres's shares. The plan includes three earning periods, calendar years 2016, 2017 and 2018. The Board will decide on the performance criteria and their targets for the plan at the beginning of each earning period.

The performance shares are granted to the key employees of the Nokian Tyres Group. In general no performance shares will be released, if the key employee's employment or service ends before the end of the restriction period. The performance shares may not be transferred during an approximately one-year restriction period established for the shares. The members of the Group's Management Team must hold 25% of the received gross shares until the member's shareholding in the Company equals the member's fixed gross annual salary.

The following tables present more specific information on the performance share plans.

#### Measurement of fair value

Inputs to the fair value determination of the performance shares expensed during the financial year 2016 are listed in the below table as weighted average values. The total fair value of the performance shares is based on the company's estimate on 31 December 2016 as to the number of shares to be eventually vesting.

Current provisions		3.5	2.8

#### Warranty provision

The goods are sold with a normal warranty period. Additionally, a Hakka Guarantee warranty has been established in certain markets for certain products to compensate tyre damages not covered by the normal warranty, one year after the purchase and to a certain wear limit. Damaged goods will be repaired at the cost of the company or replaced with a corresponding product. The provisions are based on the sales and statistical compensation volumes of the tyres sold under these warranties. The warranty provisions are expected to be utilised within 1–2 years.

#### **Restructuring provision**

Due to the economic uncertainty, in 2015 the annual production volume in Passenger Car Tyres and Heavy Tyres -units at the Nokia factory was adjusted to meet the reduced order stock with lay-offs in various periods, personnel cuts and pension arrangements.

Out of the cost impacts of these adjustment measures EUR 0.2 million have been expensed in 2015. The still unrealised estimated costs of the liability components for the probable continued allowances to the dismissed, collected by the Unemployment

Insurance Fund in due course, have been recorded both as current and non-current provisions. The remaining provision is expected to be utilised evenly between years 2017–2018.

# 29. Financial risk management

The objective of financial risk management is to protect the Group's planned profit development from adverse movements in financial markets. The principles and targets of financial risk management are defined in the Group's financial policy, which is updated and approved by the Board. Financing activities and financial risk management are centralized to the parent company Group Treasury, which enters into financing and hedging transactions with external counterparties and acts as a primary counterparty to business units in financing activities, like funding, foreign exchange transactions and cash management. The Group Credit Committee is responsible for the credit policy and makes the credit decisions that have a significant impact on the credit exposure.

### Foreign currency risk

The Nokian Tyres Group consists of the parent company in Finland, separate sales companies in Russia, Sweden, Norway, the USA, Canada, Czech Republic, Switzerland, Ukraine, Kazakhstan, Belarus and China, the tyre chain companies in Finland, Sweden, Norway, Russia, Switzerland and the USA, and the tyre plants located in Nokia, Finland and Vsevolozhsk, Russia.

#### Transaction risk

According to the Group's financial policy, transactions between the parent company and the Group companies are primarily carried out in the local currency of the Group company in question and therefore transaction risk is carried by the parent company and there is no significant currency risk in the foreign Group companies. Exceptions to this main rule are the Group companies which have non-home currency items due to the nature of the business activities. In that case transactions between the parent company and the Group company are carried out in a currency suitable for the Group currency exposure. The parent company manages transaction risk in these Group companies and implements required hedging transactions for hedging the currency exposure of the Group company according to the Group hedging principles. Hedging principles are not applied to the currency exposure of Ukrainian and Belarusian subsidiaries. Transactions between Ukrainian subsidiary and the parent company are carried out in EUR and Belarusian subsidiary and the parent

company in RUB as UAH and BYN are non-convertible currencies.

The open foreign currency exposure of the parent company and the Group companies with non-home currency items comprises of the foreign currency denominated receivables and payables in the statement of financial position and the foreign currency denominated binding purchase and sales contracts (transaction exposure). For risk management purposes, estimated currency cash flows are added to the open foreign currency exposure so that the overall foreign currency risk exposure horizon covers the next 12 months (budget exposure). According to the Group's financial policy the significant transaction exposure in every currency pair is hedged, although 20% over-hedging or under-hedging is allowed if a +/- 10% change in the exchange rate does not create over EUR 1 million impact on the income statement. However, a simultaneous +/- 10% change in all the Group exposure currencies against EUR must not create over a EUR 5 million impact on the income statement. Exceptions to the main rule are non-convertible currencies, which do not have active hedging market available. The budget exposure is hedged according to the market situation and the hedge ratio can be 70% of the budget exposure at maximum. As hedging instruments, currency forwards, currency options and cross-currency swaps are used.

#### Translation risk

In financial statements the statements of financial position of the foreign subsidiaries are translated into euro using the European Central Bank's closing rates and the impacts of the exchange rate fluctuations from the foreign net investments are recorded as translation differences in other comprehensive income and in the translation reserve within equity. As the settlement of Group's internal loans in the subsidiary in Kazakhstan is not likely to occur in the foreign operation according to IAS21 'The Effects of Changes in Foreign Exchange Rates'. In 2016 the internal loans which were earlier considered as a net investment were converted into equity in the subsidiary in Ukraine. The net investments in foreign subsidiaries are not hedged based on the Board decision in 2013.

Group's total comprehensive income was positively affected by translation differences on foreign operations by EUR 121.8 million (EUR -55.2 in 2015) of which EUR -1.3 million (EUR -13.7 million in 2015) was recorded on internal loans recognised as net investment in foreign operation.

The accumulated translation differences from a foreign subsidiary recorded in the translation reserve within equity through other comprehensive income are brought from equity to the income statement and entered as a gain or loss on the sale if a subsidiary is divested fully or in part.

#### Sensitivity analysis for foreign currency risk

The following table demonstrates the sensitivity to a reasonably possible change in the base currency against the quote currency, with all other variables held constant, of the Group's profit before tax and equity due to changes in the fair value of financial assets and liabilities. A reasonably possible change is assumed to be a 10% base currency appreciation or depreciation against the quote currency. A change of a different magnitude can also be estimated fairly accurately because the sensitivity is nearly linear.

### Interest rate risk

The interest rate risk of the Group consists mainly of borrowing, which is split between floating and fixed rate instruments. On the reporting date the floating rate interest-bearing financial liabilities amounted to EUR 31.0 million (EUR 24.8 million in 2015) and the fixed rate interest-bearing liabilities EUR 194.8 million (EUR 194.7 million in 2015) including the interest rate derivatives. The Group's policy aims to have at least 50% of the non-current financial liabilities in fixed rate instruments. Interest rate risk is managed by using interest rate derivatives. On the reporting date the portion of the non-current fixed rate interest-bearing financial liabilities was 78% (98% in 2015) and the average fixing period of the interest-bearing financial liabilities was 21 months (34 months in 2015) including the interest rate derivatives. The Group uses interest rate derivatives as cash flow hedges and hedge accounting is mainly applied for those derivatives.

#### Sensitivity analysis for interest rate risk

The following table demonstrates the sensitivity to a reasonably possible change in interest rates, with all other variables held constant, of the Group's profit before tax through the impact on floating rate borrowings and interest rate hedges measured at fair value through profit or loss and the Group's equity due to changes in the fair value of cash flow hedges. A reasonably possible change is assumed to be a 1%-point increase or decrease of the market interest rates. A change of a different magnitude can also be estimated fairly accurately because the sensitivity is nearly linear.

		31 Dec	2016			31 Dec	2015

Impact of interest rate change	-1.2	2.7	1.2	-2.7	-1.1	4.4	1.1	-4.4

### Electricity price risk

The Group purchases electricity in Finland at market price from the Nordic electricity exchange and this leads to an electricity price exposure. Annually around 90 GWh of electricity is procured. According to the procurement policy electricity purchases are hedged with electricity derivatives within the limits set by the pre-defined hedge ratios for the coming five year period. On the reporting date the electricity derivatives amounted to 260 GWh (200 GWh in 2015).

#### Sensitivity analysis for electricity price risk

The following table demonstrates the sensitivity to a reasonably possible change in electricity price, with all other variables held constant, of the Group's profit before tax and equity due to changes in the fair value of the electricity derivatives. A reasonably possible change is assumed to be a 5 EUR/MWh increase or decrease of the electricity market prices. A change of a different magnitude can also be estimated fairly accurately because the sensitivity is nearly linear.

### Liquidity and funding risk

In accordance with the Group's financial policy, the Group Treasury is responsible for maintaining the Group's liquidity, efficient cash management and sufficient sources of funding. The committed credit limits cover all funding needs, like outstanding commercial papers, other current loans, working capital changes arising from operative business and investments.

Refinancing risk is reduced by split maturity structure of loans and credit limits. In May the Group replaced with an international bank syndicate a EUR 100 million multicurrency revolving credit facility with a EUR 100 million revolving credit facility due in 5 years unless a 2 year extension option will be executed. The Group has a EUR 350 million domestic commercial paper program. The current credit limits and the commercial paper program are used to finance inventories, trade receivables, subsidiaries in distribution chains and thus to control the typical seasonality in the Group's cash flows.

The Group reports the main financial covenants to creditors quarterly. If the Group does not satisfy the requirements set in financial covenants, creditor may demand accelerated repayment of the credits. In 2016 the Group has met all the requirements set in the financial covenants. Financial covenants are mainly linked to equity ratio. Management monitors regularly that the covenant requirements are met. Agreements relating to Group financing contain terms and conditions upon which the agreement may terminate, if control in the parent company changes as a result of a public tender offer.

On the reporting date the Group's liquidity in cash and cash equivalents was EUR 513.2 million (EUR 429.3 million in 2015). At the end of the year the Group's available current credit limits were EUR 506.6 million (EUR 506.6 million in 2015), out of which the committed limits were EUR 155.7 million (EUR 155.7 million in 2015). The available committed non-current credits amounted to EUR 150.0 million (EUR 0.0 million in 2015).

The Group's interest-bearing financial liabilities totalled EUR 225.8 million, compared to the year before figure of EUR 219.6 million. Around 89% of the interest-bearing financial liabilities were in EUR. The average interest rate of interest-bearing financial liabilities was 3.1%. Current interest-bearing financial liabilities, including the portion of non-current financial liabilities maturing within the next 12 months, amounted to EUR 88.8 million (EUR 19.9 million in 2015).

### Credit Risk

The Group is exposed to credit risk from customers' trade receivables and also from deposits and derivative transactions with different banks and financial institutions.

The principles of customers' credit risk management are documented in the Group's credit risk policy. The Group Credit Committee makes all the significant credit decisions. Credit analysis and payment history collected by credit information companies are used for evaluating credit worthiness. The credit status of the customers is reviewed at the Group companies regularly according to the Group credit risk policy principles. In addition, the country risk is monitored constantly and credits are limited in countries where political or economical environment is unstable. Bank guarantees, documentary credits and specific payment terms are used in controlling the credit risk in trade receivables. Payment programs, which customer is committed to, are always agreed upon for past due receivables. Significant items of trade receivables are evaluated both counterparty specifically and in a portfolio level in order to identify possible impairment. There are no over 15% customer or country risk concentrations in trade receivables, other than the Russian customers' share of 37% (31% in 2015) on the reporting date.

The credit risk in financial transactions is controlled by doing business only with banks and financial institutions with high credit ratings. In investments the Group's placements are current and funds are invested only in solid domestic listed companies or public institutions. The Board approves the investment policy for financial instruments annually.

#### The aging of trade receivables

Past due more than 90 days	12.3	8.6
Total	374.3	356.9

### Capital Management

The Group's objective of managing capital is to secure with an efficient capital structure the Group's access to capital markets at all times despite of the seasonal nature of the business. The Group monitors its capital structure on the basis of Net debt to EBITDA ratio and Equity ratio. Equity ratio has to be at least at the level of 30% in accordance with the financial covenants. Equity ratio is calculated as a ratio of total equity to total assets excluding advances received.

#### Net debt / EBITDA

Interest rate and currency swaps	20.0	0.0	0.0	20.0	0.0	0.0
Derivatives designated as cash flow hedges						
Foreign currency derivatives						
Interest rate and currency swaps	67.5	9.5	3.7	67.5	19.8	0.0
Interest rate derivatives						
Interest rate swaps	100.0	0.0	2.2	100.0	0.1	2.5
Electricity derivatives						
Electricity forwards	7.7	0.3	1.0	7.0	0.0	3.0

Derivatives are maturing within the next 12 months excluding the interest rate and currency swaps, interest rate swaps and electricity forwards.

The fair value of forward exchange contracts is measured using the forward rates on the reporting date. The fair value of currency options is calculated using an option valuation model.

The fair values of interest rate and currency swaps and interest rate derivatives are determined as the present value of the future cash flows based on market interest rates on the reporting date.

The fair value of electricity derivatives is based on quoted market prices in active markets on the reporting date.

## 31. Operating lease commitments

EUR million	2016	2015
The Group as a lessee		
Non-cancellable minimum operating lease	payments	
In less than 1 year	20.3	20.3
In 1 to 5 years	49.8	53.1
In over 5 years	1.1	9.3
	71.2	82.7

The Group leases office and warehouse spaces and retail outlets under various non-cancellable operating leases. The terms of the leases vary from few years to 15 years. The most significant agreements from the financial reporting point of view are Vianor retail outlets.

The income statement in 2016 contains EUR 55.2 million expenses for operating lease agreements (EUR 34.9 million in 2015).

#### The Group as a lessor

Vianor has conventional lease contracts for truck tyre frames and treads with short lease periods. These do not involve options for purchase nor lease period extentions.

Pledged assets	4.7	4.8
Other own commitments		
Guarantees	10.9	5.2
Contractual commitments	-	1.6

## 33. Disputes, litigations and risks in the near future

The Finnish Tax Administration has made tax reassessments on the Group transfer pricing starting from year 2007 and demanding in excess of EUR 105 million of additional taxes with punitive tax increases and interests. In the spring 2015 the most substantial reassessments were returned to the Tax Administration for reprocessing, but the renewed decisions, received in December 2015, changed only slightly - the claims decreased with a bit over EUR 6 million. In November 2016 the Board of Adjustment decreased mainly the punitive tax increases with further EUR 5 million. The Company has recorded the total amounts as is in the financial statements and the results of years 2013 and 2014, and the latest decreases in 2015 and 2016. The Company considers the decisions to be incorrect and has appealled against them by leaving a claim to the Admiminstrative Court. The Company will also, if needed, start a process with the competent authorities to negotiate for the elimination of the double taxation. Additionally the Company has initiated a separate process to determine the legality of the procedures used in the tax audit by Tax Administration and tax inspectors in its entirety. The disputes are expected to last for several years. Corresponding transfer pricing audit on year 2011 is pending.

The company announced in February 2016 that its practices concerning tyre tests in the past have not always been in line with the sustainable approach of Nokian Tyres. The company emphasizes that its tyres have always been safe and that safety has never been compromised on. There are no court cases in process related to the matter.

Additionally, the Group has some other pending business related disputes and court cases, which are expected to have no material effect on the consolidated financial statements.

The existing uncertainty in the Russian economy is due to the development of oil price, interest rate and investments, and sanctions that followed the Ukraine crisis. However, the growth in Russia is expected to turn positive in 2017. Possible effects related to US presidential election will be seen in coming months. An escalation of the Ukraine crisis could cause serious disruption, additional trade barriers, and a slowdown of economic development in Russia and Finland. Brexit as such has practically no effect on Nokian Tyres' business. Other sources of uncertainty relate to the challenging pricing environment of tyres in line with price development of raw materials.

Not combined due to the company characteristics and	minor significance.				

Nokianvirran Energia Oy is a joint operation with three parties that supplies production steam for the tyre plant in Nokia. The parties share control according to a specific Mankala-principle where the company is not intended to make profit while the parties have agreed to utilize the total output. The company is accounted for as a Group company using the proportionate consolidation method on each row according to the 32.3% shareholding.

The related parties of the Group consist of members of the Board of Directors, the President, other key management personnel, and close members of their families.

No special pension commitments have been granted to the members of the Board of Directors and no statutory pension expense incurs. In 2016 the statutory pension expense for President Lehtoranta was EUR 270 thousand (EUR 225 thousand in 2015) and due to his resignation all pension deposits for the supplementary pension plan will be returned and hence the reversed expense was EUR 176 thousand (in 2015 the expense was EUR 132 thousand). The agreed plan retirement age was 63 years. The annual account deposits for the pension capital redemption contract have been pledged to guarantee the recognized pension plan commitment. The contract was a defined contribution plan.

No loans, guarantees or collaterals have been granted to the related parties.

Shares and share options granted to the President and other key management personnel. The share option plan terms for the key management are equal to the share options directed at other personnel.

# Accounting policies for the parent company

#### General

The financial statements of Nokian Tyres plc, domiciled in the city of Nokia, have been prepared according to the Finnish Accounting Standards (FAS).

#### **Inventory valuation**

Inventories are valued at the lower of cost and net realisable value. Cost is determined on a first in - first out (FIFO) basis. In addition to the direct costs, an appropriate proportion of production overheads is included in the value of finished goods.

#### Fixed assets and depreciation

Fixed assets are stated in the balance sheets at cost less depreciation according to plan. The accumulated difference between the total depreciation charged to the income statement and depreciation according to plan is shown as a separate item in untaxed reserves.

Depreciations according to plan are calculated on the basis of the estimated useful life of the assets using the straight line method.

The depreciation times are as follows:

Intangible assets	3–10 years
Buildings	20–40 years
Machinery and equipment	4–20 years
Other tangible assets	10–40 years

Land property, as well as investments in shares, are not regularly depreciated.

#### Research and development

Research and development costs are charged to the other operating expenses in the income statement in the year in which they are incurred. Certain significant development costs with useful life over three years are capitalised and are amortised on a systematic basis over their expected useful lives. The amortisation period is between three and five years.

#### Pensions and coverage of pension liabilities

Pension contributions are based on periodic actuarial calculations and are charged to the income statement.

In Finland the pension schemes are funded through payments to a pension insurance company.

#### Equity

The acquisition cost of treasury shares repurchased by the Group is recognised as a deduction in equity. The consideration received for the treasury shares when sold, net of transaction costs and tax, is included in equity.

#### Foreign currency items

Transactions in foreign currencies are recorded at the exchange rates ruling at the dates of the transactions. At the end of the accounting period unsettled balances on foreign currency transactions and forward exchange contracts are valued at the rates published by the European Central Bank as on the financial statement date.

All foreign currency exchange gains and losses are entered under financial income and expenses.

#### Direct taxes

The income statement includes direct taxes based on the taxable profit and the change in deferred tax arising from temporary differences. The untaxed reserves are shown in full in the balance sheet, and the deferred tax liability is not recorded.

The deferred tax liability and assets are recorded as separate items and are based on the prevailing corporate tax rate.

### Notes to the Financial Statements of the Parent Company

The Group or the Parent company themselves do not directly hold any treasury shares.

The Company has entered into an agreement with a thirdparty service provider concerning administration and hedging of the share-based incentive program for key personnel. As a part of this agreement, the service provider purchases and administers shares for hedging the underlying cash flow risk and implementing the program. The third party owns the shares until the shares are given to the participants within the program. Despite the legal form of the hedging arrangement, it has been accounted for as if the share purchases had been conducted directly by the Company. During 2014, a total number of 300,000 shares was acquired. At the end of 2016 the total number of shares held was 232,792 (2015: 300,000), which corresponds 0.2% (2015: 0.2%) of all shares of the Company.

Electricity derivatives Electricity forwards		
Notional amount	7.7	7.0
Fair value	-0.7	-3.0

# 18. Environmental commitments and expenses

Expenses relating to environment are included to production costs. The company has duly attended to environmental commitments and has no information on material environmental liabilities. In addition to the environmental aspects presented in the Annual Report, Nokian Tyres issued a Corporate Social Responsibility Report in spring 2016.

Unrealised fair value changes of interest rate and electricity derivatives are not recognised in profit and loss. The interest rate swap hedges the future interest payments of a loan from a financial institution and the electricity forwards hedge the future electricity purchase prices in Finland. The contractual terms of these derivatives and the hedged items are congruent. The cash flows of the interest rate swap will occur during the next three years and the cash flows of the electricity forwards during the next five years.

The fair value of forward exchange contracts is measured using the forward rates on the reporting date. The fair value of currency options is calculated using an option valuation model.

The fair value of interest rate derivatives is determined as the present value of the future cash flows based on market interest rates on the reporting date.

The fair value of electricity derivatives is based on quoted market prices in active markets on the reporting date.

#### Share price development and trading volume in 2016

At the end of 2016, Nokian Tyres' share was quoted at EUR 35.42, showing an increase of 7.0% on the previous year's closing price of EUR 33.10. At its highest, Nokian Tyres' share was quoted at EUR 36.74 in 2016 (EUR 37.57 in 2015) and EUR 27.48 (EUR 19.23) at its lowest. During the year, a total of 138,561,065 (195,229,321) Nokian Tyres' shares were traded on Nasdaq Helsinki. At the end of the year, the market capitalization of the share capital was EUR 4,813,992,237 (EUR 4,458,277,859).

Nokian Tyres' shares are also traded on alternative platforms, such as Bats CXE, Turquoise and BATS. A total of 127,537,938 shares in Nokian Tyres were traded on these alternative platforms during 2016.

On December 31, 2016, the number of shares was 135,911,695. » Read more: www.nokiantyres.com/company/investors/share/ share-performance/

#### **Dividend policy**

The dividend policy adopted by the company's Board of Directors is to propose to the Annual General Meeting a dividend that reflects the company's profit development. The dividend policy was updated in 2015.

Nokian Tyres' dividend policy for 2016–2018 is as follows: the company's target is to provide steady or higher absolute dividend per share throughout 2016–2018 (despite the investments in the third factory). The company targets to distribute at least 50% of net profits in dividends.

#### FINANCIAL TARGETS 2016-2018\*

#### Faster than market growth with healthy profitability

Faster than the market growth	Our target is to achieve an average annual growth that is higher than our target market growth. This means we aim at growing organically faster than the tyre replacement market. With the present market outlook this would result to minimum 4–5% average annual sales growth for the period 2016–2018.
Healthy profitability	We target to maintain our industry leading operating profit level of minimum 22%.
Good shareholder return	Our target is to provide steady or higher absolute dividend per share throughout 2016–2018 (despite the investments in 3 <sup>rd</sup> factory). Dividend policy: Company targets to distribute at least 50% of net profits in dividends.

\*with stable exchange rates

#### **Board authorizations**

#### Annual General Meeting 2012

The Annual General Meeting on April 12, 2012 authorized the Board of Directors to make a decision to offer no more than 25,000,000 shares through a share issue, or by granting special rights under Chapter 10, Section 1 of the Finnish Companies Act that entitle you to shares (including convertible bonds) on one or more occasion. The Board may decide to issue new shares or shares held by the company. The maximum number of shares included in the authorization accounts for approximately 19% of the company's entire share capital.

The authorization includes the right to issue shares or special rights through a private offering; in other words, to deviate from the shareholders' pre-emptive right subject to the provisions of the law.

Under the authorization, the Board of Directors is entitled to decide on the terms and conditions of a share issue, or the granting of special rights under Chapter 10, Section 1 of the Finnish Companies Act, including the recipients of shares or special rights entitling them to shares, and the compensation to be paid. This authorization was given to be exercised for purposes determined by the Board of Directors. The subscription price of new shares shall be recognized under paid-up unrestricted equity reserve.

The consideration payable for the Company's own shares shall be recognized under paid-up unrestricted equity reserve. The authorization is effective for five years from the decision made at the Annual General Meeting. This authorization invalidates all other Board authorizations regarding share issues and convertible bonds.

#### Annual General Meeting 2016

The Annual General Meeting held on April 12, 2016 authorized the Board of Directors to resolve to repurchase a maximum of 5,000,000 shares in the Company by using funds in the unrestricted shareholders' equity. The proposed number of shares corresponds 3.7% of all the shares of the Company.

The shares may be repurchased in order to improve the capital structure of the Company, to carry out acquisitions or other arrangements related to the Company's business, to be transferred for other purposes, or to be cancelled, for the Company's incentive plans, or if according to the Board of Directors' comprehension, it is the interest of shareholders.

The price paid for the shares repurchased under the authorization shall be based on the market price of the Company's share in public trading. The minimum price to be paid would be the lowest market price of the share quoted in public trading during the authorization period and the maximum price the highest market price quoted during the authorization period.

The company's own shares can be repurchased otherwise than in proportion to the shareholdings of the shareholders (directed repurchase).

The authorization will be effective until the next Annual General Meeting of Shareholders, but at most until October 12, 2017.

#### Stock options 2010 directed at personnel

The Annual General Meeting held on April 8, 2010 decided to issue stock options to the personnel of the Nokian Tyres Group and the wholly owned subsidiary of Nokian Tyres plc. A deviation was made from the shareholders' pre-emptive subscription right because the stock options are designed to be part of the Group's incentive and commitment program. The purpose of the stock options is to encourage the personnel to work on a long-term basis to increase shareholder value.

The number of stock options is 4,000,000. A total of 1,320,000 stock options will be marked with the symbol 2010A, 1,340,000 with the symbol 2010B, and 1,340,000 with the symbol 2010C. According to the original subscription terms, the stock options entitle the subscription of a maximum of 4,000,000 Nokian Tyres plc's new shares or existing shares held by the company. The Board distributed the stock options in spring 2010 (2010A stock options), 2011 (2010B stock options), and 2012 (2010C stock options).

The original share subscription price for stock options 2010A was the average price of a Nokian Tyres plc share weighted by the share trading volume on Nasdaq Helsinki between April 1 and April 30, 2010, i.e. EUR 18.14. For stock options 2010B, the original share subscription price was the average price of a Nokian Tyres plc share weighted by the share trading volume on Nasdaq Helsinki between April 1 and April 30, 2011, i.e. EUR 32.90 and for stock options 2010C, the original share subscription price was the average price of a Nokian Tyres plc share weighted by the share trading volume on Nasdaq Helsinki between April 1 and April 30, 2011, i.e. EUR 32.90 and for stock options 2010C, the original share subscription price was the average price of a Nokian Tyres plc share weighted by the share trading volume on Nasdaq Helsinki between April 1 and April 30, 2012, i.e. EUR 35.30.

If the company distributes dividends or similar assets from the reserves of unrestricted equity, the amount of the dividend or distributable unrestricted equity shall be deducted from the share's subscription price of the stock options and decided after the beginning of the period for the determination of the share subscription price but before share subscription, as per the dividend record date or the record date of the repayment of equity.

The share subscription period:

May 1, 2012–May 31, 2014 for stock options 2010A May 1, 2013–May 31, 2015 for stock options 2010B May 1, 2014–May 31, 2016 for stock options 2010C.

As a result of the subscriptions with the 2010 stock options, the number of Nokian Tyres' shares may be increased by a maximum of 4,000,000 new shares. The share subscription price shall be credited to the paid-up unrestricted equity reserve. A share ownership plan is incorporated with the 2010 stock options, obliging the Group's senior management to acquire the Company's shares with a proportion of the income gained from the stock options.

#### Stock options 2013 directed at personnel

The Annual General Meeting held on April 11, 2013 decided to issue stock options to the personnel of the Nokian Tyres Group and the wholly owned subsidiary of Nokian Tyres plc. A deviation was made from the shareholders' pre-emptive subscription right because the stock options are designed to be part of the Group's incentive and commitment program. The purpose of the stock options is to encourage the personnel to work on a long-term basis to increase shareholder value.

The maximum total number of stock options issued will be 3,450,000 and they will be issued gratuitously. Of the stock options, 1,150,000 are marked with the symbol 2013A, 1,150,000 are marked with the symbol 2013B, and 1,150,000 are marked with the symbol 2013C. The stock options entitle their owners to subscribe for a maximum total of 3,450,000 new shares in the Company or existing shares held by the Company. The stock options now issued can be exchanged for shares constituting a maximum total of 2.5% of all of the Company's shares and votes of the shares, after the potential share subscription, if new shares are issued in the share subscription.

The share subscription price for stock option 2013A is the trade volume weighted average quotation of the Company's share on Nasdaq Helsinki between January 1 and April 30, 2013, i.e. EUR 32.26, for stock option 2013B, the trade volume weighted average quotation of the share on Nasdaq Helsinki between January 1 and April 30, 2014, i.e. EUR 29.54, and for stock option 2013C, the trade volume weighted average quotation of the share on Nasdaq Helsinki between January 1 and April 30, 2015, i.e. EUR 24.42. The share subscription price will be credited to the reserve for invested unrestricted equity.

If the company distributes dividends or similar assets from the reserves of unrestricted equity, the amount of the dividend or distributable unrestricted equity shall be deducted from the share's subscription price of the stock options and decided after the beginning of the period for the determination of the share subscription price but before share subscription, as per the dividend record date or the record date of the repayment of equity. The current subscription prices are EUR 27.86 per share for stock options 2013A, EUR 26.59 per share for stock options 2013B and EUR 24.42 per share for stock options 2013C.

#### The share subscription period:

May 1, 2015–May 31, 2017 for stock options 2013A May 1, 2016–May 31, 2018 for stock options 2013B May 1, 2017–May 31, 2019 for stock options 2013C. As a result of the subscriptions with the 2013 stock options, the number of shares may be increased by a maximum of 3,450,000 new shares. The share subscription price shall be credited to the paid-up unrestricted equity reserve. A share ownership plan is incorporated with the 2013 stock options, obliging the Group's senior management to acquire the Company's shares with a proportion of the income gained from the stock options.

Nokian Tyres' 2013B stock options for the option scheme 2013 were listed on Nasdaq Helsinki's main list as of May 2, 2016. At their highest, the 2013B stock options were quoted at EUR 10.42 and at their lowest at EUR 5.08. The trade volume was 667,359 during the year. » Read more: www.nokiantyres.com/company/investors/share/ stock-options/

#### Share rewards system 2016

In the spring of 2016, the Board of Nokian Tyres plc decided to update the Group's incentive schemes. The update aims to clarify and improve the schemes and to offer a competitive rewards system for all personnel.

The purpose of Nokian Tyres' new share-based incentive system is to harmonize the goals of the owners and key personnel in order to increase the value of the company in the long term, and to commit key personnel to the company. The share rewards system covers some 5% of the Group's personnel, including the management team members.

The share rewards system has three one-year earnings periods, the calendar years 2016, 2017 and 2018. The Company's board will decide on the system's earnings criteria and the goals set for each criterion at the beginning of the earnings period. The system's possible reward for the earnings period of 2016 is based on the Group's operating profit and net sales. The rewards paid for the earnings period of 2016 correspond to a maximum of 515,000 shares in Nokian Tyres plc, including the monetary reward.

The possible reward from the earnings period of 2016 will be paid in 2017, partially as shares in the Company and partially as money. The monetary reward is intended to cover the taxes and taxlike charges incurred on the key person. As a rule, the reward is not paid if the key person's employment is terminated before the reward is due. Shares that are offered as a reward cannot be handed over during the limitation period of approximately one year.

A member of the Group's management team must own 25% of the gross total number of shares earned through the system, up to the point where the total value of their share ownership is equal to their gross annual salary. They must own this number of shares for as long as they are involved in the Group's management team.

#### Management shareholding

On December 31, 2016, Nokian Tyres' Board members and the President and CEO held a total of 64,064 Nokian Tyres' shares, and a total of 60,000 stock options that were not publicly traded in 2016. On December 31, 2016, Nokian Tyres' Board members and the President and CEO did not hold Nokian Tyres' publicly traded stock options. The shares and publicly traded stock options represent 0.1% of the total number of votes.

### Auditor's report

#### To the Annual General Meeting of Nokian Tyres Plc

### Report on the Audit of Financial Statements

#### Opinion

We have audited the financial statements of Nokian Tyres Plc (business identity code 0680006-8) for the year ended 31 December 2016. The financial statements comprise the consolidated statement of financial position, income statement, statement of comprehensive income, statement of changes in equity, statement of cash flows and notes, including a summary of significant accounting policies, as well as the parent company's balance sheet, income statement, statement of cash flows and notes.

In our opinion

- the consolidated financial statements give a true and fair view of the group's financial performance and financial position in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU
- the financial statements give a true and fair view of the parent company's financial performance and financial position in accordance with the laws and regulations governing the preparation of financial statements in Finland and comply with statutory requirements.

#### **Basis for Opinion**

We conducted our audit in accordance with good auditing practice in Finland. Our responsibilities under good auditing practice are further described in the *Auditor's Responsibilities for the Audit of Financial Statements* section of our report.

We are independent of the parent company and of the group companies in accordance with the ethical requirements that are applicable in Finland and are relevant to our audit, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Materiality

The scope of our audit was influenced by our application of materiality. The materiality is determined based on our professional judgement and is used to determine the nature, timing and extent of our audit procedures and to evaluate the effect of identified misstatements on the financial statements as a whole. The level of materiality we set is based on our assessment of the magnitude of misstatements that, individually or in aggregate, could reasonably be expected to have influence on the economic decisions of the users of the financial statements. We have also taken into account misstatements and/or possible misstatements that in our opinion are material for qualitative reasons for the users of the financial statements.

#### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have also addressed the risk of management override of internal controls. This includes consideration of whether there was evidence of management bias that represented a risk of material misstatement due to fraud.

This document is an English translation of the Finnish auditor's report. Only the Finnish version of the report is legally binding.

THE KEY AUDIT MATTER

#### HOW THE MATTER WAS ADDRESSED IN THE AUDIT

#### Revenue recognition and impairment of trade receivables

(Refer to Accounting policies for the consolidated financial statements, note 20 and 29)

- The aggregate amount of trade receivables amounted to EUR 374.3 million in the consolidated statement of financial position as at 31 December 2016.
- The industry is marked by seasonal sales and long credit periods granted to clients.
- Due to the uncertain economic situation in Russia, which is a significant market for the Group, collection of receivables has been challenging.

Our audit procedures included, among others:

- We assessed and tested internal controls over recording sales transactions and recognising related revenues, maintaining customer data as well as over the approval practices related to price changes, among others.
- We assessed the Group's credit control process and considered the related instructions and other documentation, both on Group level and in Group companies.
- We evaluated credit risk and the level of credit losses recorded based on the information on Group's trade receivables and customers.

#### HOW THE MATTER WAS ADDRESSED IN THE AUDIT

#### Foreign currency risks

(Refer to Accounting policies for the consolidated financial statements, notes 1 and 29)

- A significant part of the Group's operations are derived from Russia, and the exchange rate between Euro and Rouble may fluctuate significantly.
- The Group has invested heavily in Russia by building a production plant. In the Russian subsidiaries there is a significant amount of equity and the euro-denominated value of the equity may fluctuate substantially following the development of Rouble exchange rate.

#### Our audit procedures included, among others:

- We obtained an understanding of the centralised Group Treasury and the methods and policies used by financial management to manage exchange rate risks.
- We evaluated the appropriateness of measurement of items denominated in foreign currencies in the financial statements.

#### Income tax issues

(Refer to Accounting policies for the consolidated financial statements, notes 10 and 33)

- Carrying value of inventories (Refer to Accounting policies for the consolidated financial statements and note 19)
- As at 31 December 2016, the inventory balance totaled EUR 304.3 million in the consolidated statement of financial position.
- The Group's sales are seasonal, and consequently at season-end inventories may need to be impaired.
- There are several different warehouse management software systems in operation in the Group companies.
   Calculation of the total value of inventories also involves manual procedures.

Our audit procedures included, among others:

- We evaluated the Group's inventory valuation methods used in relation to the accounting principles applied by the Group.
- We assessed the inventory accounting practices on Group level and in Group companies as well as evaluated and tested controls over inventory management.
- The Group has been subject to a tax audit concerning the tax years 2007-2010. As a result the parent company has been obliged to pay significant additional taxes mainly regarding transfer pricing in the intra-group sales between Finland and Russia. The company believes that the additional tax assessment made by the Finnish Tax Administration is unfounded. The tax rectification process started may take several years.
- The Group's effective tax rate is low mainly due to tax incentives received in Russia.

Our audit procedures included, among others:

- Together with KPMG tax specialists we obtained an understanding of the decisions made by the Finnish Tax Administration and the related claims submitted by the company. We also evaluated the appropriateness of the related accounting principles of the Group and the accuracy and adequacy of the disclosures given in the financial statements.
- We gained an understanding of the agreements entered into with the Russian tax authority related to tax incentives in Russia. We also evaluated the appropriateness of the accounting principles applied in respect tax incentives as well as assessed the calculations made in connection with the year-end financial statements.

### Responsibilities of the Board of Directors and the Managing Director for the Financial Statements

The Board of Directors and the Managing Director are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU, and of financial statements that give a true and fair view in accordance with the laws and regulations governing the preparation of financial statements in Finland and comply with statutory requirements. The Board of Directors and the Managing Director are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors and the Managing Director are responsible for assessing the parent company's and the group's ability to continue as going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting. The financial statements are prepared using the going concern basis of accounting unless there is an intention to liquidate the parent company or the group or cease operations, or there is no realistic alternative but to do so.

#### Auditor's Responsibilities in the Audit of Financial Statements

Our objectives are to obtain reasonable assurance on whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with good auditing practice will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with good auditing practice, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

 Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the parent company's or the group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of the Board of Directors' and the Managing Director's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the parent company's or the group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events so that the financial statements give a true and fair view.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

### Other Reporting Requirements

#### Other information

The Board of Directors and the Managing Director are responsible for the other information. The other information comprises information included in the report of the Board of Directors and in the Annual Report, but does not include the financial statements and our report thereon. We obtained the report of the Board of Directors prior to the date of the auditor's report, and the Annual Report is expected to be made available to us after the date of the auditor's report.

Our opinion on the financial statements does not cover the other information.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. With respect to report of the Board of Directors, our responsibility also includes considering whether the report of the Board of Directors has been prepared in accordance with the applicable laws and regulations.

In our opinion, the information in the report of the Board of Directors is consistent with the information in the financial statements and the report of the Board of Directors has been prepared in accordance with the applicable laws and regulations.

If, based on the work we have performed, we conclude that

### Auditor's Report

there is a material misstatement in of the information included in the report of the Board of Directors, we are required to report this fact. We have nothing to report in this regard.

### Other subheadings as needed

We support that the financial statements should be adopted. The proposal by the Board of Directors regarding the use of the distributable funds shown in the Financial Statements is in compliance with the Limited Liability Companies Act. We support that the Members of Board of Directors and the Managing Director should be discharged from liability for the financial period audited by us.

# Corporate Governance Statement

### I Introduction

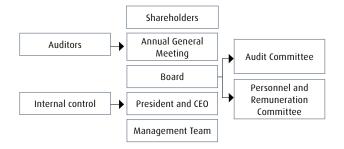

Nokian Tyres plc (hereinafter referred to as the "Company") complies with the recommendation concerning the Corporate Governance for Finnish listed companies (Corporate Governance 2015) that came into force on January 1, 2016, and the company has not departed from the recommendations in the said code. The code document is available in its entirety at www.cgfinland.fi/en/. The Company follows the Finnish Limited Liability Companies Act, the Acts on auditing and accounting, EU-level regulations, the Nasdaq Helsinki rules and the regulations, and instructions from the Financial Supervisory Authority.

The Company publishes its Corporate Governance Statement as a separate document and as part of the annual report. The statement also includes a report of the salaries and remuneration.

The Company's corporate governance is based on the annual general meeting, the Articles of Association, the Board of Directors, the President and CEO, the group's management team, the legislation and regulations mentioned above as well as the group's policies, procedures, and practices. The Board of Directors has approved the Corporate Governance Statement. The Company's auditors verify that the statement and its related descriptions of the internal reporting controls and risk management correspond to the financial reporting process. The statement will not be updated during the financial period; however, up-to-date information will be updated on the Company's website at www.nokiantyres.com/company/investors/.

### II Descriptions concerning governance

#### Nokian Tyres' administrative organization

#### Annual General Meeting and Articles of Association

The Company's highest decision-making power is held by the Annual General Meeting, whose tasks and procedures are outlined in the Limited Liability Companies Act and the Articles of Association. The Annual General Meeting decides on such matters as the confirmation of the company's annual accounts, profit distribution, and discharging the Board of Directors and the President from liability. The Annual General Meeting elects the members of the Board of Directors and the auditor and determines their remuneration. In addition, the Annual General Meeting can make decisions on questions such as amendments to the Articles of Association, share issues, granting warrants, and acquisition of the company's own shares.

An extraordinary general meeting is summoned whenever the Board considers this to be necessary or if an auditor or a group of shareholders with a holding of a total of at least one-tenth of the entire stock requires it in writing in order to address a particular issue.

The Annual General Meeting is held by the end of May of each year on a date determined by the Board of Directors, either at the Company's registered place of business or in the city of Tampere or Helsinki. The Articles of Association state that the invitation to the Annual General Meeting must be published in one daily newspaper distributed nationwide and one distributed in the Tampere region. In addition, the Company publishes the invitation to the Annual General Meeting as a stock exchange release and on its website. The invitation lists the agenda of the meeting. The Board's proposals to the meeting are available on the Company's website before the meeting.

The Company's Articles of Association are available on the Company's website at www.nokiantyres.com/company/investors/.

The Annual General Meeting for 2016 took place on April 12, 2016 at the Tampere Hall in Tampere. The meeting confirmed the consolidated financial statements and discharged the Board members and the President from liability for the fiscal year 2015. All of the documents related to the Annual General Meeting are available on the Internet at www.nokiantyres.com/company/investors/.

The Annual General Meeting for 2017 will take place on April 10, 2017 at 4 pm in Tampere.

#### Shareholder's rights

According to law, shareholders are entitled to subject matters belonging to the Annual General Meeting's scope of power to be addressed at the meeting. This requires that the shareholder submit the requirement to the Board of Directors in writing, far enough in advance that the matter can be added to the agenda on the invitation. Shareholders registered in the company's shareholder register by the date specified on the invitation to the Annual General Meeting, 8 days before the meeting (the record date), are entitled to attend the Annual General Meeting. Shareholders can also authorize a proxy to act on their behalf at the Annual General Meeting. Owners of administratively registered shares can be temporarily added to the shareholder register in order to make them eligible to attend the Annual General Meeting.

At the Annual General Meeting, shareholders are entitled to use the entire number of votes that they own on the record date. Shareholders have the right to present questions regarding issues on the General Annual Meeting's agenda. In addition, shareholders are entitled to suggest draft resolutions concerning those matters belonging to the scope of power of the Annual General Meeting and included on its agenda.

#### **Board of Directors**

The Board is responsible for corporate governance and the appropriate conduct of ordinary activities pursuant to the Limited Liability Companies Act and other regulations. The board holds the general authority in company-related issues, unless other company bodies have the authority under the applicable legislation or articles of association. The policies and key tasks of the Board are defined in the Limited Liability Companies Act, the Articles of Association, and the Board's rules of procedure. The key tasks include:

- Consolidated financial statements, half year report, interim reports
- Proposals to the Annual General Meeting
- Appointing and dismissing the President and CEO
- Organization of financial control.

In addition, the Board deals with, and decides on, matters of principle, as well as issues that carry financial and business significance, such as:

- Group and business unit strategies
- The Group's action, budget, and investment plans
- The Group's risk management and reporting procedures
- Decisions concerning the structure and organization of the Group
- Significant individual investments, acquisitions, divestments, and reorganizations
- The Group's insurance and financing policies
- Reward and incentive schemes for the Group's management
- Appointing Board committees
- Monitoring and evaluating the actions of the President and CEO.

The Company has a separate Audit Committee and a Personnel and Remuneration Committee.

The President and CEO of Nokian Tyres is in charge of ensuring that the Board members have necessary and sufficient information on the Company's operations.

The Board assesses its activities and operating methods by carrying out a self-evaluation once a year. Members of the Board will not participate in making a decision where the law states they must be disqualified due to a conflict of interest.

#### Composition of the Board

According to the Articles of Association of Nokian Tyres, the Board of Directors comprises no fewer than three and no more than eight members. The number of Board members and the composition of the Board shall be such that the Board is capable of efficiently carrying out its tasks, while taking account of the requirements set by the Company's operations and its stage of development. The elected Board members must be qualified for the task and able to allocate enough time for the Board duties. The Board shall include no fewer than two representatives from both genders. The proposal regarding the composition of the Board for the Annual General Meeting is prepared by the Personnel and Remuneration Committee. The Board shall have no fewer than two representatives from both genders. This goal has been met in the current Board. The principles concerning the selection of the Board and its diversity are shown on the Company's website at www.nokiantyres.com/company/investors/.

Members of the Board are elected at the Annual General Meeting for a one-year term of office that begins after the closing of the Annual General Meeting and ends at the end of the next Annual General Meeting. The Board of Directors appoints a Chairman from among its members. The remuneration payable to the Board members is also confirmed at the Annual General Meeting.

The Board will decide on the committees and their chairpersons and members each year during the constituent meeting. In 2016, the Personnel and Remuneration Committee and the Audit Committee were operational.

The Board meetings usually take place in Helsinki. The Board also visits the main units of the Group and holds its meetings at these locations. When necessary, telephone conferences can also be arranged. The Vice President responsible for finance and control and other Group Management Team members as well as the internal auditor participate in the Board meetings, when necessary. The auditor participates in the annual meeting dealing with financial statements and auditing plan. The Group General Counsel is the secretary of the Board.

#### Information on the Board members

The Annual General Meeting on April 12, 2016 elected 7 members. Petteri Walldén, Hille Korhonen, Tapio Kuula, Raimo Lind, and Inka Mero were re-elected. Heikki Allonen and Veronica Lindholm were elected as new members. In addition to the people listed above, Hannu Penttilä was also a member of the Board until April 12, 2016.

#### Petteri Walldén, Chairman of the Board (b. 1948)

#### Committees of the Board

The Board appoints its committees annually at its first constituent meeting following the Annual General Meeting. The Board chooses the members and chairman for the committees from among its members. Each committee must include no fewer than three members having the competence and expertise necessary for working in the committee. The members of the Audit Committee must be independent of the company, and at least one member must be independent of all major shareholders. The majority of the members of the Personnel and Remuneration Committee must be independent of the company. The President and CEO and the other members of the company management cannot act as members of the Personnel and Remuneration Committee.

#### Personnel and Remuneration Committee

The committee prepares the Board's proposal to the Annual General Meeting on the members to be appointed to the Board of Directors and the remuneration to be paid to the Board members. In addition, the committee prepares a proposal to the Board on the company's President and CEO and on the salary and other incentives paid to the President and CEO. The Personnel and Remuneration Committee also submits a proposal to the Board on the allocation and criteria of employee stock options, share rewards and other incentives. The committee has no independent decision-making power; collective decisions are made by the Board, which is responsible for carrying out the tasks assigned to the committee.

In 2016, the members of the Personnel and Remuneration committee were Petteri Walldén (Chairman until April 12, 2016), Hille

Korhonen, Tapio Kuula (Chairman from April 12, 2016), and Hannu Penttilä (until April 12, 2016).

The committee assembled 6 times.

All committee members are independent of the company and of all major shareholder

#### Audit Committee

The Audit Committee assists the Board of Directors in its regulatory duties and reports to the Board. The committee has no independent decisionmaking power; collective decisions are made by the Board, which is responsible for carrying out the tasks assigned to the committee.

According to the rules of procedure specified by the Board, the committee controls that bookkeeping, financial administration, financing, internal auditing, audit of the accounts, and risk management are appropriately arranged in the Company. The committee follows the reporting process for financial statements as well as any significant changes in the recording principles and the items valued in the balance sheet. The committee also processes the general description of the mechanisms of internal auditing and risk management of the financial reporting process, which forms part of the Corporate Governance Statement. The committee follows the statutory auditing of the financial statement and the consolidated financial statements and assesses the independence of the statutory auditor. The committee prepares the draft resolution on selecting the auditor.

In 2016, the members of the Audit Committee were Raimo Lind (Chairman), Inka Mero, Heikki Allonen (from April 12, 2016), and Tapio Kuula (until April 12, 2016). The Company's chief auditor participates in the committee's meetings.

The committee assembled 5 times in 2016.

All committee members are independent of the company and of all major shareholders of the company.

#### President and CEO and his/her duties

The President and CEO manages the Group's business operations and implements the current corporate governance in accordance with the instructions and guidelines provided by the Board of Directors and the Limited Liability Companies Act. With regard to the extent and quality of the Company's operations, the President and CEO may only undertake unusual or extensive actions when authorized to do so by the Board of Directors. The President and CEO is in charge of ensuring that the company accounting follows the statutory requirements and that asset management is arranged reliably. The President and CEO is elected by the Board of Directors. Ari Lehtoranta, M.Sc. (Electrical Engineering), was the Company's President and CEO until December 31, 2016.

#### Ari Lehtoranta (b. 1963)

#### Other management

The Group's management team is responsible for assisting the President and CEO in preparing the Company's strategy and in operative management, and for discussing matters that involve substantial financial or other impacts, such as corporate transactions and organization changes. In accordance with the Group's meeting practices, a Management Workshop assembles once per month. In addition to the President and CEO, the workshop is attended by the Vice Presidents of the profit and service centers, the Vice President for Russian operations and the chief audit executive (CAE). More detailed information concerning the management team is available at www.nokiantyres.com/company/investors/ corporate-governance/the-groups-management-team/.

# III Descriptions of mechanisms of internal control and risk management

#### Internal control

The purpose of the Group's internal control mechanisms is to ensure that the financial reports released by the company contain essentially correct information on the Group's financial position. The group has defined group-level instructions and policies for the key operative units specified below in order to ensure efficient and profitable Company operations.

The business activities of the Group are divided into two areas: the manufacturing business and the tyre retail chain. The manufacturing business consists of business units, which are Passenger Car Tyres, Heavy Tyres (the Nokian Heavy Tyres business unit was incorporated as an independent company as of January 1, 2006), and Other Business. Each business unit is responsible for its business area and its financial performance, risk management, balance sheet and investments, supported by the different service functions. The Group's sales companies are a part of the sales function and serve as product distribution channels in local markets. The tyre retail chain is organized into a sub-group. Its parent company is Vianor Holding Oy, fully owned by the parent company Nokian Tyres plc. The tyre outlets operating in different countries are part of the sub-group.

The Managing Directors of the company's subsidiaries are responsible for the daily operations and administration of their companies. They report to the company's Vice President responsible for Sales, while the Managing Directors of the Vianor chain report to the director of the Vianor business unit.

The Board of Directors is responsible for the functionality of the internal control mechanisms, which are managed by the company management and implemented throughout the organization. Internal control is not a separate function; it is an integral part of all activities of the Group at all levels. Operative company management bears the main responsibility for operational control. Every supervisor is obliged to ensure sufficient control over the activities belonging to his or her responsibility and to continuously monitor the functionality of the control mechanisms. The Vice President responsible for finance and control is responsible for organizing financial administration and reporting processes and the internal control thereof. The parent company's Finance and Control unit is responsible for internal and external accounting; its tasks also include producing financial information concerning the business areas and ensuring the accuracy of this information.

The preparation process of the consolidated financial statements (IFRS), the related control measures, and the task descriptions and areas of responsibility related to the reporting process are defined. The Company's Finance and Control unit is in charge of consolidating the business areas' figures to produce Group-level financial information. Each legally separate Group company produces its own information in compliance with the instructions provided and in line with local legislation. The revenue and operating profit of the Group and business units are analyzed and the consolidated profit is compared with the management's assessment of business development and the information received from operative systems. The Group's Finance and Control unit is centrally responsible for the interpretation and application of financial reporting standards as well as for monitoring compliance with these standards.

Effective internal control requires sufficient, timely, and reliable

information in order for the Company management to be able to monitor the achievement of targets and the efficiency of the control mechanisms. This refers to financial information as well as other kinds of information received through IT systems and other internal and external channels. The instructions on financial administration and other matters are shared on the Company's intranet for all of those who need them, and training is organized for personnel with regard to these instructions when necessary. Communication with the business units is continuous. The Company's financial performance is internally monitored by means of monthly reporting complemented with rolling forecasts. The financial results are communicated to Company personnel immediately after the official stock exchange releases have been published.

#### Communications

The goal of Nokian Tyres' investor relations is to regularly and consistently provide the stock market with essential, correct, sufficient, and up-to-date information that is subsequently used to determine the share value. The operations are based on equality, openness, accuracy, and good service.

#### Risk management

The Group has adopted a risk management policy, approved by the Board of Directors, which supports the achievement of strategic goals and ensures continuity of business. The Group's risk management policy focuses on managing both the risks pertaining to business opportunities and the risks affecting the achievement of the Group's goals in the changing operating environment.

The risks are classified as strategic, operational, financial, and hazard risks. Strategic risks are related to customer relationships, competitors' actions, political risks, country risks, brand, R&D, and investments. Operational risks arise as a consequence of shortcomings or failures in the Company's internal processes, actions by its personnel or systems, or external events, such as legislative changes, unpredictable rulings by judicial systems or authorities, or changes in raw material prices. Financial risks (Note 29) are related to fluctuations in interest rate and currency markets, refinancing, and counterparty and receivables risks. Hazard risks may lead to injuries, property damage, production outages, environmental impacts, or liabilities to third parties

The most significant risks related to Nokian Tyres' business are the country risks related to the Russian business environment, reputation risks, tax risks (especially in Finland), product and R&D risks, production outage risks, currency and receivable risks, risks related to Corporate Governance, and information security and data administration risks. Due to the company's product strategy, interruption risks that are related to marketing and logistics may especially have a significant impact on peak season sales. The risk analysis performed in 2016 paid special attention to risks within the area of corporate social responsibility, the most significant of which were the risks related to reputation and product quality.

The risk management process aims to identify and evaluate the risks, and to plan and implement the practical measures for each risk. Among other things, such measures may include avoiding the risk, reducing it in different ways, or transferring the risk through insurance or agreements. Control functions and actions are control or back-up procedures applied to reduce risks and ensure the completion of risk management measures.

Risk management is not allocated to a separate organization; its tasks follow the general distribution of responsibilities adopted elsewhere in the organization and its business activities. The company's Board of Directors discusses the most significant risks annually in connection with the strategic process.

### IV Other information provided

#### Internal audit

The Group's internal audit carries out assessments and audits on the efficiency of risk management, internal control, and corporate governance processes. Internal audit is an independent and objective function whose aim is to help the organization to achieve its goals. The Internal Audit function in the Group is managed by the Chief Audit Executive (CAE), who works under the Board of Directors and the President and CEO. The Internal Audit function of the Group is planned to be conducted in accordance with the International Standards for the Professional Practice of Internal Auditing. An external auditor performed an assessment of the group's Internal Audit in the spring of 2015. The focus areas for internal audit are approved by the Board of Directors each year. The CAE reports on their findings and the agreed further actions to the Audit Committee and the Board of Directors.

In 2016, Internal Audit focused on assessing, among other things, the operations and risks of various country organizations, corporate governance arrangements, risk management arrangements and instructions, corporate sustainability and information security matters as well as specific misconduct risks and cases, including a substantial felony related to business secrets that was pending in court and where Nokian Tyres was the complainant. The Internal Audit function at Vianor focuses on guiding the outlets and ensuring conformity to the Vianor activity management system. It reports to the Internal Auditor of the Group and the Managing Directors of the country units.

#### Decision-making concerning related party transactions

The Company assesses and follows business transactions made with its related parties and maintains a list of parties that are considered related parties. The Company has defined practices for business with related parties. As a rule, related party transactions are prohibited; however, if related party transactions cannot be avoided, the instructions are to report them to the nearest supervisor. If the monetary value of the transaction is substantial, it will be reported to the Company's General Counsel and Internal Auditor.

The Company only has related party transactions that are a part of normal business, and the information regarding them is provided in the annual report and the notes to the financial statements.

#### Insider issues

The Company complies with the guidelines for insider trading drawn up by Nasdaq Helsinki. Furthermore, the company has drawn up separate insider trading guidelines that have been approved by the Board of Directors.

The members of the Board, the President and CEO, all of the members of the Company's management team and the secretary of the Board of Directors, and the Chief Audit Executive have been defined as permanent insiders. A list of permanent insiders is maintained in the digital system of Euroclear Finland Oy. The Company's permanent insiders are considered to be aware of all projects.

Furthermore, the Company draws up a separate list of people in executive positions and their related entities. The Company's Board members, President and CEO, Business Unit managers, Vice President responsible for finance and control, the General Manager for Nokian Tyres Russia, the Vice President, of Sales of Passenger Car Tyres, and the Vice President of Production are considered persons in executive positions with regard to the market abuse regulation.

The Company maintains a project-specific list of insiders who have insider information concerning a specific project, including external advisors. The Company maintains a project-specific list of insiders either manually within the Company or in a digital system maintained by Euroclear Finland Oy.

The Company's General Counsel is responsible for insider issues. The assistant of the Vice President responsible for finance and control is responsible for maintaining the list of insiders. The General Counsel is responsible for managing the trading limitations and the duty to declare business transactions. The Vice President responsible for finance and control acts as the deputy to both the General Counsel and the assistant as regards insider issues.

The insider representative supervises the trading and duty to declare of the permanent insiders and persons holding executive positions and their related entities. The insider representative will check the information to be declared from the persons holding executive positions and their related entities at least once per year.

Persons holding executive positions within the Company and permanent insiders are not allowed to trade in the Company's securities for 30 days before the publication of the Company's financial statement report, half year report, or interim report ("closed window"). The same applies to persons who participate in the preparation, drawing up, and/or publication of the Company's financial reports. The prohibition on trading mentioned above also applies to persons who process the reporting and forecasts of the Nokian Tyres Group and those who have access to group-level financial figures through different systems.

Those included in the project-specific insider lists are prohibited from trading in the Company's securities until the termination or publication of the project.

#### Audit

The auditor has an important role as a controlling body appointed by the shareholders. The audits give shareholders an independent opinion on how the financial statements and report by the Board of Directors of the Company have been drawn up and the accounting and administration of the Company have been managed. The auditor elected at the Annual General Meeting is KPMG Oy Ab, authorized public accountants, with Lasse Holopainen, Authorized Public Accountant, acting as the auditor with principal responsibility. In addition to his duties under the valid regulations, he reports all audit findings to the Group's management.

The Group's audit fees in 2016 amounted to EUR 437,000 (2015: EUR 537,000). The fees paid to the authorized public accountants for other services totaled EUR 739,000 (EUR 347,000).

### Report of salaries and remuneration

#### A. Decision-making mechanism for remuneration

Each year, the Annual General Meeting decides on the remuneration payable to the Board members on the basis of a proposal drawn up by the Personnel and Remuneration Committee.

The Board of Directors makes decisions concerning the salary, benefits, and long-term incentives of the President and CEO and the rest of the management team. In addition to the President and CEO's short-term incentive system, the Board also decides on the maximum level of the management team's short-term incentive system. The Personnel and Remuneration Committee prepares the above matters for decision by the Board, using external experts when necessary. The President and CEO decides on the goals for the management team's short-term incentive system.

In 2012, the Annual General Meeting authorized the Board of Directors to make a decision to offer no more than 25,000,000 shares through a share issue. The authorization is effective for five years from that decision. In 2015, the Annual General Meeting authorized the Board of Directors to decide on the repurchase of a maximum of 5,000,000 of the company's own shares using funds from the Company's unrestricted equity. This authorization is valid until the next Annual General Meeting, but at most until October 12, 2017. The Board may also use these shares as incentives.

Board members are not included in the Company's option and share issue programs.

#### **Remuneration for the President and CEO**

The Board of Directors makes decisions concerning the salary and other benefits of the President and CEO.

The compensation package includes the basic salary, fringe benefits, the performance-related short-term bonus scheme and the stock-based long-term incentives.

In 2016, the annual salary of Ari Lehtoranta, President and CEO, was EUR 743,435. The share of fringe benefits in the salary was EUR 9,330. In addition, the President and CEO received performancebased bonuses of EUR 560,219.

#### Short-term and long-term incentive systems

The President and CEO's short-term performance-related bonus is based on the Group's profitability and cash flow, and it may amount to a maximum of 100% of the annual salary. The target period is one year and the bonus is paid out once per year.

The President and CEO's long-term incentive consists of share incentive systems. The key goals for the share incentive system in force at any given time can be found under Incentive systems for key personnel. The maximum limits for the remuneration are set forth in Table 1.

Pensions and information regarding the termination of the employment relationship

The President and CEO's age of retirement is set by written agreement at 63 years. The pension is determined on the basis of the Employees Pensions Act and a separate defined benefit pension plan taken out by the company. The amount paid in 2016 was EUR 132,000. Since the employment relationship of President and CEO Ari Lehtoranta terminated on December 31, 2016, the benefit pension plan described hereinabove does not accrue any pension payments for him; any payments made to this plan will be returned to the company.

The President and CEO's period of notice is 6 months. If the agreement is terminated by the company, the President and CEO is entitled to compensation corresponding to 18 months' salary and other benefits, in addition to the notice period's salary.

#### The management team

The Board approves the salaries and benefits of managerial employees and the employee incentive scheme on the basis of a proposal by the Personnel and Remuneration Committee.

Rewards to the management are based on monthly remuneration determined by the competence classification of the tasks, including monetary payments and taxable telephone and company car benefits, and on a separate annual bonus. The annual

### B. General principles for remuneration

#### Remuneration of the Board members

The Board members receive an annual fee and a meeting fee for the meetings of the Board and its committees. Travel costs are compensated according to the company's travel policy. 50% of the annual fee is paid in cash; 50% is paid in shares in the Company which are purchased for the Board members during April, following the Annual General Meeting. The Company is responsible for any asset transfer tax.

The Annual General Meeting in 2016 decided on the following fees for Board members:

Annual fee for chairman, EUR 80,000

Annual fee for member, EUR 40,000

Meeting fee EUR 600/attended meeting/person

Table 1. Maximum limits for the bonuses under the short-term and long-term incentive plans

	Short-term incentive scheme	Lor	ng-term incentive scheme	25
	Performance based bonus scheme 2015 and 2016,%*	Share-based incentive plan 2013 (maximum) Earnings period 2015	Share-based incentive plan 2016 (maximum) Earnings period 2016	Share-based incentive plan 2016 (maximum) Earnings period 2017
President and CEO Other management team	100% 44% <sup>**</sup>	33,800 70,000	70,000 216,875	30,000 <sup>***</sup> 195,000

\* The maximum limits are presented as percentages of the fixed earnings for the target period (year)

\*\* Other members of the Management team on average

\*\* The allocated amount for the Company's interim President and CEO

bonus is determined on the basis of the Group's operating profit and the achievement of the KPIs set for different functions. The function specific KPIs consist of several factors including profitable growth, cash flow, and the efficiency of operative process. The maximum annual bonus corresponds to 40–50% of a person's annual salary. The annual bonus is paid out once per year.

The salary of the management team members was a total of EUR 1,916,346 in 2016, and the taxable fringe benefits amounted to a total of EUR 490,809 per year.

Furthermore, the Group has a share rewards system for key personnel (see Incentive systems for key personnel) that is intended to provide long-term incentives and build commitment towards the company. The maximum limits for the remuneration are set forth in Table 1.

# Pensions and information regarding the termination of the employment relationship

The management team members have no separate pension agreements.

A management team member's period of notice is 6 months when terminated by the Company and 3 months when terminated by the management team member. If the employment is terminated due to a reason attributable to the Company, the management team member is entitled to compensation corresponding to 12 months' salary and other benefits.

#### Incentive systems for key personnel

#### Option scheme 2013

The Annual General Meeting held in 2013 decided on the issue of stock options as part of the Group's incentive and commitment system for personnel. The system also covers persons employed or recruited by the Group at a later date. The Board distributed the options in the spring of 2013 (options 2013A), 2014 (2013B) and 2015 (2013C).

#### Share rewards system 2016

In the spring of 2016, the Board of Nokian Tyres plc decided to update the Group's incentive schemes. The update aims to clarify and improve the schemes and to offer a competitive rewards system for all personnel. The purpose of Nokian Tyres' new share-based incentive system is to harmonize the goals of the owners and key personnel in order to increase the value of the company in the long term, and to commit key personnel to the company. The share rewards system covers some 5% of the Group's personnel, including the management team members.

The share rewards system has three one-year earnings periods, the calendar years 2016, 2017 and 2018. The Company's Board will decide on the system's earnings criteria and the goals set for each criterion at the beginning of the earnings period. The system's possible reward for the earnings period of 2016 is based on the Group's operating profit and net sales. The rewards paid for the earnings period of 2016 correspond to a maximum of 515,000 shares in Nokian Tyres plc, including the monetary reward.

The possible reward from the earnings period of 2016 will be paid in 2017, partially as shares in the Company and partially as money. The monetary reward is intended to cover the taxes and taxlike charges incurred on the key person. As a rule, the reward is not paid if the key person's employment is terminated before the reward is due. Shares that are offered as a reward cannot be handed over during the limitation period of approximately one year.

A member of the Group's management team must own 25% of the gross total number of shares earned through the system, up to the point where the total value of their share ownership is equal to their gross annual salary. They must own this number of shares for as long as they are involved in the Group's management team.

### C. Remuneration statement

### Board of Directors

The remuneration paid to the Board members, the number of shares purchased, and the meeting fees for the Board and the committees are presented in the below table.

 » Read more at www.nokiantyres.com/company/investors/.

#### **Dividend payment**

The Board of Directors proposes to the Annual General Meeting that a dividend of EUR 1.53 per share be paid for the financial year 2016. The record date for the dividend payment will be April 12, 2017 and the dividend payment date April 27, 2017, provided that the Board's proposal is approved.

#### Share register

Shareholders are requested to notify any changes in their contact information to the book entry register in which they have a book entry securities account.

#### **Financial reports**

Nokian Tyres will publish financial information in Finnish and in English as follows:

- Interim Report for three months on May 3, 2017
- Half year Report for six months on August 8, 2017
- Interim Report for nine months on November 1, 2017

Nokian Tyres publishes its Financial Reports and Annual Report on the internet at www.nokiantyres.com/company/ investors/.

### Principles of investor relations

The goal of Nokian Tyres' investor relations is to regularly and consistently provide the stock market with essential, correct, sufficient and up-to-date information used to determine the share value. The operations are based on equality, openness, accuracy, and good service.

The Management of Nokian Tyres is strongly committed to serving the capital markets. The company's President & CEO and CFO are the main parties dealing with and answering questions from analysts and investors. Nokian Tyres adopts at least a three-week period of silence before the publication of financial information and at least a six week period of silence before the publication of the Financial Statements Bulletin.

Analyst and investor meetings are mainly held both in Finland and abroad in conjunction with the publication of the company's financial results. At other times analysts and investors are mainly answered by phone or email.
