

A close-up, low-angle shot of a truck's front wheel on a snowy road. The tire is a Nokian Hakkapeliitta Truck F2, featuring a complex tread pattern with sipes and grooves. The wheel is a silver, multi-hole steel hub. The background shows a snowy landscape with evergreen trees under a cloudy sky. A green square in the top right corner contains the Nokian Tyres logo.

Nokian Hakkapeliitta Truck F2

Steer axle tyre for winter professionals

Designed for a reason

Our new reference-class steering axle tyre for winter use, Nokian Hakkapeliitta Truck F2, has loads of new and refined features – all designed for a reason: to make working in the winter easy, safe and efficient.

HANDLING

The smoothness of your everyday work boils down to one thing: good handling. When you feel the road and know you are in control, nothing surprises you.

SCHEDULES

There is no room for slack in the transport business. Good tyres help you to be there on time without any risks – even when the conditions are against you.

CHANGING WEATHER

One road has a million faces. Nokian Hakkapeliitta Truck F2 evens out the ever-changing driving conditions – from wet tarmac to deep snow to icy country roads.

FUEL CONSUMPTION

When the fleet is always moving, even small changes make a notable difference. With Nokian Hakkapeliitta Truck F2, your fuel consumption and emissions are measurably smaller.

SAFETY

No transport is worth risking an accident. With its good grip and feel of the road, Nokian Hakkapeliitta Truck F2 is your assurance against the worst days of the winter.

LEGISLATION

All across Europe, the legislation governing winter tyres for trucks is getting stricter. Secure your international transport by ensuring your fleet has winter tyres that match the changing legislation.

PETRI PASANEN

Stories of the road

Petri Pasanen lives in Ivalo, Finnish Lapland. He transports timber with his Volvo truck and keeps the forest roads free from snow for other timber trucks. In his spare time Petri likes to fly through fresh snow with his snowmobile, but at work his weapon of choice against snow is Nokian Hakkapeliitta Truck F2 front tyre.

“Excellent in deep snow”

“The new F2 has a really good feel on the edge of the road near the ditch, where the snow is packed”, he describes. “The tyre is excellent in deep snow and cuts nicely through the snow surface, which is important on bad roads.”

But not all Nokian Hakkapeliitta Truck F2 features are for narrow forest roads. “It has a good grip on fast highways, too”, Petri says, smiling.

The design

STEADY DEVELOPMENT

Nokian Hakkapeliitta Truck F2 is developed from its predecessor Nokian Hakkapeliitta Truck F, but with many refinements. The whole pattern is now more aggressive, resulting in much improved, reference-class winter properties.

GRIP THAT LASTS

Nokian Hakkapeliitta Truck F2 features an all-new Spiral Sipe System, which ensures there is always fresh siping even when the tyre wears out. This means you can still rely on its grip after thousands of kilometers.

KEEP THE STONES OUT

Stones trapped in tyre grooves can eat their way to steel belt, causing corrosion and reducing tyre lifetime. Nokian Hakkapeliitta Truck F2 features improved stone ejectors that keep the main grooves clear, improving service life and making the tyre more suitable for retreading.

NEVER MIND THE SNOW

Nokian Hakkapeliitta Truck F2 features new shoulder design that improves mobility in deep snow. What's more, its wide zig-zag shaped grooves don't get easily clogged by the snow because of their excellent self-cleaning properties.

LET THE WINTER COME

Nokian Hakkapeliitta Truck F2 sets the new standard for steer axle winter tyres. Its measured grip levels on snow and ice beat just about any other tyre in the market. That makes it a safe choice for transports in varying Nordic weather conditions.
