Earnings per share

Nokian Tyres group's net sales increased by 32.5% to EUR 1,058.1 million (EUR 798.5 million in 2009). Operating profit grew to EUR 222.2 million (EUR 102.0 million) and Profit for the period to EUR 169.7 million (EUR 58.3 million). Earnings per share increased to EUR 1.34 (EUR 0.47). Cash flow from operations improved to EUR 318.8 million (EUR 123.1 million). The Board of Directors proposes a dividend of EUR 0.65 (EUR 0.40) per share.

In 2011, the company is positioned to provide strong sales growth and to improve operating profit compared to 2010.

Kim Gran, President and CEO:

"A clear improvement in the drivers for demand in core business brought Nokian Tyres back to a strong growth track. The sails are now bulging with strong tailwind as we go into 2011 with thick order books and growing capacity.

The demand for Nokian Tyres' core products started to improve rapidly in Q2 in all our business units. The clear turnaround was driven by improving economies in the Nordic countries and Russia, strong growth in new car sales and better consumer confidence. Our operations were ramped up accordingly and we need to further increase capacity in order to keep up with the growing demand.

We managed to increase market shares, implemented price increases and improved our sales mix. Our distribution network continued to expand not only in Nordic countries and Russia & CIS but also in Central Europe. The Vianor chain opened 148 new shops now totalling 771 in 20 countries.

Our productivity increased significantly as a result of implementing structural changes and an improving utilization of our capacities. Our strong winter tyre brand and solid distribution foothold in core markets together with a snowy winter in all Europe helped us to present good results and strong growth for the whole year.

We will increase our investments significantly in 2011 to secure future growth. This includes two additional production lines for Russia (numbers 9 and 10) which will further improve our output and productivity. In addition, we are looking for further capacity expansion of both production and distribution.

Going into 2011 our order book is all-time high and it provides us with a good opportunity to increase sales, again operating more selectively. We will also continue to launch new product lines, increase prices and improve mix to offset higher raw material costs. Low inventories in the distribution channel and our growing production capacity offer a good starting point for further profitable growth in 2011."

Market situation

The global economy continued to improve in 2010. Easier monetary policies and low interest rates improved global macro indicators. Growth rates of the developed countries were exceeded by those in the emerging markets. In Europe there has been uncertainty related to the governmental borrowing and its effects to financial markets.

Drivers for growth in Nokian Tyres' core markets improved significantly. GDP growth averaged 3% in the Nordic countries and 4% in Russia. In 2010 the new car sales increased in the Nordic countries by 31% year-over-year. In Russia the new car sales were up by 30% in 2010 compared to 2009. In December 2010 the growth was already 60% versus December 2009 and car sales in Russia is expected to continue to grow by approximately 30% in 2011.

The aftermarket sales volume for car tyres increased in the Nordic countries by an estimated 10% and in Europe by 8% in 2010 year-over-year. Tyre industry deliveries to distributors increased by approximately 35% in Russia, trailing the improving economy, lower stocks of distributors and improved consumer confidence.

The second consecutive true winter with heavy snowfall in all Europe and Russia resulted in strong winter tyre consumer sales and left retailers with low inventories. Summer tyre carry-over stocks are down due to production cuts in 2009 combined with a rapid recovery of demand in 2010. Strong demand and improved sales for 2011 are expected in the tyre industry.

The demand for special heavy tyres has continued to improve supported by a significant increase in forest and mining machine manufacture in 2010. In the aftermarket demand has also increased for other special use tyres, i.e. container handling and agricultural tyres. The increase derives from improved demand and prices of pulp, sawmill products, metals and food raw materials.

A recovery of the transport sector improved demand for truck tyres and created some short supply in the aftermarket.

Overall, the market environment has improved clearly and demand exceeds supply in many product groups.

Tyre raw material prices have increased significantly since early 2009; the price for natural rubber has more than tripled by the end of 2010. Oil-based materials have also risen significantly and some materials are in short supply. Tyre industry has successfully implemented price increases but some negative effects on profitability have materialized especially for developing country producers. In early 2011 the raw material prices have continued to go up triggering additional price increases from the tyre industry.

January-December 2010

Nokian Tyres Group recorded net sales of EUR 1,058.1 million (2009: 798.5; 2008: 1,080.9), showing an increase of 32.5% on the corresponding period a year earlier. In the Nordic countries sales increased by 29.1% representing 44.5% (45.4%) of the group's total sales. Sales in Russia increased by 78.0%. Russia and CIS consolidated sales grew by 34.7% and formed 20.7% (20.3%) of the group's total sales. In Central and Eastern Europe sales were up by 43.8% year-over-year representing 25.7% (23.4%) of the group's total sales. In North America sales grew by 9.5% and were 8.7% (10.5%) of the group's total sales.

Sales of Passenger car tyres were up by 35.5% representing 62.4% (60.0%) of the group's total sales. Heavy tyres' sales increased by 61.8% and were 7.1% (5.7%) of the group's total sales. Vianor's sales grew by 12.7% forming 26.9% (31.1%) of the group's total sales. The sales of Other operations were up by 44.3% representing 3.6% (3.2%) of the group's total sales.

Raw material cost (EUR/kg) in manufacturing increased in the review period by 5% year-over-year. Fixed costs amounted to EUR 309.8 million (276.6), accounting for 29.3% (34.6%) of net sales. Total salaries and wages were EUR 147.7 million (2009: 131.0; 2008: 175.5).

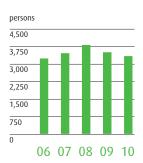

Nokian Tyres Group's operating profit amounted to EUR 222.2 million (2009: 102.0; 2008: 247.0). This was positively affected by a real estate sales profit of EUR 1.8 million. The operating profit was negatively affected by the IFRS 2 -compliant option scheme write-off of EUR 7.3 million (11.8) and expensed credit losses and provisions of EUR 0.8 million (7.1). Operating profit percentage was 21.0% (2009: 12.8%; 2008: 22.8%).

Net financial expenses were EUR 13.3 million (28.6). Net interest expenses were EUR 19.5 million (14.8) including EUR 8.1 million (7.6) in non-cash expenses related to convertible bonds. Net financial expenses include EUR -6.1 million (13.8) of exchange rate differences.

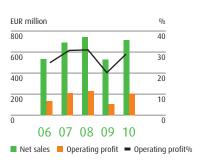

Profit before tax was EUR 208.8 million (73.5). Profit for the period amounted to EUR 169.7 million (58.3), and EPS were EUR 1.34 (EUR 0.47).

Return on net assets (RONA, rolling 12 months) was 17.8% (8.4%). Return on equity was 20.0% (2009: 7.6%; 2008: 18.8%). Income

Heavy Tyres Net sales, operating profit and operating profit%

Vianor Net sales, operating result and operating result%

financing after the change in working capital, investments and the disposal of fixed assets (Cash flow from operations) was EUR 318.8 million (123.1).

The Group employed an average of 3,338 (2009: 3,503; 2008: 3812) people, and 3,506 (2009: 3,292; 2008: 3,784) at the end of the period. The equity-owned Vianor tyre chain employed 1,409 (2009: 1,388; 2008: 1,440) people and Russian operations 851 (2009: 640; 2008: 684) people at the end of the period.

Financial position by 31 December 2010

Gearing ratio was 0.1% (34.8%). Interest-bearing net debt amounted to EUR 0.7 million (263.7). Equity ratio was 68.4% (2009: 62.0%; 2008: 54.8%).

The Group's interest-bearing liabilities totalled EUR 217.2 million (326.2) of which current interest-bearing liabilities amounted to EUR 13.0 million (72.4). The average interest rate of interest-bearing liabilities was 5.25% (4.45%). The average interest rate of interest-bearing liabilities was 1.46% (2.16%) with calculatory non-cash expenses related to the convertible bond eliminated.

At the end of the year the company had unused credit limits amounting to EUR 536.7 million (456.1) of which EUR 235.9 million (185.4) were committed. The current credit limits and the commercial paper program are used to finance inventories, trade receivables, subsidiaries in distribution chains and thus control the typical seasonality in the Group's cash flow due to changes in the working capital.

Research & Development

The goal of Nokian Tyres is for new products to account for at least 25% of annual net sales. The development of a brand-new passenger car tyre takes 2 to 4 years. Approximately one-half of R&D investments are allocated to product testing. Nokian Tyres R & D costs in 2010 totalled EUR 12.7 million (2009: 12.0; 2008: 12.5), which is 1.2% (2009: 1.5%; 2008: 1.2%) of the Group's net sales.

Tax rate

The Group's tax rate in 2010 was 18.7% (20.7%). The tax rate is effected by tax relieves in Russia during the next two years based on present investments and thereafter subject to further investment-related incentive agreements.

Passenger Car Tyres

The net sales of Nokian Passenger Car Tyres in 2010 totalled EUR 714.7 million (527.3), up by 35.5% from previous year. Operating profit increased to EUR 205.5 million (106.2). Operating profit percentage improved to 28.8% (20.1%); in core markets it was 31.6% (24.3%) and in other markets 26.4% (18.6%).

Sales improved in all key geographical markets throughout the year. Sales were particularly good in Q4 with an increase of 63% year-over-year. Half of the sales growth came from an increase in winter tyre sales in Russia. Sales in Central and Eastern Europe improved and were all-time-high. Nokian Tyres' inventories were low after strong preseason sales in Q2, and despite the ramp-up in production winter tyre demand exceeded supply capability.

The company's spearhead product Nokian Hakkapeliitta 7, a studded winter tyre for northern conditions, won practically all car magazine tyre tests in the Nordic countries and in Russia, which boosted sales. Nokian Tyres' market share improved in the core market areas as well as in Central and Eastern Europe. Winter tyres' share of Nokian Tyres' total sales mix grew year-over-year to 76% of volume.

Price increases were implemented for all tyre ranges during the second half of the year to offset the increasing raw material cost.

The Average Selling Price improved by 5% compared with 2009, backed by improved sales mix and changes on core markets' currencies.

Production volume increased by over 40% driven by the start-up of two new production lines (7 and 8) in Russia. Productivity improved clearly in both factories due to restructuring in 2009 and an improved capacity utilization rate. Production costs excluding materials (EUR/kg) were lower than in 2009 due to increased production volumes with a higher share of production made in Russia. A decision was made to add two additional production lines (9 and 10) in Russia in the second and third quarter of 2011 and to further increase the utilization of the Finnish factory from the start of the year.

Fixed costs increased moderately compared to the sales growth which helped to improve margins. Cash flow and working capital rotation improved compared to previous year due to lower inventories, investments and trade receivables.

The order book for 2011 is on a record-high level. The production capacity is ramped up further in order to fully utilize the growth potential. Increasing raw material cost will result in further tyre price increases during 2011.

Heavy Tyres

The net sales of Nokian Heavy Tyres in 2010 totalled EUR 81.0 million (50.1), up by 61.8% year-over-year. Operating profit was EUR 13.7 million (0.0), and the Operating profit percentage 16.9% (0.0%).

Demand for heavy tyres continued to grow at an accelerated pace in 2010. Nokian Heavy Tyres' sales improved in all special use product groups, with forestry tyres showing strongest growth. Low inventories and a time lag in ramping up capacity caused a temporary short supply of Nokian heavy tyres during the second half of the year pushing sales forward.

Price increases were implemented during the second half of 2010 to compensate for the growing raw material cost. A large share of sales to original equipment manufacturers with fixed prices until late 2010, however, cut margins.

The production volume (tons) doubled in 2010 versus 2009. Costs of capacity ramp-up penalized margins but will improve output, productivity and customer service going into 2011. The current heavy tyre weekly production capacity was in full use by the end of 2010.

Nokian Heavy Tyres delivered good results in developing its distribution network. New distributor contracts and 22 new "Vianor Industrial" stores in the Nordic countries were established to meet the increasing need for technical services.

The order book for Nokian Heavy Tyres is good and further price increases have been agreed for early 2011. The focus is to further increase the production output and capacity, to increase sales in Russia and CIS, and to increase prices in line with the growing raw material cost.

Vianor

Equity-owned operations

Vianor's net sales in 2010 were EUR 307.9 million (273.2), up by 12.7% compared with 2009. Operating result improved to EUR 4.0 million (-3.0) including a real estate sales profit of EUR 1.8 million. The Operating profit percentage was 1.3% (-1.1%).

At the end of 2010 Vianor had 169 equity-owned stores in

Finland, Sweden, Norway, USA, Switzerland and Russia. All customer and product groups' sales developed well with the biggest improvement recorded for winter tyre and truck tyre sales. Car services sales increased by 21%. Vianor's market shares in the core market areas improved from the previous year.

In 2011 the focus will be on improving sales and market shares further, developing the car services business and improving cost efficiency.

Franchising and partner operations

During 2010 Vianor expanded the franchise and partner network on Nokian Tyres' core markets by 148 stores. At the end of 2010, Vianor operated in 20 countries; most extensively in the Nordic countries, in Russia and in Ukraine. The global Vianor network comprised of 771 stores of which 602 were partners. Market shares improved as a result of the expansion.

Expanding the partner franchise network will continue according to earlier plans; target is to have more than 900 stores by the end of 2011.

Other operations

Truck Tyres

The net sales of Nokian Truck Tyres were EUR 41.2 million (28.5), up by 44.3% from the previous year. Nokian truck tyres' market share increased in the Nordic countries, in Russia as well as in Central and Eastern Europe due to an improved product range in both premium and standard tyres. Sales of retreading materials improved due to a higher utilization rate in the transport sector and restocking by customers.

The profitability of Nokian Truck Tyres reached an all-time high level in 2010 backed by increased sales volumes, tyre price increases and successful timing of purchases.

In 2011 the focus will be on streamlining logistics, expanding the product range and increasing prices further to offset the effects of the higher raw material cost. The expansion to Russia, CIS and Eastern Europe utilizing the "Vianor truck" service concept will continue.

Russia and the CIS countries

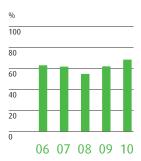

Nokian Tyres' sales in Russia increased by 78.0% to EUR 207.7 million (116.7). Sales in CIS countries (excluding Russia) were EUR 24.1 million (55.4). Consolidated sales in Russia and CIS increased by 34.7% to EUR 231.8 million (172.1).

Sales in Russia grew significantly due to recovering consumer demand and distributors' improving credit capability. Winter tyre sales increased substantially, both in premium and standard tyres. Nokian Tyres improved market shares in Russia and strengthened its position as the market and price leader in the segment of premium branded tyres. Sales in other CIS countries declined due to Nokian Tyres' capacity restraints and delivery restrictions relating to distributors' carry-over stocks and repatriation of receivables.

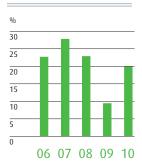

The distribution network was extended by signing additional distribution agreements and expanding the Vianor network. The Vianor tyre chain was expanded by 76 franchising stores in 2010 and there were a total of 429 Vianor stores in 260 cities in Russia and CIS countries at the end of 2010.

In 2010 two new production lines were taken into use in the Russian plant. A total of 8 production lines have been operating since September with an annualized capacity of 8 million tyres. Productivity

Equity ratio

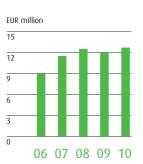

Return on capital employed

Gross investment

R & D expenses

has improved along with the growing production volumes. A significant share of the production was exported to more than 30 countries.

Backed by the oil price the Russian Rouble strengthened against the Euro in the first half of the year. Russian economy recovered at an estimated real GDP growth of 4.0% in 2010 versus 2009. Consumer confidence and purchasing power improved in 2010. Russia is expected to show a healthy growth of 4–6% in 2011.

New car sales, the main driver for premium tyres, increased by 30% in 2010 compared to 2009. In December the new car sales increased by 60% year-over-year. The new car sales is supported by the scrappage incentive program, which will be extended into 2011, and the credit rates offered by banks (including loans subsidized by car manufacturers) returning to pre-crisis values. The car sales annual growth in 2011 is forecasted to be approximately 30% with a gradual return to pre-crisis volume. The sales of used cars is also strong with demand exceeding supply. Western cars that were acquired in large volumes 2-4 years ago are now in need for both summer and winter replacement tyres.

The market potential with strong underlying consumer demand in Russia has become evident with strong growth in car and tyre sales. The Nokian Tyres plant located in Russia inside the customs borders (duty 20% for imported tyres) combined with an expanding Vianor chain provides a significant competitive edge on the market.

Investments

The company's total investments in 2010 were EUR 50.5 million (86.5). This comprises of production investments in the Russian and Finnish factories, moulds for new products and the Vianor expansion projects. Net investment in 2010 was approximately EUR 30 million as flats of Hakkapeliitta Village sales to personnel was officially approved.

Other matters

1. Stock options on the NASDAQ OMX Helsinki Oy

The Board of Directors of Nokian Tyres plc resolved to apply for listing of the stock options 2007B on the NASDAQ OMX (Helsinki Stock Exchange) so that the listing would commence on 1 March 2010.

The total number of stock options 2007B is 2,250,000. Each stock option 2007B entitles its holder to subscribe for one Nokian Tyres plc share. The shares can be subscribed with the stock options 2007B during 1 March 2010 - 31 March 2012. In the aggregate, the stock options 2007B entitle their holders to subscribe for 2,250,000 shares. The present share subscription price with stock options 2007B is EUR 22.97/ share. The dividends payable annually shall be deducted from the share subscription price.

2. Shares subscribed with option rights

After 15 December 2009 registered increase in share capital a total of 1,835,020 Nokian Tyres plc's shares have been subscribed with the 2004C option rights. These option rights are attached to the Nokian Tyres plc's Option Programs of 2004. An increase in share capital relating to 2004C option rights totalling 367,004 euros was entered into the Trade Register on 25 February, 2010. The shares have been traded on the NASDAQ OMX Helsinki Ltd together with the old shares as of 26 February, 2010. After the increase, the number of Nokian Tyres shares was 126,686,410 and the share capital was EUR 25,337,222.00.

After 25 February 2010 registered increase in share capital a total of 503,420 Nokian Tyres plc's shares have been subscribed with the

2004C option rights. These option rights are attached to the Nokian Tyres plc's Option Programs of 2004. An increase in share capital relating to 2004C option rights totalling 100,684 Euros was entered into the Trade Register on 20 May, 2010. The shares have been traded on the NASDAQ OMX Helsinki Ltd together with the old shares as of 21 May, 2010. After the increase, the number of Nokian Tyres shares was 127,189,830 and the share capital was EUR 25,437,906.00.

After 20 May 2010 registered increase in share capital a total of 150 Nokian Tyres plc's shares have been subscribed with the 2007A option rights. These option rights are attached to the Nokian Tyres plc's Option Programs of 2007. New shares have been registered into the Trade Register 19 August, 2010. The share capital will not increase with subscriptions made by 2007A option rights. The sum, corresponding to earlier nominal value, will be entered into the reserve for invested unrestricted equity. The shares have been traded on the NASDAQ OMX Helsinki Ltd together with the old shares as of 20 August, 2010. After the increase, the number of Nokian Tyres shares was 127,189,980 and the share capital remained EUR 25,437,906.00.

After 19 August 2010 registered new shares a total of 950 Nokian Tyres plc's shares have been subscribed with the 2007A option rights and 125 with the 2007B option rights. These option rights are attached to the Nokian Tyres plc's Option Programs of 2007. New shares have been registered into the Trade Register 18 November, 2010. The shares have been traded on the NASDAQ OMX Helsinki Ltd together with the old shares as of 15 December, 2010. After the increase, the number of Nokian Tyres shares is 127,702,461 and the share capital remained EUR 25,437,906.00.

3. Share price development

The Nokian Tyres' share price was EUR 27.45 (EUR 17.00) at the end of the review period. The volume weighted average share price during the period was EUR 21.05 (EUR 12.60), the highest EUR 28.20 (EUR 18.85) and the lowest EUR 15.89 (EUR 7.00). A total of 173,983,343 shares were traded during the period (222,305,175), representing 136% (178%) of the company's overall share capital. The company's market value at the end of the period amounted EUR 3.505 billion (EUR 2.122 billion). The company's percentage of Finnish shareholders was 37.6% (37.8) and 62.4% (62.2) were foreign shareholders registered in the nominee register. This figure includes Bridgestone's ownership of approximately 16%.

4. Decisions made at the Annual General Meeting

On 8 April, 2010, Nokian Tyres Annual General Meeting accepted the financial statements for 2009 and discharged the Board of Directors and the President and CEO from liability.

The meeting decided that a dividend of EUR 0.40 per share shall be paid for the period ending on 31 December, 2009. The dividend shall be paid to shareholders included in the shareholder list maintained by Euroclear Finland Ltd on the record date of 13 April, 2010. The dividend payment date is 23 April, 2010.

4.1 Members of the Board of Directors and Auditor

The meeting decided that the Board of Directors has seven members. Kim Gran, Hille Korhonen, Hannu Penttilä, Yasuhiko Tanokashira, Aleksey Vlasov, Petteri Walldén and Kai Öistämö will continue as Nokian Tyres' Board of Directors. In a meeting held after the Annual General Meeting, Petteri Walldén was elected Chairman of the Board. Authorised public accountants KPMG Oy Ab continue as auditors.

4.2 Remuneration of the Members of the Board of Directors

The meeting decided that the fee paid to the Chairman of the Board is EUR 70,000 per year, while that paid to Board members is set at EUR 35,000 per year. With the exception of the President and CEO, members of the Board and the Nomination and Remuneration Committee are also granted an attendance fee of EUR 600 per meeting.

In addition, 60% of the annual fee be paid in cash and 40% in company shares, such that in the period from 8 April to 30 April, 2010, EUR 28,000 worth of Nokian Tyres plc shares will be purchased at the stock exchange on behalf of the Chairman of the Board and EUR 14,000 worth of shares on behalf of each Board member. This means that the final remuneration paid to Board members is tied to the company's share performance. No separate compensation will be paid to the President and CEO for Board work.

4.3 Granting of stock options and the management's share ownership plan

The meeting decided on the granting of stock options to the personnel of Nokian Tyres Group and to its fully owned subsidiary. The company has a weighty financial reason for issuing stock options since they are intended to form a part of the incentive and commitment programme for the personnel. The purpose of the issue is to encourage the personnel to work on a long-term basis to increase shareholder value. Another purpose of the stock options is to increase personnel commitment to the company. The stock options entitle their holders to subscribe for a maximum total of 4,000,000 new shares in the company. The stock options now issued can be exchanged for shares constituting a maximum total of 3% of the company's shares and votes of the shares, after the potential share subscription.

The subscription price for stock options is based on the market price of Nokian Tyres shares in NASDAQ OMX Helsinki Oy (Helsinki Stock Exchange) in April 2010, April 2011 and April 2012.

The share subscription period for stock options 2010A shall be 1 May 2012 – 31 May 2014, for stock options 2010B, 1 May 2013 – 31 May 2015 and for stock options 2010C, 1 May 2014 – 31 May 2016.

A share ownership plan shall be incorporated with the 2010 stock options, obliging the Group's senior management to acquire the Company's shares with a proportion of the income gained from the stock options. The stock option plan and the management's share ownership plan have been introduced in more detail in the enclosure of AGM decisions press release.

4.4 Amendment to the Articles of Association

The meeting decided that the article regarding the invitation to a General Meeting of shareholders is amended, due to an amendment to the Finnish Companies Act now in effect, as follows:

9§ Invitation to Annual General Meeting
The invitation to Annual General Meeting must be published, in

accordance with the Board of Directors' decision, on the company's website and in one national and one Tampere region daily newspaper, no earlier than three months before the record date referred to in Chapter 4, section 2, subsection 2 of the Finnish Companies Act and no later than three weeks before the Annual General Meeting. The invitation must, however, be delivered no later than nine days before the record date of the Meeting.

4.5 Donations to the institutes of higher education

The meeting authorised the Board to donate a maximum of EUR 500,000 to support universities and other institutes of higher education, and to decide on the payment schedules of donations and other terms relating to donations.

5. Changes in share ownership

Nokian Tyres received an announcement from BlackRock, Inc. on 25 February, 2010, according to which the ownership of Black Rock Investment Management (UK) Limited increased above the level of 10% of the share capital in Nokian Tyres plc as a result of a share transaction concluded on 22 February, 2010. Black Rock Investment Management (UK) Limited held on deal date a total of 12,565,454 Nokian Tyres' shares representing 10,06% of company's 124,851,390 shares and voting rights.

An increase in Nokian Tyres' share capital relating to 2004C option rights totalling 367,004 euros was entered into the Trade Register on 25 February, 2010. After the increase, the number of shares rose to 126,686,410, and thus the ownership of Black Rock Investment Management (UK) Limited decreased below the level of 10% to 9.92% of shares and voting rights.

Nokian Tyres received an announcement from BlackRock, Inc. on 4 May 2010, according to which the ownership of Black Rock Investment Management (UK) Limited had increased above the level of 10% of the share capital in Nokian Tyres plc as a result of a share transaction concluded on 30 April 2010. Black Rock Investment Management (UK) Limited held on deal date a total of 12,809,656 Nokian Tyres' shares representing 10.11% of company's 126,686,410 shares and voting rights.

Nokian Tyres received an announcement from Invesco Limited on 24 June 2010, according to which the ownership of Invesco Limited had decreased under the level of 5% of the share capital in Nokian Tyres plc as a result of a share transaction concluded on 18 June 2010. Invesco Limited held on deal date a total of 6,321,453 Nokian Tyres' shares representing 4.97% of company's 127,189,830 shares and voting rights.

Nokian Tyres received an announcement from Invesco Limited on 9 July 2010, according to which the ownership of Invesco Limited had increased above the level of 5% of the share capital in Nokian Tyres plc as a result of a share transaction concluded on 5 July 2010. Invesco Limited held on deal date a total of 6,365,866 Nokian Tyres' shares representing 5.00% of company's 127,189,830 shares and voting rights.

Nokian Tyres received an announcement from Invesco Limited on 20 July 2010, according to which the ownership of Invesco Limited had decreased under the level of 5% of the share capital in Nokian Tyres plc as a result of a share transaction concluded on 12 July 2010. Invesco Limited held on deal date a total of 6,318,941 Nokian Tyres' shares representing 4.97% of company's 127,189,830 shares and voting rights.

Nokian Tyres received an announcement from BlackRock, Inc. on 1 December 2010, according to which the ownership of Black Rock Investment Management (UK) Limited had decreased under the level of 10% of the share capital in Nokian Tyres plc as a result of a share transaction concluded on 30 November 2010. Black Rock Investment Management (UK) Limited held on deal date a total of 12,679,435 Nokian Tyres' shares representing 9,97% of company's 127,191,055 shares and voting rights.

6. Matters after the review period

In 17 January 2011 Nokian Tyres stated that the company's sales and operating profit increased more than expected in the last quarter of 2010. For the whole year 2010, the Net sales was then estimated to be approximately EUR 1,055.0 million (2009: EUR 798.5 million) and Operating profit EUR 215–220 million (2009: EUR 102.0 million).

Corporate Governance Statement

A separate Corporate Governance Statement has been issued and published in connection with the publishing of the Report by the Board of Directors 2010. Statement is available on pages 58–62 in this report as well as on the company's website www.nokiantyres.com/administration.

Information provided pursuant to the Securities Market Act , Chapter 2, Section b

Information required under the Securities Market Act, Chapter 2, Section 6 b is presented in the Consolidated Financial Statements 2010: in Note 29 and in Information on Nokian Tyres share and also in the Corporate Governance Statement.

Risk management

The Group has adopted a risk management policy approved by the Board of Directors, which supports the achievement of goals and ensures business continuance. Risk management is not allocated to a separate organisation; its tasks follow the general distribution of responsibilities adopted in organisation and other business activities.

Risks are divided into four categories: strategic risks, operational risks, financial risks and hazard risks. The risk management process aims to identify and evaluate risks, and to plan and implement practical measures for each one

Strategic risks are related to customer relationships, political risks, country risks, R&D, investments and acquisitions.

Operational risk arise as a consequence of inadequate or failed Nokian Tyres' internal processes, peoples actions, systems or external events for example changes in raw material prices.

Financial risks are related to fluctuations in interest and currency markets, refunding and counterparty risks. Parent company's treasury manages financial risks according to Group's financial policy approved by the Board of Directors.

Hazard risks can lead to injuries, damage to the property, interruption of production, environmental impacts or liabilities to third parties. Hazard risks are managed by group-wide insurance program.

Risks, uncertainty and disputes in the near future

Ongoing uncertainty related to governmental borrowing in Europe may cause disruption in the financial markets.

Nokian Tyres other risks and uncertainty factors relate to significantly increased raw material prices and to company's ability to raise prices in line with the raw material cost in order to maintain profitability. An efficient ramp-up of new production lines in Russia will partly depend on the success of recruiting new work force from a tightening labour market.

Around 35% of the Group's net sales are generated from

euro-denominated sales. The most important sales currencies in addition to the euro are the Russian rouble, the Swedish and Norwegian krona, the US dollar and the Ukrainian hryvnia.

Special attention will be drawn to controlling net working capital. Inventory and trade receivable rotation have improved compared to previous year in all business units. Russian trade receivables account for around 24% of the Group's total trade receivables.

Nokian Tyres has certain pending legal proceedings and litigations in some countries. At the moment, the company does not expect these proceedings to have any material impact on the performance or future outlook.

Environment and safety

Zero accidents and uncompromising safety in all areas of safety management is at the core of Nokian Tyres' Safety Policy. In its safety and environmental management, Nokian Tyres adheres to international, national and local regulations and agreements, and permit terms and conditions that apply to the company. In addition, Nokian Tyres wants to be a forerunner in product safety and environmental matters.

Nokian Tyres is the only major tyre manufacturer that has produced all the tyres in its own facilities without high-aromatic oils since 2005. For contract manufacturing, the use of high-aromatic oils was terminated in 2009. Furthermore, Nokian Tyres does not use any other chemicals classified as toxic (T, T+) or carcinogenic in its own production. Product development takes environmental matters into consideration, which has resulted in advanced product solutions when it comes to, for example, rolling resistance (fuel consumption, CO_2 emissions) or the soil compaction caused by tyres in agriculture and forestry.

Production and sales growth led to the company's absolute environmental impacts increasing year-over-year. Calculated per product, however, the main environmental impacts developed in a positive direction: energy efficiency, for example, improved and the relative overall volume of waste decreased. The company achieved its goal of reducing overall waste volumes in relation to tonnes produced. In Nokia, the rate of recycling was successfully kept at 95%. Nokian Heavy Tyres will continue its production development projects aiming to reduce VOC emissions.

The plant in Nokia has seen positive development in terms of absences due to illness. Accident frequency has risen slightly due to increasing production. Nevertheless, it is still lower than average. In summer 2010, Nokian Tyres published its EMAS-compliant environmental report, which describes the environmental and safety indicators in greater detail.

Outlook for 2011

Car tyre demand and deliveries have increased clearly driven by a recovery of consumer confidence, growth of GDP on Nokian Tyres' core markets, growth in car sales and improved financing to distributors. Higher industrial activity in machine building and transportation supports growth of heavy tyre and truck tyre sales. Inventories are low in the whole tyre industry and distribution channels. Going into 2011 Nokian Tyres' order book is on an all-time high level in all manufacturing units and demand may exceed supply capacity at times in 2011.

Nokian Tyres will add to production capacity by more than 30% in 2011 versus 2010. Production will be increased by investing in the Russian factory and the company is also evaluating additional opportunities

for expansion. Productivity is expected to improve in the Nokia factory due to restructuring and higher capacity utilization. The development of profits at Nokian Tyres is estimated to be supported by higher sales volumes and an increasing share of Russian production.

Increasing raw material cost will result in further tyre price increases during 2011. Nokian Tyres' raw material cost for full year 2011 is estimated to increase by 25-28% compared to 2010. In order to compensate the company is targeting an ASP increase of 7% for 2011.

A strong expanding distribution, good seasonal logistics, an improved cost structure with majority of production inside duty borders of Russia and CIS as well as new test winner products will give Nokian Tyres a good chance to strengthen its market leadership in the core markets and to continue profitable growth in 2011.

Outlook and guidance 2011:

In 2011, the company is positioned to provide strong sales growth and to improve operating profit compared to 2010.

Investments in 2011

Nokian Tyres' total investments in 2011 will be approximately EUR 117 million (50.5). Roughly EUR 62 million will be invested in the Russian plant's operations and EUR 26 million in moulds for new products. The balance comprises of investments in production bottlenecks, ICT and development of the Vianor chain.

The proposal for the use of profits by the Board of Directors

The distributable funds in the Parent Company total EUR 162.4 million. The Board of Directors proposes to the Annual General Meeting that the distributable funds be used as follows:

a dividend of 0.65 EUR/share be paid out, totalling....EUR 83.8 million retained in equityEUR 78.6 million TotalEUR 162.4 million

No material changes have taken place in the financial position of the company since the end of the financial year. The liquidity of the company is good, and the proposed distribution of profits does not compromise the financial standing of the company, as perceived by the Board of Directors.

Accounting policies for the Consolidated Financial Statements

Basic information

Nokian Tyres plc is a Finnish public corporation founded in accordance with the Finnish laws and domiciled in the city of Nokia. The shares of Nokian Tyres plc have been quoted on the NASDAQ OMX Helsinki Oy since 1995.

Nokian Tyres Group develops and manufactures summer and winter tyres for passenger cars and vans, and special tyres for heavy machinery. The Group also manufactures retreading materials and retreads tyres. The largest and most extensive tyre retail chain in the Nordic countries, Vianor, is also a part of the Group. The core business areas in the Group are Passenger Car Tyres, Heavy Tyres and Vianor.

Basis of preparation

The consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards and in compliance with the IAS and IFRS standards as well as the SIC and IFRIC interpretations in force on 31 December 2010. International Financial Reporting Standards refer to the standards and related interpretations to be applied within the Community as provided in the Finnish Accounting Act and the provisions issued on the basis of this Act, and in accordance with the procedure laid down in Regulation (EC) No 1606/2002 of the European Parliament and of the Council on the application of international accounting standards. Notes to the consolidated financial statements also comply with the Finnish accounting and corporate laws.

The information in the financial statements is presented in millions of euro and are prepared under the historical cost convention except as disclosed in the following accounting policies.

Use of estimates

The preparation of financial statements in compliance with IFRS requires the use of estimates and assumptions that affect the amount of assets and liabilities shown in the statement of financial position at the time of preparation, the presentation of contingent assets and liabilities in the financial statements, and the amount of revenues and expenses during the reporting period. Estimates have been used e.g. to determine the amount of items reported in the financial statements, to measure assets, to test goodwill and other assets for impairment, and for the future use of deferred tax assets. Since the estimates are based on the best current assessments of the management, the final figures may deviate from those used in the financial statements.

Key sources of estimation uncertainty include the shortage of financing for customers in Russia and the other CIS countries, the success of sales in the key markets, the repatriation of receivables and the development of the financial markets.

Principles of consolidation

The consolidated financial statements include the financial statements of the parent company Nokian Tyres plc as well as all subsidiaries in which the Parent company owns, directly or indirectly, more than 50% of the voting rights or in which the Parent company otherwise exercises control.

Associated companies in which the Group has 20 to 50 % of the voting rights and in which it exercises significant influence but not control, have been consolidated using the equity method. If the Group's share of the associated company's losses exceeds its holding in the associated company, the carrying amount will be recorded in the balance sheet at nil value and losses in excess of that value will be

ignored unless the Group has obligations towards the associated companies. Investments in associates include the carrying amount of the investment in an associated company according to the equity method, and possible other non-current investments in the associated company, which are, in substance, part of a net investment in the associated company.

Joint ventures refer to companies in which the Group, under a contractual arrangement, has agreed to share control over financial and business principles with one or more parties.

Acquired subsidiaries have been consolidated using the purchase method, according to which the acquired company's assets and liabilities are measured at fair value on the date of acquisition. The cost of goodwill is the excess of the cost of the business combination over the acquirer's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities. Under IFRS goodwill is not amortised but is tested annually for impairment. Subsidiaries acquired during the financial year have been consolidated from the acquisition date and those divested until the divestment date.

All internal transactions, receivables, liabilities and unrealised margins, as well as distribution of profits within the Group, are eliminated while preparing the consolidated financial statements.

Profit for the period is attributed to the owners of the Parent company and to the non-controlling interests. Moreover, non-controlling interests are disclosed as a separate item under the consolidated equity.

Foreign currency items

Transactions in foreign currencies have been recorded at the exchange rates effective on the transaction date. In the statement of financial position all items in foreign currencies unsettled on the reporting date are measured at the European Central Bank's closing exchange rate. The quotations of the relevant central bank are applied if the European Central Bank does not quote a specific currency. Foreign exchange gains and losses related to business operations and financing activities have been recorded under financial income and expenses.

Foreign Group companies

The statements of financial position of foreign subsidiaries have been translated into euro using the European Central Bank's closing rates, and the income statements using the average rate for the period. Translation differences arising from the subsidiaries' income statements and statements of financial position have been recorded under other comprehensive income as a separate item. Translation differences arising from the elimination of foreign company acquisition cost and from the profits and losses incurred after the acquisition have been recorded under other comprehensive income as a separate item.

The Group hedges its investments in significant foreign Group companies with foreign currency loans or derivative contracts to minimise the impact of exchange rate fluctuations on other comprehensive income. The foreign exchange gains and losses arising from this hedging are booked in their net amount under other comprehensive income. When a subsidiary is divested fully or in part, the related accumulated translation differences are brought from equity to the income statement and entered as a gain or loss on the sale. Translation differences accumulated prior to the Group's date of transition to IFRSs, 1 January 2004, have been moved to retained earnings according to the exemption in IFRS 1, and will not be brought to the income statement even with a later divestment of a subsidiary. Translation differences generated by foreign subsidiaries and associated companies after the date of transition have been presented under other comprehensive income. As of 1 January 2004, the goodwill arising from the business combinations of foreign units and the fair value adjustments in the carrying amounts to their assets and liabilities performed in connection with the business combinations have been presented in the local currencies of the units in question. In accordance with the exemption provided in IFRS 1, the goodwill and its allocation to other assets in past business combinations carried out prior to 1 January 2004 have been recorded in euro.

Cash and cash equivalents

Cash and cash equivalents includes cash in hand and other current investments, such as commercial papers and bank deposits.

Financial assets

Based on IAS 39, financial assets have been classified as follows: financial assets at fair value through profit and loss, available-for-sale financial assets, and loans and receivables. Financial assets at fair value through profit and loss include liquid current investments, such as commercial papers, and derivative assets for which hedge accounting is not applied.

Loans and receivables include non-derivative assets with fixed or determinable payments that are not quoted in an active market. In the Group, this category includes trade receivables and other loan receivables resulting from commercial activities and cash funds and other current investments, such as bank deposits. Loans and other receivables have been measured at amortised cost less any write-downs, and in the statement of financial position they are included in current or non-current receivables, depending on their maturity.

Available-for-sale financial assets include quoted and unquoted shares. Quoted shares are measured at fair value, which is the share bid price on the reporting date. Changes in fair value are recognised in other comprehensive income until the financial asset is sold or divested, at which time the changes in fair value are transferred to profit and loss. Impairments are recorded in profit and loss. Unquoted shares are measured at cost if the fair value can not be reliably determined.

Financial liabilities

Financial liabilities have been classified as follows: financial liabilities at fair value through profit and loss and financial liabilities measured at amortised cost.

Financial liabilities at fair value through profit and loss include derivative liabilities for which hedge accounting is not applied.

In the Group, loans are measured at fair value on the basis of the consideration received in connection with the original recognition, after which the loans are recorded at amortised cost using the effective interest rate method. Bank overdrafts are included in current liabilities in the statement of financial position.

The fair value of the liability portion of a convertible bond is determined at the original recognition using a market interest rate for an equivalent non-convertible bond. This amount is recorded as a liability on an amortised cost basis until maturity of the bonds, unless it has been converted, redeemed, purchased or cancelled prior to that. The remainder of the proceeds is allocated to the conversion option. This is recognised in equity and deferred tax liabilities.

Derivative financial instruments and hedge accounting

The Group holds derivative financial instruments only to hedge its interest rate and foreign currency risk exposures. Derivatives are recognised initially at fair value. Subsequent to initial recognition, derivatives are measured at fair value. Publicly quoted market prices and rates, as well as generally used measurement models, are used to define the fair value of derivatives. The information and assumptions used in the measurement models are based on verifiable market prices and values.

The fair value of derivatives expiring within a year is presented in the statement of financial position under current receivables or liabilities, and of those with longer maturity under non-current receivables or liabilities.

Hedge accounting is not applied to the derivatives used to hedge cash flows from the Group's business operations in foreign currencies. Changes in fair value of derivatives to which hedge accounting is not applied are recognised immediately in profit and loss as financing items.

The Group applies IAS 39 compliant hedge accounting to hedges of the exposure to variability in cash flows that is attributable to a interest rate risk associated with recognised non-current liabilities and to hedges of net investments in foreign operations. To meet all the hedge accounting criteria, at the inception of these hedges the Group designates and documents the hedging relationship between the hedged item and the hedging instrument including effectiveness measurement methods and the hedging strategy in accordance with the Group's risk management policy. The Group aims to choose hedging instruments that create no ineffective portion.

Hedge accounting is applied in cash flow hedging in connection with interest rate swaps, by which floating rate liabilities have been changed to fixed rate liabilities. The effective portion of the change in the fair value of the interest rate swaps is recorded in other comprehensive income and any remaining ineffective portion recorded in the income statement.

The Group applies hedge accounting to certain currency derivatives and currency loans that are used to hedge the net foreign currency investments in foreign subsidiaries. Changes in fair value of the currency derivatives meeting the hedge accounting criteria are recognised in other comprehensive income except for the potential ineffective portion and the time value of currency options, which are recognised in the income statement. Correspondingly, the foreign exchange gains and losses on foreign currency loans taken out for hedging purposes are recorded under other comprehensive income and interest expenses under financial items in the income statement.

Income recognition

Income from the sale of products is recognised when the significant risks and rewards connected with ownership of the goods, as well as the right of possession and effective control, have been transferred to the buyer and payment is probable. This is also the case when a customer separately requests that the assignment of goods be deferred. Revenue from services is recognised once the services have been rendered. Generally, sales are recognised upon delivery in accordance with the contractual terms and conditions. To calculate the net sales, sales revenue is adjusted with indirect taxes and discounts.

Research and development costs

Research costs are recorded as other operating expenses for the financial period in which they incurred. Development costs are capitalised once certain criteria associated with commercial and technical feasibility have been met. Capitalised development costs primarily comprising materials, supplies and direct labour costs, as well as related overheads, are amortised systematically over their expected useful life. The amortisation period is 3–5 years.

Government grants

Grants received from governments or other parties are recognised adjustments to related expenses in the income statement for the period. Grants received for the acquisition of property, plant and equipment reduce the acquisition cost.

Operating profit

The Group has defined operating profit as follows: operating profit is the net sum of net sales plus other operating income less cost of sales, selling and marketing expenses, administration expenses and other operating expenses. Operating profit does not include exchange rate gains or losses.

Borrowing costs

The borrowing costs of items included in property, plant and equipment or other intangible assets, and requiring a substantial construction period, are capitalised for the period needed to produce the investment for the intended purpose. Other borrowing costs are recognised as expenses for the period in which they incurred.

Income taxes

The tax expense of the Group include taxes based on the profit or loss for the period or dividend distribution of the Group companies, as well as adjustment of taxes from prior periods, and change in deferred tax. The tax impact of items recorded directly in equity or other comprehensive income is correspondingly recognised directly in equity or in other comprehensive income. The share of associated companies' profit or loss is shown in the income statement calculated from the net result, and thereby includes the impact of taxes. Deferred taxes are measured with tax rates enacted by the reporting date, to reflect the net tax effects of all temporary differences between the financial reporting and tax bases of assets and liabilities. The most significant temporary differences arise from the amortisation and depreciation differences of intangible assets and property, plant and equipment, measuring the net assets of business combinations at fair value, measuring availablefor-sale financial assets and hedging instruments at fair value, internal profits in inventory and other provisions, appropriations and unused tax losses. Deferred tax liabilities will also be recognised from the subsidiaries' non-distributed retained earnings if profit distribution is likely and will result in tax consequences. Deferred tax assets relating to the temporary differences is recognised to the extent that it is probable that future taxable profits will be available against which the asset can be utilised before expiration. Deferred taxes are not recorded on goodwill that is not deductible for tax purposes.

Earnings per share

Basic earnings per share are calculated by dividing the profit or loss attributable to the equity holders of the parent for the period by the weighted average number of shares outstanding during the period. The average number of treasury shares has been deducted from the number of shares outstanding.

For the calculation of the diluted earnings per share the diluting impact of all potentially diluting share conversions have been taken into account. The Group has two diluting instruments: share options and convertible bonds. The dilution of share options has been computed using the treasury stock method. In dilution, the denominator includes the shares obtained through the assumed conversion of the options, and the repurchase of treasury shares at the average market price during the period with the funds generated by the conversion. The assumed conversion of options is not taken into account for the calculation of earnings per share if the effective share subscription price defined for the options exceeds the average market price for the period. The convertible bonds are assumed to have been traded for company shares after the issue.

Property, plant and equipment

The values of property, plant and equipment acquired by the Group

companies are based on their costs. The assets of acquired subsidiaries are measured at fair value on the date of acquisition. Depreciation is calculated on a straight-line basis from the original acquisition cost, based on the expected useful life. Depreciation includes any impairment losses.

In the statement of financial position, property, plant and equipment are stated at cost less accumulated depreciation and impairment losses. The borrowing costs of items included in property, plant and equipment, and requiring a substantial construction period, are capitalised for the period needed to produce the investment for the intended purpose. Other borrowing costs are recognised as expenses in the period they incurred.

The expected useful lives are reviewed at each reporting date, and if they differ materially from previous estimates, the depreciation schedules are changed accordingly.

Regular maintenance and repair costs are recognised as expenses for period. Expenses incurred from significant modernisation or improvement projects are recorded in the statement of financial position if the company gains future economic benefits in excess of the originally assessed standard of performance of the existing asset. Modernisation and improvement projects are depreciated on a straight-line basis over their useful lives. Gains and losses from the divestment and disposal of property, plant and equipment are determined as the difference of the net disposal proceeds and the carrying amounts. Sales gains and losses are included in operating profit in the income statement.

Goodwill and other intangible assets

The goodwill arising on a business combination consists of the excess of the acquisition costs and the net fair value of identifiable assets, liabilities and contingent liabilities. Goodwill is not amortised; instead, it is tested annually for impairment. The goodwill of associated companies is included in the value of the investment in associated company.

Other intangible assets include customer relationships, capitalised development costs, patents, copyrights, licences and software. Intangible rights acquired in business combinations are measured at fair value and amortised on a straight-line basis over their useful lives. Other intangible assets are measured at cost and amortised on a straight-line basis over their useful lives. An intangible asset is only recorded in the statement of financial position if it is probable that the expected future economic benefits that are attributable to the asset will flow to the company and cost can be measured reliably. Subsequent expenses related to the assets are only recorded in the statement of financial position if the company gains future economic benefits in excess of the originally assessed standard of performance of the existing asset; otherwise, costs are recognised as expenses at the time of occurrence.

In the statement of financial position, intangible assets are recorded at cost less accumulated amortisation and impairment losses. The borrowing costs of items included in other intangible assets, and requiring a substantial construction period, are capitalised for the period needed to produce the investment for the intended purpose. Other borrowing costs are recognised as expenses in the period they incurred. The amortisation schedule for intangible assets is 3-10 years.

Impairment

At reporting date the Group shall assess whether there is any indication that an asset may be impaired. If any such indication exists, the recoverable amount of the asset in question is estimated. Goodwill and intangible assets not yet available for use are tested for impairment at least annually. To assess impairment, the Group's assets are allocated to cash-generating units on the smallest group that is largely independent of other units and the cash flows of which can be separated.

The recoverable amount is the higher of fair value of the asset less costs to sell and a value in use. As a rule, value in use is based on the discounted future cash flows that the corresponding asset or the cash-generating unit can derive. The impairment recognised in the income statement is the amount by which the carrying amount of the asset exceeds the corresponding recoverable amount, and in the statement of financial position it is allocated first to reduce the carrying amount of any goodwill of the unit and then pro rata against the other assets. An impairment loss recognised in prior periods will be reversed if the estimates used to determine the recoverable amount change. However, a reversal of impairment loss shall not exceed the carrying amount that would have been determined in the statement of financial position without the recognised impairment loss in prior periods. Impairment loss on goodwill is not reversed under any circumstances.

Leasing agreements

Leasing agreements are classified as either finance leases or operating leases. Leasing agreements by which the risks and benefits associated with the ownership of an asset are substantially transferred to the lessee company represent finance leases.

The Group as a lessee

Assets held under finance leases, less depreciation, are included in intangible assets and property, plant and equipment and the obligations resulting from the lease in interest-bearing liabilities. Lease payments resulting from finance leases are apportioned between finance charges and the reduction of the outstanding liability. Charges paid under operating leases are recognised as expenses in the income statement.

Finance leases have been recorded in the statement of financial position in the amount equalling the fair value of the leased property or, if lower, present value of minimum lease payments, each determined at the inception of the lease. The assets are depreciated consistent with assets that are owned and any impairment losses are recorded. Depreciation is carried out over the useful life or a shorter lease term.

The Group as a lessor

Assets held under finance leases have been recorded in the statement of financial position as receivables at amount equal to the net investment in the lease. Lease income resulting from finance leases are recorded in the income statement with constant periodic rate of return on the lessor's net investment in the finance lease. Assets held under leases other than finance leases are included in intangible assets and property, plant and equipment in the statement of financial position. These are depreciated over their useful lives, consistent with assets in the company's own use. Lease income is recorded in the income statement on a straight-line basis over the lease term.

Inventories

Inventories are measured at the lower of cost or the net realisable value. Cost is primarily determined in accordance with standard cost accounting, which corresponds to the cost calculated in accordance with the FIFO (first-in, first-out) method. The cost of finished goods and work

in progress includes raw material purchase costs, direct manufacturing wages, other direct manufacturing costs, and a share of production overheads, borrowing costs excluded. Net realisable value is the estimated sales price in ordinary activities less the costs associated with the completion of the product and the estimated necessary costs incurred to make the sale of the product.

Trade receivables

Trade receivables in the statement of financial position are carried at the original invoice value (and those in foreign currencies are measured at the closing rate of the European Central Bank) less doubtful receivables and credits for returned goods. Doubtful receivables are based on the case-by-case assessment of outstanding trade receivables as well as on historical experience of the portion the Group will not receive under the original terms and conditions.

Actual and estimated credit losses are recorded as other operating expenses in the income statement.

Dividend

The dividend proposed by the Board of Directors at the Annual General Meeting has not been recognised in the financial statements. Dividends are only accounted for on the basis of the decision of the Annual General Meeting.

Treasury shares

The Group or the Parent company do not hold treasury shares, nor is the Board of Directors authorised to acquire them.

Provisions

A provision is entered into the statement of financial position if the Group has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions may be related to the reorganisation of activities, unprofitable agreements, environmental obligations, trials and tax risks. Warranty provisions include the cost of product replacement during the warranty period. Provisions constitute best estimates at the balance sheet date and are based on past experience of the level of warranty expenses.

Employee benefits

<u>Pension liabilities</u>

The Group companies have several pension schemes in different countries based on local conditions and practices. These pension arrangements are classified as either defined contribution plans or defined benefit plans. Payments for defined contribution plans are recorded as expenses in the income statement for the period they relate to. All of the material pension arrangements in the Group are defined contribution plans.

Share-based payments

The Group has applied IFRS 2 Share-based payments to all option schemes in which options were granted after 7 November 2002 and which had not vested prior to 1 January 2005. These schemes include the 2010, 2007 and 2004 options that were part of the Group's personnel incentive scheme, and some of the 2001C options.

Share options are measured at fair value on the grant date and expensed on a straight-line basis over the vesting period. Corresponding amounts are recorded as an increase in equity. The expense

determined on the grant date is based on the Group's estimate of the number of options that are assumed to vest at the end of the vesting period. The Black & Scholes' option pricing model is used to determine the fair value of options. The impact of non-market-based conditions (such as profitability and a certain profit growth target) is not included in the fair value of the option; instead, it is taken into account in the final number of options that are assumed to vest at the end of the vesting period. The Group updates the assumption of the final number on each reporting date. Changes in the estimates are recognised in the income statement.

When options are exercised, the nominal value portion of the payments received on the basis of share subscriptions (adjusted with any transaction costs) is recorded in share capital and the remainder in share premium (2004 options) or in paid-up unrestricted equity reserve (2007 and 2010 options).

Other option and incentive schemes

No other option and incentive schemes were in use during 2010.

Non-current assets held for sale and discontinued operations

A non-current asset, or a group of disposable items, is classified as being held for sale if the amount corresponding to its carrying amount will primarily be generated from the sale of the asset instead of being generated from the continued use of the asset. Non-current assets held for sale, and assets related to discontinued operations, are measured at their carrying amounts, or the lower fair value less costs to sell , if the amount corresponding to its carrying amount will primarily be generated from the sale of the asset and if the sales transaction is most likely to take place.

A discontinued operation is a part of the entity that has been divested or classified as being held for sale and represents a separate core business area or a geographic operating area.

The Group's financial statements for 2010 and 2009 do not include any non-current assets held for sale or any discontinued operations.

Application of revised or amended IFRS standards

IFRS are under constant development. Also during the preparation of these financial statements new standards, interpretations or their amendments have been published but are not yet in force and the Group will not apply them before they are enforced. The Group will adopt each standard and interpretation on the effective date or from the beginning of the following financial period.

The Group estimates that the published improvements or amendments will not have a material effect on the future financial statements of the Group.

1. Segment information

The segment information is presented in respect of the business and geographical segments. Business segments are based on the internal organization and financial reporting structure.

The business segments comprise of entities with assets and operating activities providing products and services. The segments are managed as separate entities.

Pricing of inter-segment transactions is based on current market prices and the terms of evaluating profitability and resources allocated to segments are based on profit before interests and taxes.

Segment assets and liabilities include items directly attributable to a segment and items that can be allocated on a reasonable basis. The unallocated items contain tax and financial items together with joint Group resource items. Capital expenditure comprises of additions to intangible assets and property, plant and equipment used in more than one period.

Business segments

Passenger Car Tyres profit centre covers the development and production of summer and winter tyres for cars and vans.

Heavy Tyres profit centre comprises tyres for forestry machinery, special tyres for agricultural machinery, tractors and industrial machinery.

Vianor tyre chain sells car and van tyres as well as truck tyres. In addition to Nokian brand, Vianor sells other leading tyre brands and other automotive products and services.

Other operations includes retreading and truck tyre business. In addition, other operations contain business development and Group management unallocated to the segments.

Eliminations consist of eliminations between different business segments.

Notes concerning geographical segments

The business segments are operating in eight geographic regions: Finland, Sweden, Norway, Russia and the CIS, Eastern Europe, the rest of Europe, North America and the rest of the world.

In presenting information on the basis of geographical segments, segment revenue is based on the location of the customers and segment assets are based on the location of the assets.

2. Acquisitions

Acquisitions in 2010

Vianor-chain acquired full ownership in Swedish Arninge Fälg & Däck AB on 6 September 2010. In Norway Vianor-chain expanded further through two asset deals acquiring the business in Arnfinn Skoli AS and Ola Svendsen Motorcomp on 1 December 2010.

The expectations relating to the growth in sales through increased customer base, and the future expectations on improved market area coverage and sales increase resulted in the recognition of goodwill.

Since these pieces of information are not material individually, the presentation is aggregated. The profits of the acquired companies, totalling EUR 0,0 million, are included in the consolidated income statement. The actual acquisition dates and the nature of the operations taken into account the effect of the acquisitions on the consolidated net sales and profits is not material even if they were combined as of the beginning of the financial year.

Acquisitions in 2009

In 2009 Vianor-chain executed two minor asset deals in the USA: Kingdom Ventures, Inc., Derby, Vermont, on 1 February 2009 and Maine Wholesale Inc., Portland, Maine, on 1 October 2009. Additionally, on 12 March 2009 the Group acquired the whole remaining stock of Hakka Invest Oy domiciled in Finland. The company has been consolidated as a group company even prior to the acquisition based on the exercised control through contractual arrangements, although the group ownership has not exceeded 22%.

The expectations relating to the growth in sales through increased customer base, and the future expectations on improved market area coverage and sales increase resulted in the recognition of goodwill.

Impairment tests for goodwill

Goodwill has been allocated to the Group's cash-generating units that have been defined according to the business organisation.

Allocation of goodwill

EUR million

Passenger Car Tyres	37.7
Vianor	21.1
Total goodwill	58.8

The recoverable amount of a cash-generating unit is based on calculations of the value in use. The cash flow forecasts used in these calculations are based on five-year financial plans approved by the management. The estimated sales and production volumes are based on the current condition and scope of the existing assets. The key assumptions used in the plans include product selection, country-specific sales distribution, margin on products, and their past actual outcomes. Assumptions are also based on commonly used growth, demand and price forecasts provided by market research institutes.

The discount rate used is the weighted average cost of capital (WACC) before taxes defined for the Group. The calculation components are risk-free rate of return, market risk premium, industry-specific beta co-efficient, borrowing cost and the capital structure at market value at the time of testing. The discount rate used for Passenger Car Tyres is 10.0% (11.0% in 2009) and for Vianor is 7.3-12.7% (9.5-13.0% in 2009) varying through country locations. Future cash flows after the forecast

period approved by the management have been capitalised as a terminal value using a steady 2% growth rate and discounted with the discount rate specified above.

The testing indicated no need to recognise impairment losses. In Vianor the calculations indicated that the recoverable amount exceeded the carrying value by EUR 128 million (EUR 69 million in 2009). Of the key assumptions, Vianor is the most sensitive to actual realisation of gross margin levels based on demand forecasts. A lag of more than 3%-units from the gross margin target levels in future years might lead to a need for impairment. The recoverable amount in Passenger Car Tyres significantly (well over 100%) exceeds the carrrying amount of the cash-generating unit, and small sales margin or sales volume changes have no effect on the impairment testing results. A possible impairment would require e.g. an annual decrease well above 30% in net sales or a weakening of the present gross margin level permanently over 50%.

15. Carrying amounts and fair values of financial assets and liabilities

		2010		2009

Total financial liabilities at fair value	-	13.0	-	13.0	- 13.8	-	13.8

Fair value measurements have been classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1: Quoted prices in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety shall be determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety.

There were no transfers between different levels during the financial year.

Level 1 includes e.g. quoted shares whose fair value is based on the bid price of the share on the reporting date. The Group has no financial assets or liabilities belonging to Level 1.

Level 2 includes Group's derivative financial instruments and money market investments. To establish the fair value of these instruments the Group uses generally accepted valuation models with inputs based on observable market data.

Level 3 includes unquoted shares of EUR 0.3 million that are measured at cost. Unquoted shares are measured at cost due to the fact that it has not been possible to establish their fair value using valuation models. The fair value of these investments could not be determined reliably and there is a significant range of estimates or the probabilities of the different estimates within the range could not be reasonably determined and used in estimating the fair value. There are no active markets for these unquoted shares and for the time the Group has no intension to sell or divest them.

16. Investments in associates and availablefor-sale financial assets

EUR million	Investments in associates	Unquoted shares
Accumulated cost, 1 Jan 2010	0.1	0.2
Decrease/Increase	0.0	0.0

In less than 1 year	0.3	0.2
In 1 to 5 years	4.5	0.7
In over 5 years	0.0	0.0
	4.8	0.9
Future finance lease income	0.9	0.1
Finance lease receivables	4.8	0.9

On 31 December 2010 the Group's finance lease receivables relating to Vianor stores amounted to EUR 4.8 million (EUR 0.9 million in 2009).

In 2010 the amount of contingent rents were EUR 0.0 million (EUR 0.0 million in 2009). The unguaranteed residual values to the benefit of the lessor is EUR 2.5 million (EUR 0.0 million in 2009).

18. Deferred tax assets and liabilities

EUR million	31 Dec 2009	Recognised in income statement	Recognised in other compehensive income	Net exchange differences	Acquisitions/ disposals of subsidiaries	31 Dec 2010
Deferred tax assets						
Intercompany profit in inventory	8.3	-0.9				7.4
Provisions	0.6	0.0				0.6
Tax losses carried forward	16.6	-5.9		0.2		10.8
Derivatives at fair value		-7.5	7.5			
Cash flow hedges	0.0		0.2			0.2
Other items	3.2	1.2	-1.2	0.0		3.2
Total	28.7	-13.0	6.5	0.2		22.3
Deferred tax liabilities Property, plant and equipment and						
intangible assets	16.9	-1.3				15.5
Derivatives at fair value	0.0					0.0
Undistributed earnings in subsidiaries	2.5	7.5				10.0
Other items	10.0	3.2		0.5	0.0	13.7
Total	29.4	9.4	-	0.5	0.0	39.3

On 31 December 2010 the Group had carry forward losses for EUR 2.1 million (EUR 9.4 million in 2009), on which no deferred tax asset was recognised. It is not probable that future taxable profit will be available to offset these losses before they expire.

No deferred tax liability was recognised on the undistributed earnings, EUR 26.1 million in 2009 (EUR 23.2 million in 2009), of foreign subsidiaries as the earnings have been invested permanently to the countries in question.

19. Inventories

EUR million	2010	2009
Raw materials and supplies	74.9	43.5
Work in progress	6.7	4.3
Finished goods	129.0	152.2
Total	210.6	200.0

Annually an additional expense is recognised in the carrying amounts of all separate inventory items to avoid them exceeding their maximum probable net realisable values. In 2010 this expense recognition was reversed by EUR 1.1 million (in 2009 an additional expense of EUR 0.1 million was recognised).

20. Trade and other receivables

EUR million	2010	2009
Trade receivables	258.9	248.0
Loan receivables	1.0	0.2
Accrued revenues and deferred		
expenses	13.6	17.3

The nominal value of shares was abolished in 2008, hence no maximum share capital of the Group exists anymore. All outstanding shares have been paid for in full.

Below is a description of the reserves within equity:

Translation reserve

Translation reserve includes the differences arising from the translation of the foreign subsidiaries' financial statements. The gains and losses from the net investments in foreign units and hedging those net investments are also included in translation reserve once the requirements of hedge accounting have been met.

Fair value and hedging reserves

The fair value and hedging reserves comprises of two sub-funds: the

fair value reserves for available-for-sale financial assets, and the hedging fund for changes in the fair values of derivative instruments used for cash flow hedging.

Treasury shares

The Group and the Parent company do not hold any treasury shares.

Dividends

After the balance sheet date, the Board of Directors proposed that a dividend of EUR 0.65 per share be paid (EUR 0.40 in 2009).

Specification of the distributable funds

The distributable funds on 31 December 2010 total EUR 162.4 million (EUR 127.9 million on 31 December 2009) and are based on the balance of the Parent company and the Finnish legislation.

23. Share-based payments

Share option plans

Share option plan 2004 directed at personnel

The Annual General Meeting in 2004 decided to issue a share option plan, as a part of the Group's incentive scheme, to employees of the Group or persons recruited to the Group at a later stage. The Board issued the shares in spring 2004 (2004A warrants), 2005 (2004B warrants) and 2006 (2004C warrants).

The share options were granted to the personnel employed by or in the service of the Nokian Tyres Group until further notice and to Direnic Oy, a wholly owned subsidiary of Nokian Tyres. Should a share option holder cease to be employed by or in the service of the Nokian Tyres Group before the warrants become exercisable, for any other reason than the death of the employee, or the statutory retirement of the employee in compliance with the employment contract, or the retirement of the employee otherwise determined by the company, the holder shall without delay and compensation offer to Nokian Tyres or its order the share options for which the share subscription period under the terms and conditions had not begun at the last day of such holder's employment or service.

Share option plan 2007 directed at personnel

The Annual General Meeting in 2007 decided to issue a share option plan, as a part of the Group's incentive scheme, to employees of the Group or persons recruited to the Group at a later stage. The Board issued the shares in spring 2007 (2007A warrants), 2008 (2007B warrants) and 2009 (2007C warrants).

The share options shall be granted to the personnel employed by or in the service of the Nokian Tyres Group until further notice and to Direnic Oy, a wholly owned subsidiary of Nokian Tyres. Should a share option holder cease to be employed by or in the service of the Nokian

Tyres Group before the warrants become exercisable, for any other reason than the death of the employee, or the statutory retirement of the employee in compliance with the employment contract, or the retirement of the employee otherwise determined by the company, the holder shall without delay and compensation offer to Nokian Tyres or its order the share options for which the share subscription period under the terms and conditions had not begun at the last day of such holder's employment or service.

Share option plan 2010 directed at personnel

The Annual General Meeting in 2010 decided to issue a share option plan, as a part of the Group's incentive scheme, to employees of the Group or persons recruited to the Group at a later stage. The Board's intention is to issue the shares in spring 2010 (2010A warrants), 2011 (2010B warrants) and 2012 (2010C warrants).

The share options shall be granted to the personnel employed by or in the service of the Nokian Tyres Group until further notice and to Direnic Oy, a wholly owned subsidiary of Nokian Tyres. Should a share option holder cease to be employed by or in the service of the Nokian Tyres Group before the warrants become exercisable, for any other reason than the death of the employee, or the statutory retirement of the employee in compliance with the employment contract, or the retirement of the employee otherwise determined by the company, the holder shall without delay and compensation offer to Nokian Tyres or its order the share options for which the share subscription period under the terms and conditions had not begun at the last day of such holder's employment or service.

The following tables present more specific information on the share option plans.

^{*} The number is the number of share options, after the split one 2004 share option is for subscription of 10 shares. One 2007 share option is for subscription of one share.

Measurement of fair value

The fair value of share options is determined with Black-Scholes option pricing model. Fair value of the options is determined on the grant date and recognised as expense in employee benefits during the vesting period. The decision date by the Board of Directors is the grant date. In 2010 the effect of share options on the profit is EUR 7.3 million (2009: EUR 11.8 million).

Main assumptions for Black-Scholes model	Granted in 2010	2009	2008
Share options granted, pcs Weighted average share	1,429,175	1,173,350	2,004,516
price	17.80 €	10.20 €	25.15 €
Subscription price	17.46 €	9.40 €	24.26 €
Interest rate, %	1.75%	2.53%	3.7%
Option life, years	4.0	3.9	4.0
Volatility, % *	43.9%	52.8%	38.8%
Expected forfeitures, %	9.2%	4.4%	13.2%
Total fair value	8,770,943,€	5,218,567,€	16,124,917,€

^{*} Volatility is based on the historical volatility of the share using monthly observations during a period corresponding the option life.

^{**} The weighted average price of the Nokian Tyres plc share between January-March 2009 (2004B), January-December 2009 (2004C) and March-December 2009 (2007A).

24. Pension liabilities

All material pension arrangements in the Group are defined contribution plans.

25. Provisions

EUR million	Warranty provision	Restructuring provision	Total
1 Jan 2010	0.7	1.4	2.1
Provisions made	0.9		0.9
Provisions used	-0.7		-0.7
31 Dec 2010	0.9		2.3
EUR million		2010	2009
Current provisions		0.1	1.4
Non-current provisions		2.2	0.7

Warranty provision

The goods are sold with a normal warranty period. Defective goods will be repaired at the cost of the company or replaced with a corresponding product. The warranty provisions are expected to be utilised within one year.

Restructuring provision

Due to the vastly expanded economic uncertainty the annual production volume in Passenger Car Tyres -unit at the Nokia factory was decreased from then current approx. 6 million tyres to approx. 4 million tyres in 2009. The negotiations to execute the changes resulted in cutting personnel by total of 232 people, of which pension arrangements covered 106 people. Additionally the measures included the lay-offs of a total of 440 people in 110 lots in nine week cycles, and another 62 people was laid off until further notice.

The EUR 3.7 million cost impact of these adjustment measures has been expensed in 2008. The still unrealised estimated costs of the liability components for the probable continued allowances to the dismissed, collected by the Unemployment Insurance Fund in due course, have been recorded both as current and non-current provisions. Major part of the provisions is expected to be utilised in 2011.

26. Interest-bearing liabilities

Future finance charges	0.5	0.6
Total of minimum lease payments	5.3	7.8

On 31 December 2010 the Group's finance leases relating to warehouses, machinery and equipment amounted to EUR 4.5 million (EUR 5.9 million 31 December 2009) and they were included in tangible assets. In 2009 the amount of contingent lease payments were EUR +0.2 million (EUR +0.2 million in 2009). 70 % of the finance lease payments are bound to the three-month Euribor rate. There are interest rate swaps with a notional amount of EUR 3,3 million (EUR 3.9 million in 2009) under which floating rate payments are converted into fixed rate payments.

28. Trade and other payables

29. Financial risk management

The objective of financial risk management is to protect the Group's planned profit development from adverse movements in financial markets. The principles and targets of financial risk management are defined in the Group's financial policy, which is updated and approved by the Board. Financing activities and financial risk management are centralized to the parent company treasury, which enters into financing and hedging transactions with external counterparties and acts as a primary counterparty to business units in financing activities, like funding, foreign exchange transactions and cash management. The Group Credit Committee is responsible for the credit policy and makes the credit decisions that have a significant impact on the credit exposure.

Foreign currency risk

The Nokian Tyres Group consists of the parent company in Finland, separate sales companies in Russia, Sweden, Norway, the USA, Canada,, Czech Republic, Switzerland, Ukraine, Kazakhstan and Belarus, the tyre chain companies in Finland, Sweden, Norway, Russia, Switzerland and the USA, and the tyre plants located in Nokia, Finland and Vsevolozhsk, Russia.

<u>Transaction risk</u>

According to the Group's financial policy, transactions between the parent company and the Group companies are primarily carried out in the local currency of the Group company in question and therefore transaction risk is carried by the parent company and there is no significant currency risk in the foreign Group companies. Exceptions to this main rule are the Group companies which have non-home currency items due to the nature of the business activities. In that case transactions

between the parent company and the Group company are carried out in a currency suitable for the Group currency exposure. The parent company manages transaction risk in these Group companies and implements required hedging transactions for hedging the currency exposure of the Group company according to the Group hedging principles. Hedging principles are not applied to the EUR exposure of Ukrainian and Belarussian subsidiaries. Transactions between Ukrainian and Belarussian subsidiaries and the parent company are carried out in EUR as UAH and BYR are non-convertible currencies.

The open foreign currency exposure of the parent company and the Group companies with non-home currency items comprises of the foreign currency denominated receivables and payables in the statement of financial position and the foreign currency denominated binding purchase and sales contracts (transaction exposure). For risk management purposes, estimated currency cash flows are added to the open foreign currency exposure so that the overall foreign currency risk exposure horizon covers the next 12 months (budget exposure). According to the Group's financial policy the significant transaction exposure in every currency pair is hedged, although 20% over-hedging or underhedging is allowed if a +/- 10% change in the exchange rate does not create over EUR 1 million impact on the income statement. However, a simultaneous +/- 10% change in all the Group exposure currencies against EUR must not create over a EUR 5 million impact on the income statement. Exceptions to the main rule are non-convertible currencies, which do not have active hedging market available. The budget exposure is hedged according to the market situation and the hedge ratio can be 70% of the budget exposure at maximum. As hedging instruments, currency forwards and currency options are used.

Translation risk

In financial statements the statements of financial position of the foreign subsidiaries are translated into euro using the European Central Bank's closing rates and the impact of the exchange rate fluctuations from the net foreign investments are recorded as translation differences in other comprehensive income. Following the Group's financial policy, the main foreign net investments are hedged with non-current currency loans and currency forwards. In general the hedge ratio varies between 50 and 75% of the reported equity. However, the hedge ratio relating to the Russian subsidiaries may be as low as 25% based on the Board decision. The foreign net investments are monitored quarterly.

USD	61.6	33.7	55%	52.1	27.8	53%	

Sensitivity analysis for foreign currency risk

The following table demonstrates the sensitivity to a reasonably possible change in the base currency against the quote currency, with all other variables held constant, of the Group's profit before tax due to changes in the fair value of financial assets and liabilities and the Group's equity due to changes in the fair value of hedges of net investments in foreign operations. The simultaneous and opposite impact

of the translation difference of the net investment is not taken into account in the table.

A reasonably possible change is assumed to be a 10 % base currency appreciation or depreciation against the quote currency. A change of a different magnitude can also be estimated fairly accurately because the sensitivity is nearly linear.

Interest rate risk

The interest rate risk of the Group consists mainly of borrowing, which is split between floating and fixed rate instruments. On the reporting date the floating rate interest-bearing liabilities amounted to EUR 32.1 million (EUR 145.4 million in 2009) and the fixed rate interest-bearing liabilities EUR 185.1 million (EUR 180.8 million in 2009). The Group's policy aims to have at least 50% of the non-current liabilities in fixed rate instruments. Interest rate risk is managed by using interest rate derivatives. On the reporting date the portion of the non-current fixed rate interest-bearing liabilities was 85% (67% in 2009) and the average fixing period of the interest-bearing liabilities was 29 months (37 months in 2009) including the interest rate derivatives. The Group uses interest rate derivatives as cash flow hedges and hedge accounting is mainly applied for those derivatives.

Sensitivity analysis for interest rate risk

The following table demonstrates the sensitivity to a reasonably possible change in interest rates, with all other variables held constant, of the Group's profit before tax through the impact on floating rate borrowings and interest rate hedges measured at fair value through profit or loss and the Group's equity due to changes in the fair value of cash flow hedges. A reasonably possible change is assumed to be a 1 %-point increase or decrease of the market interest rates. A change of a different magnitude can also be estimated fairly accurately because the sensitivity is nearly linear.

Impact of interest rate change	0.1	0.9	-0.1	-0.9	-1.4	1.9	1.4	-1.9

Liquidity and funding risk

In accordance with the Group's financial policy, the treasury is responsible for maintaining the Group's liquidity, efficient cash management and sufficient sources of funding. The committed credit limits cover all funding needs, like outstanding commercial papers, other current loans, working capital changes arising from operative business and investments.

Refinancing risk is reduced by split maturity structure of loans and credit limits. The Group has a EUR 250 million domestic commercial paper program and a EUR 180 million multicurrency revolving credit facility, which is used as a back-up liquidity reserve. The multicurrency credit facility matures in November 2012 and the arrangement fee is recorded under financial expenses over the contract period. In May the Group re-financed a EUR 22.0 million RUB loan due in May 2013. In November the Group took a EUR 6.1 million RUB loan due in 2015. RUB loans are used to reduce the Group RUB exposure. The current credit limits and the commercial paper program are used to finance inventories, trade receivables, subsidiaries in distribution chains and thus to control the typical seasonality in the Group's cash flows. A EUR 150 million convertible loan, which is traded on the Euro MTF market of Luxembourg, is due in 2014, unless it is redeemed, exchanged, purchased or cancelled prior to the maturity. The loan was issued as bonds with a capital of EUR 100,000, which can be traded for 2,672 company shares.

The Group reports the main financial covenants to creditors quarterly. If the Group does not satisfy the requirements set in financial covenants, creditor may demand accelerated repayment of the credits. In 2010 and 2009 the Group has met all the requirements set in the financial covenants. Financial covenants are mainly linked to interest-bearing net debt to EBITDA ratio and equity ratio. Management monitors regularly that the covenant requirements are met. Agreements relating to financing contain terms and conditions upon which the agreement may terminate, if control in the company changes as a result of a public tender offer.

On the reporting date the Group's liquidity in cash and equivalents was EUR 216.6 million (EUR 62.5 million in 2009). At the end of the year the Group's available current credit limits were EUR 356.7 million (EUR 325.4 million in 2009), out of which the committed limits were EUR 55.9 million (EUR 54.7 million in 2009). The available committed non-current credits amounted to EUR 180.0 million (EUR 130.7 million in 2009).

The Group's interest-bearing liabilities totalled EUR 217.2 million, compared to the year before figure of EUR 326.2 million. Around 87% of the interest-bearing liabilities were in EUR. The average interest rate of interest-bearing liabilities was 5.2%. The average interest rate of interest-bearing liabilities with calculatory non-cash expenses related to the convertible bond eliminated was 1.5%. Current interest-bearing liabilities, including the portion of non-current liabilities maturing within the next 12 months, amounted to EUR 13.0 million (EUR 72.4 million in 2009).

Credit Risk

The Group is exposed to credit risk from customers' trade receivables and also from deposits and derivative transactions with different banks and financial institutions.

The principles of customers' credit risk management are documented in the Group's credit risk policy. The Group Credit Committee makes all the significant credit decisions. Credit analysis and payment history collected by credit information companies are used for evaluating credit worthiness. The credit statuses of the customers are followed at the Group companies regularly according to the Group credit risk policy principles. In addition, the country risk is monitored constantly and credits are limited in countries where political or economical environment is unstable. Bank guarantees, documentary credits and specific payment terms are used in controlling the credit risk in trade receivables. Payment programs, which customer is committed to, are always agreed upon for past due receivables. Significant items of trade receivables are evaluated both counterparty specifically and in a portfolio level in order to identify possible impairment. In trade receivables there are no other over 15% customer or country risk concentration than the Russian customers' share of about 24% (about 25% in 2009) on the reporting date.

The credit risk in financial transactions is controlled by doing business only with banks and financial institutions with high credit ratings. In investments the Group's placements are current and funds are invested only in solid domestic listed companies or public institutions. The Board approves credit risk limits for banks and financial institutions annually.

The aging of trade receivables

EUR million	2010	2009
Not past due	205.9	172.5
Past due less than 30 days	30.2	47.2

Past due more than 90 days	20.1	19.6
Total	258.9	248.0

Capital management

The Group's objective of managing capital is to secure with an efficient capital structure the Group's access to capital markets at all times despite of the seasonal nature of the business. The Group monitors its capital structure on the basis of Net debt to EBITDA ratio and Equity ratio. The rolling four quarter average net debt to the rolling EBITDA has to be no more than 3.25 until the end of the first quarter of 2010 and after that no more than 3.00 in accordance with the financial covenants. Equity ratio has to be at least at the level of 30% in accordance with the financial covenants. Equity ratio is calculated as a ratio of total equity to total assets excluding advances received.

Net debt / EBITDA

EUR million	2010	2009
Average interest-bearing liabilities	338.1	450.1
Less: Average liquid funds	98.9	30.9

Derivatives designated as hedges of net invest-						
ments in foreign operations						
Foreign currency derivatives						
Currency forwards	201.6	0.0	8.3	246.8	0.0	7.2

Derivatives are maturing within the next 12 months excluding the interest rate swaps.

The Group holds derivative financial instruments only to hedge its interest rate and foreign currency risk exposures.

The fair value of interest rate derivatives is determined as the present value of the future cash flows based on market interest rates on the reporting date. The Group aims to apply hedge accounting to interest rate derivatives and designate them as cash flow hedges. The effective portion of the changes in fair value of a cash flow hedge is recognised in other comprehensive income and presented in the hedging reserve in equity. Any ineffective portion is recognised directly in profit or loss.

The fair value of forward exchange contracts is measured using the forward rates on the reporting date. The fair value of currency options is calculated using the Garman-Kohlhagen option valuation model.

The changes in fair value of foreign currency derivatives are reported in the income statement excluding the foreign currency derivatives that are hedging the foreign currency denominated net investment in a foreign subsidiary. Hedge accounting is applied for those hedges and for hedges meeting the hedge accounting criteria the changes in fair value are wholly deferred in equity except for the potential ineffective portion and the time value of currency options, which are recognised in the income statement.

The notional amount of foreign currency derivatives is the euro equivalent of the contracts' currency denominated amount on the reporting date.

31. Operating lease commitments

EUR million	2010	2009
The Group as a lessee		
Non-cancellable minimum operating lease		
payments		
In less than 1 year	17.7	17.6
In 1 to 5 years	56.9	63.7
In over 5 years	27.5	19.7
	102.1	101.1

The Group leases office and warehouse spaces and retail outlets under various non-cancellable operating leases. The terms of the leases vary from few years to 15 years. The most significat agreements from the financial reporting point of view are warehouses located at Nokia and Vianor retail stores. The rents of these warehouses are bound to the three-month Euribor rate and agreements include purchase options. There are interest rate swaps with notional amount of EUR 27,4 million (EUR 0,0 million in 2009) under which floating rate payments are converted into fixed rate payments.

The income statement in 2010 contains EUR 27,2 million expenses for operating lease agreements (EUR 25.7 million in 2009).

The Group as a lessor

Vianor has conventional lease contracts for truck tyre frames and treads with short lease periods. These do not involve options for purchase nor lease period extentions

The leasing income is not material.

Accounting policies for the Parent company

General

The financial statements of Nokian Tyres plc, domiciled in the city of Nokia, have been prepared according to the Finnish Accounting Standards (FAS).

Inventory valuation

Inventories are valued at the lower of cost and net realisable value. Cost is determined on a first in - first out (FIFO) basis. In addition to the direct costs, an appropriate proportion of production overheads is included in the value of finished goods.

Fixed assets and depreciation

Fixed assets are stated in the balance sheets at cost less depreciation according to plan. The accumulated difference between the total depreciation charged to the income statement and depreciation according to plan is shown as a separate item in untaxed reserves.

Depreciations according to plan are calculated on the basis of the estimated useful life of the assets using the straight line method.

The depreciation times are as follows:

Intangible assets	3–10 years
Buildings	20-40 years
Machinery and equipment	4–20 years
Other tangible assets	10-40 years

Land property, as well as investments in shares, are not regularly depreciated.

Research and development

Research and development costs are charged to the other operating expenses in the income statement in the year in which they are incurred. Certain significant development costs with useful life over three years are capitalised and are amortised on a systematic basis over their expected useful lives. The amortisation period is between three and five years.

Pensions and coverage of pension liabilities

Pension contributions are based on periodic actuarial calculations and are charged to the income statement.

In Finland the pension schemes are funded through payments to a pension insurance company.

Foreign currency items

Transactions in foreign currencies are recorded at the exchange rates ruling at the dates of the transactions. At the end of the accounting period unsettled balances on foreign currency transactions and forward exchange contracts are valued at the rates published by the European Central Bank as on the financial statement date.

All foreign currency exchange gains and losses are entered under financial income and expenses.

Direct taxes

The income statement includes direct taxes based on the taxable profit and the change in deferred tax arising from temporary differences. The untaxed reserves are shown in full in the balance sheet, and the deferred tax liability is not recorded.

The deferred tax liability and assets are recorded as separate items and are based on the prevailing corporate tax rate.

The Group holds derivative financial instruments only to hedge its interest rate and foreign currency risk exposures.

The fair value of interest rate derivatives is determined as the present value of the future cash flows based on market interest rates on the reporting date.

The fair value of forward exchange contracts is measured using the forward rates on the reporting date. The fair value of currency options is calculated using the Garman-Kohlhagen option valuation model.

The changes in fair value of foregn currency derivatives are reported in the income statement.

The notional amount of foreign currency derivatives is the euro equivalent of the contracts' currency denominated amount on the reporting date.

20. Environmental commitments and expenses

Expenses relating to environment are included to production costs. The company has no material environmental commitments. In addition to the environmental aspects presented in the Annual Report, Nokian Tyres issued an Environmental Report in 2010.

Share capital and shares

Nokian Tyres' share was quoted on the main list of the NASDAQ OMX Helsinki Oy (Helsinki Stock Exchange until 2007) for the first time on 1 June 1995. The company has one class of shares, each share entitling the holder to one vote at the Annual General Meeting and carrying equal rights to dividend. On 24 February 2011, the amount of shares entitled to dividend was 128,849,012.

Share price development and trading volume in 2010

At the end of 2010, the price of Nokian Tyres' share was EUR 27.45, showing an increase of 61.5% on the previous year's closing price of EUR 17.00. At its highest, Nokian Tyres' share was quoted at EUR 28.20 in 2010 (EUR 18.85 in 2009) and EUR 15.89 (EUR 7.00) at its lowest. During the year, a total of 173,983,343 (222,305,175) Nokian Tyres' shares were traded on the NASDAQ OMX Helsinki Oy. At the end of the year, the market capitalisation of the share capital was EUR 3,505,432,554 (EUR 2,122,473,630). On 31 December, 2010, the number of shares was 127,702,461.

Dividend policy

The dividend policy adopted by the company's Board of Directors is to propose to the Annual General Meeting a dividend that reflects the company's profit development. In the past nine years, dividends paid to shareholders have represented approximately 35% of the year's net profit. The company plans to continue to distribute at least 35% of net profits in dividends.

Board authorisations

The Annual General Meeting, held on 3 April 2007, authorised the Board of Directors to make a decision to offer no more than 24,000,000 shares through a share issue or by granting special rights under Chapter 10, section 1 of the Finnish Companies Act that entitle to shares (including convertible bonds) on one or more occasions. The Board may decide to issue new shares or shares held by the company. The maximum number of shares included in the authorisation accounts for approximately 20% of the company's entire share capital. The company has one class of shares.

The authorisation includes the right to issue shares or special rights through private offering, in other words to deviate from the shareholders' pre-emptive right, subject to provisions of the law.

Under the authorisation, the Board of Directors will be entitled to decide on the terms and conditions of a share issue, or the granting of special rights under Chapter 10, section 1 of the Finnish Companies Act, including the recipients of shares or special rights entitling to shares, and the compensation to be paid. It was decided that the authorisation should be exercised for purposes determined by the Board. The authorisation will be effective for five years from the decision made at the Annual General Meeting. This authorisation invalidates all other Board authorisations regarding share issues and convertible bonds.

Company share ownership and authorisation for acquisition

Nokian Tyres does not hold any of its own shares, nor is the Board of Directors authorised to acquire them.

Stock options 2004 directed at personnel

The Annual General Meeting, held on 5 April 2004, decided to issue stock options to the personnel of the Nokian Tyres Group and to Direnic Oy, a wholly owned subsidiary of Nokian Tyres Plc. A deviation was made from the shareholders' pre-emptive subscription right, because the stock options are designed to be part of the Group's incentive scheme. The number of stock options is 735,000. A total of 245,000

stock options will be marked with the symbol 2004A, 245,000 with the symbol 2004B, and 245,000 with the symbol 2004C. According to the original subscription terms, the stock options entitle the subscription of a maximum of 735,000 Nokian Tyres plc shares. The Board's intention was to distribute the stock options in spring 2004 (2004A stock options), 2005 (2004B stock options), and 2006 (2004C stock options).

The original share subscription price for stock options 2004A was the average price of a Nokian Tyres plc share weighted by the share trading volume on NASDAQ OMX Helsinki Oy between 1 January and 31 March 2004, i.e. EUR 64.52. For stock options 2004B, the price was the average price of a share weighted by the share trading volume on NASDAQ OMX Helsinki Oy between 1 January and 31 March 2005, i.e. EUR 120.96 and for stock options 2004C, the average price of a share weighted by the share trading volume on NASDAQ OMX Helsinki Oy between 1 January and 31 March 2006, i.e. EUR 12.82.

The price of shares subscribed for with stock options shall be reduced by the amount of dividends paid after the commencement of the period for which the subscription price was determined, and dividends decided before the subscription on the record date of each dividend payment.

The share subscription period is

- for stock options 2004A 1 March 2006 31 March 2008
- for stock options 2004B 1 March 2007 31 March 2009
- for stock options 2004C 1 March 2008 31 March 2010.

As a result of the subscriptions with the 2004 stock options, and according to the original subscription terms, the share capital of Nokian Tyres plc may be increased by a maximum of EUR 1,470,000 and the number of shares by a maximum of 7,350,000 new shares.

Stock options 2007 directed at personnel

The Annual General Meeting held on 3 April 2007 decided to issue stock options to the personnel of the Nokian Tyres Group and the wholly owned subsidiary of Nokian Tyres plc. A deviation was made from the shareholders' pre-emptive subscription right because the stock options are designed to be part of the Group's incentive scheme. The purpose of the stock options is to encourage the personnel to work on a long-term basis to increase shareholder value.

The number of stock options is 6,750,000. A total of 2,250,000 stock options will be marked with the symbol 2007A, 2,250,000 with the symbol 2007B and 2,250,000 with the symbol 2007C. According to the original subscription terms, the stock options entitle the subscription of a maximum of 6,750,000 Nokian Tyres plc shares.

The Board's intention was to distribute the stock options in spring 2007 (2007A stock options), 2008 (2007B stock options) and 2009 (2007C stock options).

The original share subscription price for stock options 2007A was the average price of a Nokian Tyres plc share weighted by the share trading volume on NASDAQ OMX Helsinki Oy between 1 January and 31 March 2007, i.e., EUR 17.29. For stock options 2007B, the original share subscription price was the average price of a Nokian Tyres plc share weighted by the share trading volume on NASDAQ OMX Helsinki Oy between 1 January and 31 March 2008, i.e., EUR 24.27 and for stock options 2007C, the original share subscription price was the average price of a Nokian Tyres plc share weighted by the share trading volume on the NASDAQ OMX Helsinki Oy between 1 January and 31 March 2009, i.e., EUR 9.04.

The price of shares subscribed for with stock options shall be reduced by the amount of dividends paid after the commencement of the period for which the subscription price was determined, and

dividends decided before the subscription on the record date of each dividend payment. After 13 April 2010, the subscription price for stock options 2007A was EUR 15.68, for stock options 2007B EUR 22.97 and or stock options 2007C EUR 8.24.

The share subscription period is

- for stock options 2007A 1 March 2009 31 March 2011
- for stock options 2007B 1 March 2010 31 March 2012
- for stock options 2007C 1 March 2011 31 March 2013.

As a result of the subscriptions with the 2007 bonds with warrants, and according to the original subscription terms, the share capital of Nokian Tyres plc may be increased by a maximum of EUR 1,350,000 and the number of shares by a maximum of 6,750,000 new shares. A share ownership plan shall be incorporated with the 2007 warrants, according to which the Group's senior management shall be obliged to acquire the Company's shares with a proportion of the income gained from the stock options.

Stock options 2010 directed at personnel

The Annual General Meeting held on 8 April 2010 decided to issue stock options to the personnel of the Nokian Tyres Group and the wholly owned subsidiary of Nokian Tyres plc. A deviation was made from the shareholders' pre-emptive subscription right because the stock options are designed to be part of the Group's incentive and commitment program. The purpose of the stock options is to encourage the personnel to work on a long-term basis to increase shareholder value.

The number of stock options is 4,000,000. A total of 1,320,000 stock options will be marked with the symbol 2010A, 1,340,000 with the symbol 2010B and 1,340,000 with the symbol 2010C. According to the original subscription terms, the stock options entitle the subscription of a maximum of 4,000,000 Nokian Tyres plc new shares or existing shares held by the company. The Board's intention was to distribute the stock options in spring 2010 (2010A stock options), 2011 (2010B stock options) and 2012 (2010C stock options).

The original share subscription price for stock options 2010A was the average price of a Nokian Tyres plc share weighted by the share trading volume on NASDAQ OMX Helsinki Oy between 1 April and 30 April 2010, i.e., EUR 18.54. For stock options 2010B, the original share subscription price is the average price of a Nokian Tyres plc share weighted by the share trading volume on NASDAQ OMX Helsinki Oy between 1 April and 30 April 2011 and for stock options 2010C, the original share subscription price is the average price of a Nokian Tyres plc share weighted by the share trading volume on the NASDAQ OMX Helsinki Oy between 1 April and 30 April 2012.

Should the company distribute dividends or similar assets from reserves of unrestricted equity, from the shares subscription price of the stock options, shall be deducted the amount of the dividend or the amount of distributable unrestricted equity decided after the beginning of the period for determination of the share subscription price but before share subscription, as per the dividend record date or the record date of the repayment of equity. After 13 April 2010, the subscription price for stock options 2010A was EUR 18.14.

The share subscription period is

- for stock options 2010A 1 May 2012 31 May 2014
- for stock options 2010B 1 May 2013 31 May 2015
- for stock options 2010C 1 May 2014 31 May 2016.

As a result of the subscriptions with the 2010 stock options, and according to the original subscription terms, the number of shares may be

increased by a maximum of 4,000,000 new shares. The share subscription price shall be credited to the reserve for invested unrestricted equity. A share ownership plan shall be incorporated with the 2010 stock options, obliging the Group's senior management to acquire the Company's shares with a proportion of the income gained from the stock options

Stock options listed on the main list of NASDAQ OMX Helsinki Oy

Nokian Tyres' 2004A stock options for the option scheme 2004 were listed on NASDAQ OMX Helsinki Oy main list as of 1 March 2006, 2004B options as of 1 March 2007, and 2004C options as of 1 March 2008. The highest quote for the 2004C stock options was EUR 81.00 and the lowest EUR 41.00, and a total of 61,936 stock options were traded during the year. Nokian Tyres' 2007A stock options for the option scheme 2007 were listed on NASDAQ OMX Helsinki Oy main list as of 1 March 2009. At their highest, the 2007A stock options were quoted at EUR 12.34 and at their lowest EUR 3.63. During the year, a total of 2,120,570 2007A stock options were traded on NASDAQ OMX Helsinki Oy.

Nokian Tyres' 2007B stock options for the option scheme 2007 were listed on NASDAQ OMX Helsinki Oy main list as of 1 March 2010. At their highest, the 2007B stock options were quoted at EUR 6.30 and at their lowest EUR 0,50. During the year, a total of 387,438 2007B stock options were traded on NASDAQ OMX Helsinki Oy.

Management shareholding

On 31 December 2010, Nokian Tyres' Board members and the President and CEO held a total of 48,839 Nokian Tyres' shares. In addition, the President and CEO held a total of 160,000 Nokian Tyres' publicly traded stock options, and a total of 180,000 stock options that were not publicly traded in 2010. The shares and publicly traded stock options represent 0.3% of the total number of votes.

Convertible bond loan for Finnish and international institutional investors

On 20 June 2007, the Board of Directors of Nokian Tyres announced the issue of a convertible bond totalling EUR 130.4 million, maturing in 2014, and on the basis of the authorisation granted by the Annual General Meeting on 3 April 2007, issued bonds to institutional investors, deviating from the pre-emptive rights of the company's shareholders. The bonds were issued to finance investments in accordance with the company's investment strategy, to refinance existing financing facilities, and for general corporate purposes.

The bonds were issued in principal amounts of EUR 100,000 and at 100% in their principal amount, and they will not bear interest during the loan period. The loan will be redeemed when it finally expires for an amount producing an annual yield of 3.0%, or for 123% of the loan principal, unless it has previously been converted, redeemed, purchased or cancelled. Each EUR 100,000 bond will be convertible to 2,672 company shares. The conversion price represents a premium of 40% above the reference price of EUR 26.73 of the company's ordinary shares on 20 June 2007. The right to convert the bonds into company shares commences on 7 August 2007 and ends on 20 June 2014 at 4:00 p.m. Finnish time. In the event that all bonds will be converted into ordinary shares of the company, the aggregate number of the new ordinary shares to be issued by the company will be 4,008,551, which represents 3.3% of the aggregate number of the company's shares on 20 June 2007 (provided that the over-allotment option is fully exercised).

The maturity date of the bonds is 27 June 2014, unless previously redeemed, converted, purchased or cancelled. The company may redeem the bonds at their accreted principal amount as at the date fixed for redemption at any time on or after 27 June 2011, provided that

the price of the company's shares multiplied by the conversion ratio is equal to or exceeds 130% of the then applicable accreted principal amount for a period of 20 trading days during a period of 30 consecutive days. In addition, the company has the right to redeem the bonds if, at any time, the aggregate principal amount of the bonds outstanding is equal to or less than 15% of the aggregate principal amount of the bonds initially issued.

The payment of the issue took place on 27 June 2007, and the bonds were registered in the Finnish Trade Register on 28 June 2007.

The offering was managed by Nomura International plc as Sole Bookrunner and Joint Lead Manager and Carnegie Investment Bank AB as Joint Lead Manager. Nokian Tyres granted Nomura International plc an over-allotment option to subscribe for up to EUR 19.6 million of additional bonds solely to cover over-allotments, if any, which may be exercised at any time, up to and including 20 July 2007.

The trading of the bonds on the Euro MTF market of Luxembourg commenced on 17 July 2007. The company issued a Listing Document concerning the listing of the bond (and its terms) on 17 July 2007. The new shares in the company issued in conjunction with bond conversion will be listed on NASDAQ OMX Helsinki Oy.

On 17 July 2007, Nokian Tyres announced that Nomura International plc, the Joint Lead Manager of the Nokian Tyres plc's convertible bonds due 2014 offering, had fully exercised the EUR 19.6 million overallotment option granted to it by Nokian Tyres plc. Subsequent to the exercise of the over-allotment option, the total amount of the convertible bond is EUR 150 million.

NOKIAN TYRES PLC / FINANCIAL REVIEW 2010 AUDITOR'S REPORT 57

Auditor's report

This document is an English translation of the Finnish auditor's report. Only the Finnish version of the report is legally binding.

To the Annual General Meeting of Nokian Tyres plc

We have audited the accounting records, the financial statements, the report of the Board of Directors, and the administration of Nokian Tyres plc for the year ended December 31, 2010. The financial statements comprise the consolidated statement of financial position, income statement, statement of comprehensive income, statement of changes in equity and statement of cash flows, and notes to the consolidated financial statements, as well as the parent company's balance sheet, income statement, cash flow statement and notes to the financial statements.

Responsibility of the Board of Directors and the Managing Director

The Board of Directors and the Managing Director are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU, as well as for the preparation of financial statements and the report of the Board of Directors that give a true and fair view in accordance with the laws and regulations governing the preparation of the financial statements and the report of the Board of Directors in Finland. The Board of Directors is responsible for the appropriate arrangement of the control of the company's accounts and finances, and the Managing Director shall see to it that the accounts of the company are in compliance with the law and that its financial affairs have been arranged in a reliable manner.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial statements, on the consolidated financial statements and on the report of the Board of Directors based on our audit. The Auditing Act requires that we comply with the requirements of professional ethics. We conducted our audit in accordance with good auditing practice in Finland. Good auditing practice requires that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and the report of the Board of Directors are free from material misstatement, and whether the members of the Board of Directors of the parent company and the Managing Director are guilty of an act or negligence which may result in liability in damages towards the company or have violated the Limited Liability Companies Act or the articles of association of the company.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements and the report of the Board of Directors. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of financial statements and report of the Board of Directors that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements and the report of the Board of Directors.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion on the consolidated financial statements

In our opinion, the consolidated financial statements give a true and fair view of the financial position, financial performance, and cash flows of the group in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU.

Opinion on the company's financial statements and the report of the Board of Directors

In our opinion, the financial statements and the report of the Board of Directors give a true and fair view of both the consolidated and the parent company's financial performance and financial position in accordance with the laws and regulations governing the preparation of the financial statements and the report of the Board of Directors in Finland. The information in the report of the Board of Directors is consistent with the information in the financial statements.

Other opinions

We support that the financial statements should be adopted. The proposal by the Board of Directors regarding the distribution of retained earnings shown in the balance sheet is in compliance with the Limited Liability Companies Act. We support that the Members of the Board of Directors of the parent company and the Managing Director should be discharged from liability for the financial period audited by us.

Helsinki, 9 February 2011 KPMG OY AB

Corporate Governance Statement

Nokian Tyres plc (hereinafter "the company") complies with the rules and regulations of its Articles of Association and the Finnish Companies Act, as well as those published by Nasdaq OMX Helsinki Oy ("The Helsinki Stock Exchange") concerning listed companies. The company also complies with the Finnish Corporate Governance Code 2010 approved by the Securities Market Association that became effective 1 October 2010. The code document is available on the Internet at www.cqfinland.fi.

The company's corporate governance is based on the entity comprised of the Annual General Meeting, the Board of Directors, the President and the Group Management Team, the above-mentioned laws and regulations, and the Group's policies, instructions and practices.

Annual General Meeting

The highest decision-making power in the company is held by the Annual General Meeting, whose tasks and procedures are outlined in the Limited Liabilities Companies Act and the company's Articles of Association. The Annual General Meeting decides on such matters as the confirmation of the company's annual accounts, profit distribution, and discharging the Board of Directors and the President from liability. The Annual General Meeting elects the members of the Board of Directors and auditors and determines their fees. In addition, the Annual General Meeting can make decisions concerning for example amendments to the Articles of Association, share issues, granting warrants, and acquisition of the company's own shares.

An extraordinary general meeting is summoned whenever the Board considers this to be necessary or if an auditor or shareholder with a holding of a total of at least one-tenth of the entire stock requires it in writing in order to address a certain issue.

The Annual General Meeting is held by the end of May of each year on a date determined by the Board of Directors, either at the company's registered place of business or in the city of Helsinki or Tampere. The Articles of Association state that the invitation to the Annual General Meeting must be published in one daily newspaper distributed nationwide and one distributed in the Tampere region. In addition, the company publishes the invitation to the Annual General Meeting as a stock exchange releases and on its website.

The Annual General Meeting for 2010 took place on 8 April 2010 in the Tampere Hall, Tampere. The meeting confirmed the consolidated financial statements and discharged the Board members and the President from liability for the fiscal year 2009. All documents related to the Annual General Meeting are available on the Internet at www. nokiantyres.com.

Shareholder's rights

According to the law, shareholders are entitled to subject matters belonging to the Annual General Meeting's scope of power to be addressed at the meeting. This requires that the shareholder submits the requirement to the Board of Directors in writing, far enough in advance so that the matter can be added to the agenda on the invitation.

Shareholders registered in the company's shareholder register by the date specified on the invitation to the Annual General Meeting, 8 days before the meeting (the record date), are entitled to attend the Annual General Meeting. Shareholders can also authorise a proxy to act on their behalf in the Annual General Meeting. Owners of administratively registered shares can be temporarily added to the shareholder register in order to make them eliqible to attend the Annual General Meeting.

In the Annual General Meeting, shareholders are entitled to use the entire amount of votes they own on the record date. Shareholders have

the right to present questions regarding issues on the General Annual Meeting's agenda. In addition, shareholders are entitled to suggest draft resolutions concerning matters belonging to the scope of power of the Annual General Meeting and included on its agenda.

Board of Directors

The Board is responsible for corporate governance and the appropriate conduct of ordinary activities. The Board holds the general juridical power in company-related issues that do not belong to the scope of power of other corporate governance bodies as stipulated in applicable laws and the Articles of Association. The policies and key tasks of the Board are defined in the Limited Liability Companies Act, the Articles of Association and the Board's working order. The key tasks include:

- Consolidated financial statements and interim reports
- Proposals to the Annual General Meeting
- Appointing the President and CEO
- Organisation of financial control.

In addition, the Board deals with, and decides on, matters of principle, as well as issues that carry financial and business significance, such as:

- Group and profit centre strategies
- The Group's budget, action and investment plans
- The Group's risk management and reporting procedures
- Decisions concerning the structure and organisation of the Group
- Significant individual investments, acquisitions, divestments and reorganisations
- The Group's insurance and financing policies
- Reward and incentive scheme for Group management
- Appointing Board committees
- Monitoring and evaluating the actions of the President.

The company has no separate control committee. The Board handles the control committees' tasks specified in the governance code.

Nokian Tyres' President and CEO is in charge of ensuring that the Board members have necessary and sufficient information on the company's operations.

The Board assesses its activities and operating methods by carrying out a self-evaluation once a year.

Composition of the Board

The Board of Directors shall comprise such a number of members and feature such a composition that it is capable of efficiently carrying out its tasks. The elected Board members must be qualified for the task and able to allocate enough time for the Board duties.

According to the Articles of Association of Nokian Tyres, the Board of Directors comprises no less than three and no more than eight members. Members of the Board are elected at the Annual General Meeting. The Board members' term of office terminates at the end of the first Annual General Meeting following the elections. Remunerations payable to Board members are confirmed at the Annual General Meeting. The Board of Directors appoints a chairperson from among its members at the first constituent meeting following the Annual General Meeting. The chairperson presides until the end of the following Annual General Meeting. The Board meetings usually take place in Helsinki. The Board visits different Group units and holds its meetings at these locations every year. When necessary, telephone conferences can also be arranged. The Vice President responsible for finance and control and other Group Management Team members participate in the Board meetings when necessary. The auditor participates in the annual meeting dealing with financial statements. The Group Legal Councel is the secretary of the Board.

The Board met 7 times in 2010, with an attendance as follows:

Attendance	to	the	Meetings	of	the	Board
------------	----	-----	----------	----	-----	-------

Petteri Walldén, chairman	7/7	100%
Kim Gran	7/7	100%
Hille Korhonen	7/7	100%
Hannu Penttilä	7/7	100%
Yasuhiko Tanokashira	5/7	71%
Aleksey Vlasov	2/7	29%
Kai Öistamö	7/7	100%

In 2010 the company's Board comprised the following seven members:

Petteri Walldén, chairman (b. 1948)

Member of the Board since 2005

Education: Master of Science (Engineering)

Independence of the Board members

Kim Gran is the President and CEO of the company. The other Board members are independent of the company. All Board members except Yasuhiko Tanokashira are independent of any major shareholders of the company.

Nomination and Remuneration Committee

A Nomination and Remuneration Committee has been established to add efficiency to the Board's work. The committee assists the Board by preparing matters subject to decision by the Board and reports to the

Board. The committee has no independent decision-making power; the Board makes collective decisions and is responsible for carrying out the tasks assigned to the committee.

Hille Korhonen, Hannu Penttilä and the Chairman of the Board, Petteri Walldén, were members of the Nomination and Remuneration Committee in 2010. The committee prepares the Board's proposal to the Annual General Meeting on the members to be appointed to the Board of Directors and the remuneration paid to Board members. In addition, the committee prepares a proposal to the Board on the company's President and the salary and other incentives paid to the President. The Nomination and Remuneration Committee also submits a proposal to the Board on the allocation and criteria of options, as well as on other incentives.

The committee assembled once in 2010. The attendance rate was 100%. All committee members are independent of the company and independent of any major shareholder of the company.

President and CEO

The President runs the Group's business operations and implements the current corporate governance in accordance with the instructions and guidelines provided by the Board of Directors. The President may, with regard to the extent and quality of the company operations, undertake unusual or extensive actions only under authorisation from the Board of Directors. The President is in charge of ensuring the company accounting's conformity with the law and the reliable organisation of asset management. Kim Gran, vuorineuvos, Bachelor of Science in Economics, has been the company's President and CEO since 2000.

Other management

The Group's management team assists the President in operative management. In compliance with the Group's meeting practice, the Management Workshop convenes once a month, and it is attended by the President and profit centre management, as well as the the service centre and the Vice President for Russian operations. The Group Management Team is introduced in more detail on www.nokiantyres.com.

Salaries and remunerations 2010

Remuneration of the Board members

Remunerations payable to Board members are confirmed at the Annual General Meeting. In 2010, remunerations to Board members totalled EUR 245,000 (EUR 245,000), including 5,348 (8,261) Nokian Tyres' shares worth EUR 98,000 (EUR 98,000). In addition, the committee members received a meeting fee totalling of of EUR 15,900 for each meeting attended. Board members are not included in the company's option scheme. The President does not receive separate remuneration for participating in Board meetings, but the President comes under the scope of option schemes.

Remuneration of the President

The Board of Directors makes decisions concerning the President's salary and other benefits. The compensation package includes basic salary, fringe benefits, pension scheme and performance related bonus scheme, which is based on Group profitability and growth. Maximum bonus is 80% of President's annual base salary.

The President's annual remuneration, including the monthly salary, fringe benefits and incentives, amounted to EUR 967,950 in 2010 (EUR 556.254).

According to a written agreement, the President's age of retirement is 60 years. The pension will be determined on the basis of the Employees Pensions Act and an additional supplementary pension

insurance policy taken out by the company. The total pension shall total no more than 60% of the salary noted as the basis of the supplementary pension, determined on the basis of the salaries and other benefits payable under the current employment contract for a maximum period of five years.

The President's period of notice is 12 months. If the agreement is terminated by the company, the President is entitled to a remuneration corresponding to 12 months' salary and other benefits, in addition to the notice period's salary.

Management's incentive systems

The Nomination and Remuneration Committee's proposal for the salaries and benefits of managerial employees, as well as for the employee incentive scheme, is subject to the Board's approval. Management rewards are based on a monthly remuneration determined by the competence classification of the tasks and on a separate annual bonus. The annual bonus is determined on the basis of the Group's net result and the achievement of the KPIs set for different functions. The function-specific KPIs consist of several factors including profitable growth, cash flow and the efficiency of operative process. At maximum, the annual bonus can correspondent to 15-25 % of one's annual salary.

The Group has also created an option scheme covering the entire personnel, which aims to provide long-term incentives and built commitment to the company.

Mechanisms of internal control, internal audit and risk management

The Group's internal control mechanisms are in place in order to ensure that the financial reports released by the company contain the essential, correct information on the Group's financial position. The Group has defined Group-level instructions and policies for the key operative units specified below in order to ensure efficient and profitable company operations.

The business activities of the Nokian Tyres Group are divided into two areas: the manufacturing business and the tyre chain. The manufacturing business consists of profit centres, which are Passenger Car Tyres, Heavy Tyres (Nokian Heavy Tyres profit centre was incorporated into an independent company as of 1 January 2006), and Other Business. Other Business includes the Truck Tyres unit. Each profit centre is responsible for its business area and its financial performance, risk management, balance sheet and investments, supported by the different service functions. The Group's sales companies are a part of the sales function and serve as product distribution channels in local markets. The tyre chain is organised into a separate sub-group, whose parent company is Vianor Holding Oy, fully owned by the parent company Nokian Tyres plc. The tyre outlets operating in different countries are part of the sub-group. The Managing Directors of the company's subsidiaries are responsible for the daily operations and administration of their companies. They report to the company's Vice President responsible for Sales and Logistics, while the Managing Directors of the Vianor chain report to the director of the Vianor profit centre.

The Board of Directors is responsible for the functionality of the internal control mechanisms; they are managed by the company management and implemented throughout the organisation. Internal control is not a separate function; it is an integral part of all activities at all levels of the Group. Operative company management bears the main responsibility for operational control. Every supervisor is obliged to ensure sufficient control over the activities belonging to his/her responsibility and to continuously monitor the functionality of the control mechanisms. The Vice President responsible for finance and control is responsible for organising financial administration and

reporting processes and the internal control thereof. The parent company's Finance and Control unit is responsible for internal and external accounting; its tasks also include producing financial information concerning the business areas and ensuring the accuracy of this information. The preparation process of the consolidated financial statements (IFRS), the related control measures, as well as the task descriptions and areas of responsibility related to the reporting process have been defined. The parent company's Finance and Control unit is in charge of consolidating the business areas' figures to produce Group-level financial information. Under the parent company's Finance and Control unit's supervision, each legal Group company produces its own information in compliance with the instructions provided and in line with local legislation. The net sales and operating profit of the Group and business units are analysed, and the consolidated profit is compared with the management's assessment of business development and information on operative systems. The Group Finance and Control unit is centrally responsible for the interpretation and application of financial reporting standards, and also for monitoring compliance with these standards.

Efficient internal control requires sufficient, timely and reliable information in order for the company management to be able to monitor the achievement of targets and the efficiency of the control mechanisms. This refers to financial information, as well as other kinds of information received through IT systems and other internal and external channels. Financial administration and other instructions are shared on the intranet for those who need them, and financial administration provides training with regard to these instructions when necessary. There is continuous communication with the business units. The company's financial performance is internally monitored by means of monthly reporting complemented with rolling prognoses. The profit is communicated to company personnel immediately after releasing the official stock exchange releases.

The Internal Auditing in Nokian Tyres Group makes assessments and audits to ensure the efficiency of risk management, internal control and governance processes. Internal Auditing is an independent and objective activity, which aims to help the organisation to achieve its targets. Internal Audit activity in the Group is managed by the Internal Auditor working under the Board of Directors and the President and CEO. The Internal Audit activity of the Group is planned to be conducted in accordance with the International Standards for the Professional Practice of Internal Auditing. The Internal Audit activity in Vianor, which concentrates on guiding the outlets and ensuring conformity to the Vianor activity system, reports to the Internal Auditor of the Group.

Risk management

The Group has adopted a risk management policy, approved by the Board of Directors, which supports the achievement of goals and ensures business continuance. The Group's risk management policy focuses on managing the risks pertaining to business opportunities, as well as those facing the achievement of the Group's goals, in the changing operating environment.

Risks are classified as strategic, operative, financial and hazard risks. Strategic risks are related to customer relationships, political risks, country risks, R&D, investments and acquisitions. Operational risk arise as a consequence of inadequate of failed company's internal processes, people's actions, systems or external events for example changes in raw material prices. Financial risks (Note 29) are related to fluctuations in interest rate and currency markets, refunding and counterparty risks. Hazard risk can lead to injuries, damage to the property, interruption of production, environmental impacts or liabilities to third parties.

The risk management process aims to identify and evaluate risks, and to plan and implement practical measures for each one.

Such measures may include, for example, avoiding the risk, reducing it in different ways or transferring the risk through insurances or contracts. Control functions and actions mean securing or backing-up procedures applied to reduce risks and ensure the completion of risk management measures. Risk management is not allocated to a separate organisation; its tasks follow the general distribution of responsibilities adopted in the organisation and other business activities. The main risks detected in risk surveys are reported to the company's Board of Directors once a year.

Insider issues

Nokian Tyres complies with the guidelines for insider trading drawn up by NASDAQ OMX Helsinki, as well as the standard 5.3 issued by the Financial Supervisory Authority (Declarations of insider holdings and insider registers) and the standard 5.2b (Disclosure obligation of the issuer and shareholder), which the company has supplemented with its own insider regulations. In the guidelines for insiders issued by Helsinki Exchanges, an insider with a duty to declare refers to:

- The company's Board members, President and CEO, auditor, and the representative of the authorised public accountants acting as the principal auditor, and
- 2. Other members of the company's top management who have regular access to insider information and who are authorised to make decisions regarding the company's future development and the organisation of business activities. The company has assigned all its top management members in this category of insiders with a duty to declare.

In the guidelines for insiders issued by NASDAQ OMX Helsinki, companyspecific insiders refer to

- Persons employed by the company or working for the company under another type of contract who, owing to their position or the nature of their work have regular access to insider information and who the company has defined as insiders (so-called permanent company-specific insiders). In this group, the company has included management assistants, people in the communications department responsible for distributing stock exchange and financial information, and key people in the finance department.
- 2. Persons employed by the company under an employment contract or other contract and have access to insider information, or persons temporarily included in the project specific register (so-called project-specific insiders). A project is a confidentially-prepared, uniquely identifiable collection of topics or an arrangement that includes insider information and which, if realised, may essentially affect the value of the company's publicly traded securities. The Financial Supervisory Authority is entitled to have access to information pertaining to the management of the company's projectspecific insider information.

Duty to declare, insider registers and trading prohibition

The Securities Market Act imposes a duty to declare to the company's insiders with a duty to declare, and requires that the company maintain a public register of its insiders with a duty to declare. The law requires that the company keeps a non-public, company-specific register of company-specific insiders. In the guidelines for insiders issued by NASDAQ OMX Helsinki, insiders with a duty to declare and permanent company-specific insiders are jointly called permanent insiders.

Permanent insiders must time their trading in securities issued by the company in such a way that it does not erode confidence in the securities markets. Insiders are not allowed to trade the company's securities in the 30 days preceding the publication of interim reports and financial statement bulletins. This period may be extended if necessary. In addition to permanent insiders, the restriction on trading applies to their spouses, individuals of legal incapacity under their trusteeship and associations in which they exercise authority. The trading prohibition applies to project-specific insiders until the termination or publication of the project.

Management of insider issues

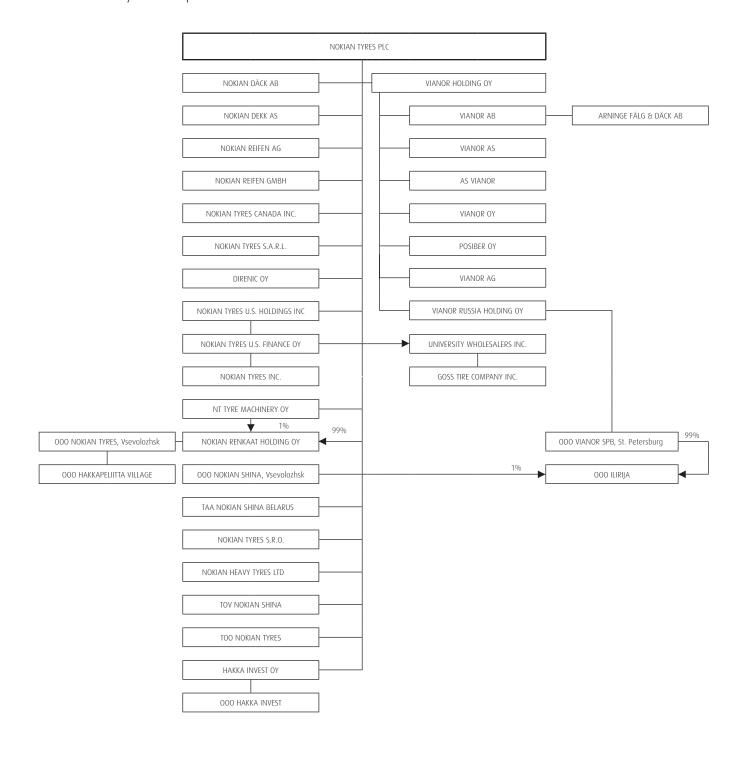

Nokian Tyres maintains its insider register in the Euroclear Finland's SIRE system. The company has appointed a person to manage the tasks related to insider trading. The company also has an insider registrar who deals with the practical tasks related to the insider register. The company annually reviews the basic information and trading covered by the duty to declare of the insiders with a duty to declare. Based on

the review, the company prepares an annual report including the date and results of the review.

Audit

The auditor elected at the Annual General Meeting is KPMG Oy Ab, authorised public accountants, with Mr. Lasse Holopainen, Authorised Public Accountant, acting as the auditor with principal responsibility. In accordance with the existing regulations, he also reports all audit findings to the Group's management. The Group's audit fees in 2010 amounted to EUR 407,000 (EUR 397,000). The fees paid to the authorised public accountants for other services totalled EUR 87,000 (EUR 186,000).

Nokian Tyres Group structure

NOKIAN TYRES PLC / FINANCIAL REVIEW 2010 INVESTOR INFORMATION 63

Nokian Tyres publishes its Interim Reports, Financial Statements Bulletin and Annual Report on the internet www.nokiantyres.com. NOKIAN TYRES PLC / FINANCIAL REVIEW 2010

Principles of investor relations

The goal of Nokian Tyres' investor relations is to regularly and consistently provide the stock market with essential, correct, sufficient and uptodate information used to determine the share value. The operations are based on equality, openness, accuracy and good service.

The Management of Nokian Tyres is strongly committed to serving the capital markets. The company's President & CEO and CFO are the main parties dealing with and answering questions from analysts and investors.

Nokian Tyres adopts a three-week period of silence before the publication of financial information and a six week period of silence before the publication of the financial statements bulletin. Analyst and investor meetings are mainly held both in Finland and abroad in conjunction with the publication of the company's financial results. At other times analysts and investors are mainly answered by phone or email.
